*Electronic Security Systems* Robert Pearson, 2011-04-01 *Electronic Security Systems* is a book written to help the security professional understand the various electronic security functional components and the ways these components interconnect. Providing a holistic approach to solving security issues, this book discusses such topics as integrating electronic functions, developing a system, component philosophy, possible long-term issues, and the culture within a corporation. The book uses a corporate environment as its example; however, the basic issues can be applied to virtually any environment. For a security professional to be effective, he or she needs to understand the electronics as they are integrated into a total security system. *Electronic Security Systems* allows the professional to do just that, and is an invaluable addition to any security library. \*

Provides a well-written and concise overview of electronic security systems and their functions \*

Takes a holistic approach by focusing on the integration of different aspects of electronic security systems \*

Includes a collection of practical experiences, solutions, and an approach to solving technical problems

**Mobile Devices and the Library** Joe Murphy, 2014-01-02 Mobile devices are the 'it' technology, and everyone wants to know how to apply them to their environments. This book brings together the best examples and insights for implementing mobile technology in libraries. Chapters cover a wide variety of the most important tools and procedures from developing applications to marketing and augmented reality. Readers of this volume will get complete and timely knowledge of library applications for handheld devices. The Handheld Librarian conferences have been a centerpiece of learning about how to apply mobile technologies to library services and collections as well as a forum for sharing examples and lessons learned. The conferences have brought our profession

forward into the trend and kept us up to date with ongoing advances. This volume brings together the best from that rich story and presents librarians with the basic information they need to successfully make the case for and implement programs leveraging mobile devices in their libraries. Authors of the diverse practical and well researched pieces originate in all types of libraries and segments of the profession. This wide representation ensures that front line librarians, library administrators, systems staff, even library professors will find this volume perfectly geared for their needs. This book was published as a special issue of The Reference Librarian.

**Smart Education and e-Learning 2019** Vladimir L. Uskov, Robert J. Howlett, Lakhmi C. Jain, 2019-05-31 This book contains the contributions presented at the 6th international KES conference on Smart Education and e-Learning (KES SEEL-2019), which took place at St. Julian's, Malta, June 17-19, 2019. It contains fifty-five high-quality peer-reviewed papers that are grouped into several interconnected parts: Part 1 - Smart Education, Part 2 - Smart e-Learning, Part 3 - Smart Pedagogy, Part 4 - Smart Education: Systems and Technology, Part 5 - Smart Education: Case Studies and Research, Part 6 - Students with Disabilities and Smart Education/University, and Part 7 - Mathematical Modelling of Smart Education and Economics of Smart University. Smart education and smart e-learning are emerging and rapidly growing areas with the potential to transform existing teaching strategies, learning environments, and educational activities and technology in the classroom. Smart education and smart e-learning focus on enabling instructors to develop new ways of achieving excellence in teaching in highly technological smart classrooms, and providing students with new opportunities to maximize their success and select the best options for their education, location and learning style, as well as the mode of content delivery. This book serves as a useful source of research data and valuable information on current research projects, best practices and case studies for faculty, scholars, Ph.D. students, administrators, and practitioners - all those who are interested in smart education and smart e-learning.

*Modularity and the Motor theory of Speech Perception* Michael Studdert-Kennedy, Ignatius G. Mattingly, 2014-01-02 A compilation of the proceedings of a conference held to honor Alvin M. Liberman for his outstanding contributions to research in speech perception, this volume deals with two closely related and controversial proposals for which Liberman and his colleagues at Haskins

Laboratories have argued forcefully over the past 35 years. The first is that articulatory gestures are the units not only of speech production but also of speech perception; the second is that speech production and perception are not cognitive processes, but rather functions of a special mechanism. This book explores the implications of these proposals not only for speech production and speech perception, but for the neurophysiology of language, language acquisition, higher-level linguistic processing, the visual perception of phonetic gestures, the production and perception of sign language, the reading process, and learning to read. The contributors to this volume include linguists, psycholinguists, speech scientists, neurophysiologists, and ethologists. Liberman himself responds in the final chapter.

**Smart Universities** Vladimir L. Uskov, Jeffrey P. Bakken, Robert J. Howlett, Lakhmi C. Jain, 2017-05-18 This book presents peer-reviewed contributions on smart universities by various international research, design and development teams. Smart university is an emerging and rapidly evolving area that creatively integrates innovative concepts; smart software and hardware systems; smart classrooms with state-of-the-art technologies and technical platforms; smart pedagogy based on modern teaching and learning strategies; smart learning and academic analytics; as well as various branches of computer science and computer engineering. The contributions are grouped into several parts: Part 1—Smart Universities: Literature Review and Creative Analysis, Part 2—Smart Universities: Concepts, Systems and Technologies, Part 3—Smart Education: Approaches and Best Practices, and Part 4—Smart Universities: Smart Long Life Learning. The book is a valuable source of research data and findings, design and development outcomes, and best practices for faculty, scholars, Ph.D students, administrators, practitioners and anyone interested in the rapidly growing areas of smart university and smart education.

*Central Eurasian Reader* Stéphane A. Dudoignon, 2021-10-11 No detailed description available for Central Eurasian Reader.

