Political Political Theory Jeremy Waldron,2016-03-07
Political theorists focus on the nature of justice, liberty, and
equality while ignoring the institutions through which these
ideals are achieved. Political scientists keep institutions in view
but deploy a meager set of value-conceptions in analyzing them. A
more political political theory is needed to address this gap,
Jeremy Waldron argues.

Tracking Color in Cinema and Art Edward
Branigan,2017-10-30 Color is one of cinema's most alluring
formal systems, building on a range of artistic traditions that
orchestrate visual cues to tell stories, stage ideas, and elicit
feelings. But what if color is not—or not only—a formal system,
but instead a linguistic effect, emerging from the slipstream of
our talk and embodiment in a world? This book develops a
compelling framework from which to understand the mobility of
color in art and mind, where color impressions are seen through,
and even governed by, patterns of ordinary language use,
schemata, memories, and narrative. Edward Branigan draws on
the work of Ludwig Wittgenstein and other philosophers who
struggle valiantly with problems of color aesthetics,
contemporary theories of film and narrative, and art-historical
models of analysis. Examples of a variety of media, from American
pop art to contemporary European cinema, illustrate a theory
based on a spectator's present-time tracking of temporal patterns
that are firmly entwined with language use and social
intelligence.

Decision-Making Tools in the Information-Intensive Age ,
Hormones and Economic Behavior** Pablo Brañas-
Garza,Levent Neyse,Martin Voracek,Ulrich Schmidt,Monica
Capra,2019-01-29 Behavioral correlates of hormones, emphasized

by psychologists, have captured the attention of economists in the past years. Behavioral economists, in particular, have investigated the possible roles of hormones on economic decision making and behavior as well as social preferences and cognitive abilities. Testosterone, oxytocin, dopamine, serotonin and stress hormones are the foremost studied ones in economic contexts. Yet, the results are mixed and the relationship between hormones and economic behavior is under-investigated to this date. Hormone levels are measurable and manipulatable (e.g. activate, de-activate, block). The fact that the behavioral economics also employs experimental methodology makes it possible to observe both correlational and causal relationships between hormones and economic behavior. Since numerous environmental, social and biological factors interact with hormone fluctuations, capturing the true impacts of hormones on decisions and behavior is challenging. Manipulating hormone levels in the body is a method that is used to tackle this issue. Such studies compare observed behaviors of hormones or placebo administrated participants to determine causal relationships. This Research Topic welcomes the studies on the direct or indirect correlates of hormones on economic behavior and decision making to create new insights on the economic consequences of endocrine activity.

Early English Performance: Medieval Plays and Robin Hood Games John Marshall,2019-10-08 Covering a period of nearly 40 years' work by the author this collection of essays in the Shifting Paradigms in Early English Drama Studies series brings the perspective of a Drama academic and practitioner of early English plays to the understanding of how medieval plays and Robin Hood games of the fifteenth and sixteenth centuries were performed. It explores why, where, when, and how the plays happened, who took part, and who were the audiences. The insights are informed by a combination of research and the public presentation of surviving texts. The research included in the volume unites the early English experiences of religious and secular performance. This recognition challenges the dominant

critical distinction of the past between the two and the consequent privileging of biblical and moral plays over secular entertainments. What further binds, rather than separates, the two is that the destination of funds raised by the different activities maintained the civic and parochial needs of the institutions upon which the people depended. This collection redefines the inclusive nature and common interests of the purposes that lay behind generically different undertakings. They shared an extraordinary investment of human and financial resources in the anticipation of a profit that was pious and practical. (CS1081).
