Human Rights Approaches to Climate Change Sumudu Atapattu, 2015-10-16 Despite the clear link between climate change and human rights with the potential for virtually all protected rights to be undermined as a result of climate change, its catastrophic impact on human beings was not really understood as a human rights issue until recently. This book examines the link between climate change and human rights in a comprehensive manner. It looks at human rights approaches to climate change, including the jurisprudential bases for human rights and the environment, the theoretical framework governing human rights and the environment, and the different approaches to this including benchmarks. In addition to a discussion of human rights implications of international environmental law principles in the climate change regime, the book explores how the human rights framework can be used in relation to mitigation, adaption, and adjudication. Other chapters examine how vulnerable groups –women, indigenous peoples and climate refugees – would be disproportionately affected by climate change. The book then goes on to discuss a new category of people created by climate change, those who will be rendered stateless as a result of states disappearing and displaced by climate change, and whether human rights law can adequately address these emerging issues.

Climate Change and Human Rights Ottavio Quirico, Mouloud Boumghar, 2015-09-07 Do anthropogenic greenhouse gas emissions affect human rights? Should fundamental rights constrain climate policies? Scientific evidence demonstrates that anthropogenic greenhouse gas emissions contribute to increasing atmospheric temperatures, soon passing the compromising threshold of 2° C. Consequences such as Typhoon Haiyan prove that climate alteration has the potential to significantly impair basic human needs. Although the United Nations Framework Convention on Climate Change and human rights regulatory regimes have so far proceeded separately, awareness is arising about their reciprocal implications. Based on tripartite fundamental obligations, this volume explores the relationship between climate change and interdependent human rights, through the lens of an international and comparative perspective. Along the lines of the metaphor of the 'wall', the research ultimately investigates the possibility of overcoming the divide between universal rights and climate change, and underlying barriers. This book aims to be a useful resource not only for practitioners, policymakers, academics, and students in international, comparative, environmental law and politics and human rights, but also for the wider public.

Climate change justice and human rights: An African perspective Ademola Oluborode Jegede, Oluwatoyin Adejonwo, 2023-01-16 Populations in Africa are vulnerable to both the direct and indirect adverse effects of climate change that are of human rights significance. The urgency for states in Africa to implement climate interventions while they face developmental challenges, however, raises questions of 'justice' or 'fairness' between the developed and the developing states. Consequently, interrogating how the human rights paradigm may respond to negative implications of climate change and its 'fairness' is important as states continue to engage with the climate change standard setting. This edited volume critically interrogates human rights paradigm as an intervention to secure climate change justice for vulnerable populations; analyses regional protection against human rights consequences of climate change; and assesses emerging interventions based on domestic regulatory frameworks on climate change in selected states in Africa.

State Responsibility, Climate Change and Human Rights under International Law Margaretha Wewerinke-Singh, 2019-03-21 The last decade has witnessed an increasing focus on the relationship between climate change and human rights. Several international human rights bodies have expressed concern about the negative implications of climate change for the enjoyment of human rights, and the Paris Agreement is the first multilateral climate agreement to refer explicitly to states' human rights obligations in connection with climate change. Yet despite this, there are still significant gaps in our understanding of the role of international human rights law in enhancing accountability for climate action or inaction. As the Paris Agreement has shifted the focus of the climate change regime towards voluntary action, and the humanitarian impacts of climate change are increasingly being felt around the world, accountability for climate change has become an increasingly salient issue. This book offers a timely and comprehensive analysis of the legal issues related to accountability for the human rights impact of climate change, drawing on the state responsibility regime. It explains when and where state action relating to climate change may amount to a violation of human rights, and evaluates various avenues of legal redress available to victims. The overall analysis offers a perceptive insight into the potential of innovative rights-based climate actions to shape climate and energy policies around the world.

Rights and Courts in Pursuit of Social Change Dia Anagnostou, 2014-12-01 Over the past few decades, European countries have witnessed a proliferation of legal norms concerning marginalised individuals and minorities who increasingly invoke them in front of courts to assert their rights and claim protection. The present volume explores the relationship between law, rights and social mobilisation in Europe. It specifically enquires into the extent and ways in which legal processes and entitlements are mobilised by less privileged social actors to advance their rights claims and pursue social change. Most distinctly, it explores such processes in the context of the multi-level European system, characterised by the existence of multiple legal and judicial arenas at the national, subnational and supranational/transnational level. In such a complex system of law and governance in Europe, concepts like legal opportunity structures, as well as the factors shaping them need to be reconceptualised. How does the multi-level European context distinctly shape the nature and salience of rights, as well as their mobilisation by individuals and minority actors?

