Biomaterials Science Allan S. Hoffman, Frederick J. Schoen, Jack E. Lemons, 2004-07-29 This second edition of Biomaterials Science leads the field by providing a balanced, insightful view of biomaterials. Contributions from pre-eminent researchers and practitioners from diverse academic and professional backgrounds have been integrated into a cohesive curriculum which includes pertinent principles of cell biology, immunology and pathology focusing on the clinical uses of biomaterials as components of implants, devices, and artificial organs, and their uses in biotechnology. The materials science and engineering of synthetic and natural biomaterials and the characterization of their physical, chemical, biochemical and surface properties, and mechanisms and evaluation of interactions with tissue, are also addressed in detail. Book jacket.

Antimalarial Agents Graham L. Patrick,2020-05-30
Antimalarial Agents: Design and Mechanism of Action seeks to support medicinal chemists in their work toward

antimalarial solutions, providing practical guidance on past and current developments and highlighting promising leads for the future. Malaria is a deadly disease which threatens half of the world's population. Advances over several decades have seen vast improvements in the effectiveness of both preventative measures and treatments, but the rapid adaptability of the disease means that the ongoing search for improved and novel antimalarial drugs is essential. Beginning with a historical overview of malaria and antimalarial research, this book goes on to describe the biological aspects of malaria, highlighting the lifecycle of the parasite responsible for malaria, the problem of resistance, genetic mapping of the parasite's genome, established drug targets, and potential drug targets for the future. This sets the scene for the following chapters which provide a detailed study of the medicinal chemistry of antimalarial agents, with a focus on the design of antimalarial drugs. Drawing on the knowledge of its experienced authors, and coupling historic research with current findings to provide a full picture of both past and current milestones, *Antimalarial Agents: Design and Mechanism of Action* is a comprehensive yet accessible guide for all those involved in the design, development, and administration of antimalarial drugs, including student academic researchers, medicinal chemists, malaria researchers, and pharmaceutical scientists. Consolidates both past and current developments in the discovery and design of antimalarial drugs Presents content in a style that is both thorough and engaging, providing a supportive and guiding reference to students and researchers from interdisciplinary backgrounds Highlights drug targets currently considered to be the most promising for future therapies, and the classes of compounds that are currently being studied and perfected

Pitting Corrosion Nasr Bensalah,2012-03-23 Taking into account that corrosion is costly and dangerous phenomenon, it becomes obvious that people engaged in the design and the maintenance of structures and equipment, should have a basic understanding of localized corrosion processes. The Editor hopes that this book will be helpful for researchers in conducting investigations in the field of localized corrosion, as well as for engineers encountering pitting and crevice corrosion, by providing some basic information concerning the causes, prevention, and control of pitting corrosion.

Applied Biomedical Engineering Gaetano

Gargiulo,Alistair McEwan,2011-08-23 This book presents a collection of recent and extended academic works in selected topics of biomedical technology, biomedical instrumentations, biomedical signal processing and bio-imaging. This wide range of topics provide a valuable update to researchers in the multidisciplinary area of biomedical engineering and an interesting introduction for engineers new to the area. The techniques covered include modelling, experimentation and discussion with the application areas ranging from bio-sensors development to neurophysiology, telemedicine and biomedical signal classification.
