  Launch! Advertising and Promotion in Real Time
Michael Solomon,2009 Launch! Advertising and
Promotion is written for advertising and promotion
courses taught to students in the business school
and journalism & mass communication students. This
textbook is the first of its kind to teach
advertising concepts by reverse engineering a real
advertising campaign from beginning to end. In
April 2007, SS+K, an innovative New York City
communications agency, launched the first ever

branding campaign for msnbc.com with the tag A Fuller Spectrum of News. Launch! follows that campaign from initial agency pitch through roll-out of print and media assets to post-campaign analysis. Throughout, it exposes readers to the theory and concepts of advertising and promotion, and the personalities and decisions that drove this campaign. The book takes a rare look behind the curtain - even letting you see some of the paths not chosen by the agency and client. Students get a realistic sense of how theory plays out in practice, and get a flavor for the exciting field of advertising and promotion. And, they consistently learn the perspectives of both the advertising agency (where many journalism and communications students will work) and the client (where many marketing majors will work). This is a unique book, with a unique perspective, by a unique author team, and you won't find this kind of insight in any other text on the market. We think you're going to love it! This textbook has been used in classes at: Ball State University, Emerson College, Florida Institute of Technology, Grand Valley State University, Johnson County Community College, Manchester Business School, McLennan Community College, Michigan State University, North Hennepin Community College, Pierce College, Rochester Institute of Technology, Saint Louis University, Salem State College, South Dakota State University, Texas State University, Texas Tech University, University of New Hampshire, University of North Carolina, University of Notre Dame, University of South Florida, Virginia Tech, Western Kentucky

  <u>Billions & Billions</u> Carl Sagan,1998-05-12 NEW YORK TIMES BESTSELLER • In the final book of his astonishing career, Carl Sagan brilliantly examines the burning questions of our lives, our world, and the universe around us. These luminous, entertaining essays travel both the vastness of the cosmos and the intimacy of the human mind, posing such fascinating questions as how did the universe originate and how will it end, and how can we meld science and compassion to meet the challenges of the coming century? Here, too, is a rare, private glimpse of Sagan's thoughts about love, death, and God as he struggled with fatal disease. Ever forward-looking and vibrant with the

sparkle of his unquenchable curiosity, Billions &
Billions is a testament to one of the great
scientific minds of our day. Praise for Billions &
Billions "[Sagan's] writing brims with optimism,
clarity and compassion."—Ft. Lauderdale Sun-
Sentinel "Sagan used the spotlight of his fame to
illuminate the abyss into which stupidity, greed,
and the lust for power may yet dump us. All of
those interests and causes are handsomely
represented in Billions & Billions."—The
Washington Post Book World "Astronomer Carl Sagan
didn't live to see the millennium, but he probably
has done more than any other popular scientist to
prepare us for its arrival."—Atlanta Journal &
Constitution "Billions & Billions can be
interpreted as the Silent Spring for the current
generation. . . . Human history includes a number
of leaders with great minds who gave us theories
about our universe and origins that ran contrary
to religious dogma. Galileo determined that the
Earth revolved around the Sun, not the other way
around. Darwin challenged Creationism with his
Evolution of Species. And now, Sagan has given the
world its latest challenge: Billions &
Billions."—San Antonio Express-News "[Sagan's]
inspiration and boundless curiosity live on in the
gift of his work."—Seattle Times & Post-
Intelligencer "Couldn't stay awake in your high
school science classes? This book can help fill in
the holes. Acclaimed scientist Carl Sagan combines
his logic and knowledge with wit and humor to make
a potentially dry subject enjoyable to read."—The

The Story of the Selma Voting Rights Marches in

Photographs David Aretha,2014-01-01 The Civil Rights Act of 1964 was a momentous victory for civil rights activists, but one major obstacle remained in the path toward equal rights for African Americans: the right to vote. In the South, segregationists prevented African Americans from voting. Civil rights leaders believed it was time for strong action and chose Selma, Alabama, as the rallying point. There, the marches and protests captured the nation's attention. Through gripping primary source photographs, author David Aretha explores this important time in American history.

  Black American Cinema Manthia Diawara,2012-10-02 This is the first major collection of criticism on Black American cinema. From the pioneering work of Oscar Micheaux and Wallace Thurman to the Hollywood success of Spike Lee, Black American filmmakers have played a remarkable role in the development of the American film, both independent and mainstream. In this volume, the work of early Black filmmakers is given serious attention for the first time. Individual essays consider what a Black film tradition might be, the relation

between Black American filmmakers and filmmakers from the diaspora, the nature of Black film aesthetics, the artist's place within the community, and the representation of a Black imaginary. Black American Cinema also uncovers the construction of Black sexuality on screen, the role of Black women in independent cinema, and the specific question of Black female spectatorship. A lively and provocative group of essays debate the place and significance of Spike Lee Of crucial importance are the ways in which the essays analyze those Black directors who worked for Hollywood and whose films are simplistically dismissed as sell-outs, to the Hollywood master narrative, as well as those crossover filmmakers whose achievements entail a surreptitious infiltration of the studios. Black American Cinema demonstrates the wealth of the Black contribution to American film and the complex course that contribution has taken. in the philosophy of mathematics. A case study is provided of an emerging research tradition in one country. This is the Hermeneutic strand of research in the philosophy of mathematics education in Brazil. This illustrates one orientation towards research inquiry in the philosophy of mathematics education. It is part of a broader practice of 'philosophical archaeology': the uncovering of hidden assumptions and buried ideologies within the concepts and methods of research and practice in mathematics education.