Enterprise Pharo: a Web Perspective Damien Cassou, Stéphane Ducasse, Luc Fabresse, Johan Fabry, Sven Van Caekenberghe, 2016-04-22 Enterprise Pharo is the third volume of the series, following Pharo by Example and Deep into Pharo. It covers enterprise libraries and frameworks, and in particular those useful for doing web development. The book is structured in five parts. The first part talks about simple web applications, starting with a minimal web application in chapter 1 on Teapot and then a tutorial on building a more complete web application in chapter 2. Part two deals with HTTP support in Pharo, talking about character encoding in chapter 3, about using Pharo as an HTTP Client (chapter 4) and server (chapter 5), and about using WebSockets (chapter 6). In the third part we discuss the handling of data for the application. Firstly we treat data that is in the form of comma-separated values (CSV) in chapter 7. Secondly and thirdly, we treat JSON (chapter 8) and its Smalltalk counterpart STON (chapter 9). Fourthly, serialization and deserialization of object graphs with Fuel is treated in chapter 10. Lastly, we discuss the Voyage persistence framework and persisting to MongoDB databases in chapter 11. Part four deals with the presentation layer. Chapter 12 shows how to use Mustache templates in Pharo, and chapter 13 talks about programmatic generation of CSS files. The documentation of applications could be written in Pillar, which is presented in chapter 14. How to generate PDF files from the application with Artefact is shown in chapter 15. The fifth part deals with deploying the web application. This is explained in chapter 16 that talks not only about how to build and run the application, but also other important topics like monitoring.--Open Textbook Library

The Urban Geography Reader Nicholas R. Fyfe, Judith T. Kenny, 2005 Drawing on a rich diversity of theoretical approaches and analytical strategies, urban geographers have been at the forefront of understanding the global and local processes shaping cities, and of making sense of the urban experiences of a wide variety of social groups. Through their links with those working in the fields of urban policy design, urban geographers have also played an important role in the analysis of the economic and social problems confronting cities. Capturing the diversity of scholarship in the field of urban geography, this reader presents a stimulating selection of articles and excerpts by leading figures. Organized around seven themes, it addresses the changing economic, social, cultural, and technological conditions of contemporary urbanization and the range of personal and public responses. It reflects the academic importance of urban geography in terms of both its theoretical and empirical analysis as well as its applied policy relevance, and features extensive editorial input in the form of general, section and individual extract introductions. Bringing together in one volume 'classic' and contemporary pieces of urban geography, studies undertaken in the developed and developing worlds, and examples of theoretical and applied research, it provides in a convenient, student-friendly format, an unparalleled resource for those studying the complex geographies of urban areas.

The Psychology of Reading Keith Rayner, Alexander Pollatsek, 2013-10-14 The last 20 years have witnessed a revolution in reading research. Cognitive psychologists, using high-speed computers to aid in the collection and analysis of data, have developed tools that have begun to answer questions that were previously thought unanswerable. These tools allow for a chronometric, or moment-to-

moment, analysis of the reading process. Foremost among them is the use of the record of eye movements to help reveal the underlying perceptual and cognitive processes of reading. This volume provides a coherent framework for the research accomplished on the reading process over the past 15 years. It emphasizes how readers go about extracting information from the printed page and how they comprehend the text.

*Gastroenterology & Nutrition* Will Carroll,2016-10-14 Gastroenterology & Nutrition is a new e-book in a collection of subject-themed e-books containing relevant key articles from Paediatrics & Child Health. The e-books provide a perfect source of revision for post-graduate exams in paediatrics and portfolio material for life-long learning. As well as mapping to the requirements of post-graduate training in paediatrics, these e-books also enable anyone with a short-term interest in a specific area to buy individual articles at a price-point that will give affordable access to all readers (from medical

students to GPs and practitioners in related areas). The quality of user experience on mobiles, tablets and laptops will be an added bonus for learning on the move. About the journal The parent journal (<http://www.paediatricsandchildhealthjournal.co.uk/>) is a rolling, continuously updated review of clinical medicine over a 4-year cycle covering all the important topics for post-graduate exams in paediatrics. The journal's articles are refreshed, updated, augmented or replaced as appropriate each time the subject is due for revision to provide a concise overview of knowledge and practice core to the curriculum. Each article is written by invited experts and overseen by the relevant subject specialist on the Board. A trainee representative on the Board ensures relevance and accessibility for exam candidates.

**Electronic Access Control** Thomas L. Norman,2011-10-07 Access Control Systems are difficult to learn and even harder to master due to the different ways in which manufacturers approach the subject and the myriad complications associated with doors, door frames, hardware, and electrified locks. Electronic Access Control consolidates this information, covering a comprehensive yet easy-to-read list of subjects that every Access Control System Designer, Installer, Maintenance Tech or Project Manager needs to know in order to develop quality and profitable Alarm/Access Control System installations. Within these pages, Thomas L. Norman, a master at electronic security and risk management consulting and author of the industry reference manual for the design of Integrated Security Systems, describes the full range of EAC devices -- credentials, readers, locks, sensors, wiring, and computers, showing how they work, and how they are installed. The book presents an arcane and complex subject with a conversational and layered learning approach that results in a thorough understanding of each point, thus offering quick career advancement potential to students

and prospective security professionals. A comprehensive introduction to all aspects of electronic access control Provides information in short bursts with ample illustrations Each chapter begins with outline of chapter contents and ends with a quiz May be used for self-study, or as a professional reference guide