Human Rights and Climate Change Stephen Humphreys, 2009-12-03 As the effects of climate change continue to be felt, appreciation of its future transformational impact on numerous areas of public law and policy is set to grow. Among these, human rights concerns are particularly acute. They include forced mass migration, increased disease incidence and strain on healthcare systems, threatened food and water security, the disappearance and degradation of shelter, land, livelihoods and cultures, and the threat of conflict. This inquiry into the human rights dimensions of climate change looks beyond potential impacts to examine the questions raised by climate change policies: accountability for extraterritorial harms; constructing reliable enforcement mechanisms; assessing redistributive outcomes; and allocating burdens, benefits, rights and duties among perpetrators and victims, both public and private. The book examines a range of so-far unexplored theoretical and practical concerns that international law and other scholars and policy-framers will find increasingly difficult to ignore.

Human Rights and Technological Change Michael Homberg, Benjamin Möckel, 2022-05-25 Über das Spannungsverhältnis zwischen Menschenrechten und modernen Technologien für die Zeit seit dem Zweiten Weltkrieg. Werkzeug der Unterdrückung oder Vehikel der Emanzipation? Moderne Technologien sind zu einem wichtigen Thema der Menschenrechtspolitik geworden. Überwachungstechnik, militärische Drohnen und digitale Datenanalysen stellen die internationale Menschenrechtsbewegung vor neue Herausforderungen. Gleichzeitig eröffnen diese Techniken auch neue Chancen, Menschenrechtsverletzungen zu dokumentieren, anzuprangern und ein zivilgesellschaftliches Engagement zu fördern. In diesem Band wird diese ambivalente Beziehung in historischer Perspektive analysiert. Gezeigt wird, wie die Verbreitung moderner Technologien die Menschenrechtspolitik herausforderte und unterstützte. Hervorgehoben werden dabei vier Schlüsselbereiche: 1. Entwicklungspolitik, allen voran bei Infrastrukturen und technischen Großprojekten, 2. Bevölkerungspolitik und demographisches Wissen, 3. Medien- und Kommunikationstechnologien und 4. die gesellschaftlichen Auswirkungen der Computerisierung. Indem diese Debatten für die Zeit nach 1945 nachgezeichnet werden, erhalten aktuelle Diskussionen über die Herausforderungen neuer technologischer Entwicklungen eine historische Dimension. Der Band erscheint vollständig in englischer Sprache. ____ The volume analyses the ambivalent relationship between human rights and modern technologies since 1945. Tools of suppression or agents of emancipation? Modern technologies have become a major subject of human rights policy. Surveillance technology, the military use of drones, and the possibilities of Big Data analysis pose new challenges for the international human rights movement. At the same time, these techniques offer new ways to document and denounce violations of human rights and to promote mass mobilization. The volume analyses this ambivalent relationship between human rights and technological change in a historical perspective. Showing how the spread of modern technologies both challenged and served human rights policies, the volume focuses on four key areas of technological change: 1) development politics, infrastructures and large technical systems, 2) population politics and demographical knowledge, 3) media cultures and communication technologies, and 4) the societal impact of computerization. By sketching these debates since 1945, the volume adds a historical perspective to current debates about the political and ethical challenges of new technological developments. The volume is published entirely in English.

Human Rights, Self-Determination and Political Change in the Occupied Palestinian Territories Stephen Bowen,2021-09-27 How can international human rights standards - in the civil and political sphere and in respect of economic, social and cultural rights - provide clear guidance for political change? This collection offers the reader an exposition and critical analysis of the agreements between Israel and the Palestinian Liberation Organisation from the perspective of international human rights law. Covered topics include - the relevance and influence of international law on the peace-making process, - the strengths and weaknesses of the agreements and the extent to which they lay the foundation for the realization of Palestinian self-determination and the development of a democratic and civil society, - the status and obligations of both the State of Israel and the emerging Palestinian Authority in respect of the Occupied Territories, and - the continuing role of international actors and non-governmental organisations in promoting respect for human rights during a period of dramatic transition. The position of Palestinian women and the operation of international human rights standards as mechanisms for political change receive particular attention. Scholars concerned with the Middle East and anyone interested in the promotion and protection of human rights in post-conflict situations will appreciate this unique and challenging collection.
