Assessing the People's Liberation Army in the Hu Jintao Era Roy Kamphausen, David Lai, Travis Tanner, 2014-06-14 It is my pleasure to introduce this 2013 publication by the Strategic Studies Institute (SSI) of the U.S. Army War College, the National Bureau of Asian Research (NBR), and the United States Pacific Command, focusing on A Retrospective of the People's Liberation Army in the Hu Jintao Era (2002-12). The papers in this book provide a valuable and insightful review of the People's Liberation Army's (PLA) many impressive advances over the past decade. Solid scholarship on changes taking place in the PLA helps us understand how the Chinese view the employment of military power to support broader policy aims. A historical review of patterns and developments in training, operations, acquisitions, and political military relations can greatly assist that understanding. The outstanding work in this jointly sponsored study is an important contribution toward this end. This volume provides unique insights into the PLA's achievements over the span of Hu Jintao's tenure...

Owning the Olympics Monroe Price, Daniel Dayan, 2008-02-22 A major contribution to the study of global events in times of global media. Owning the Olympics tests the possibilities and limits of the concept of 'media events' by analyzing the mega-event of the information age: the Beijing Olympics. . . . A good read from cover to cover. —Guobin Yang, Associate Professor, Asian/Middle Eastern Cultures & Sociology, Barnard College, Columbia University From the moment they were announced, the Beijing Games were a major media event and the focus of intense scrutiny and speculation. In contrast to earlier such events, however, the Beijing Games are also unfolding in a newly volatile global media environment that is no longer monopolized by broadcast media. The dramatic expansion of media outlets and the growth of mobile communications technology have changed the nature of media events, making it significantly more difficult to regulate them or control their meaning. This volatility is reflected in the multiple, well-publicized controversies characterizing the run-up to Beijing 2008. According to many Western commentators, the People's Republic of China seized the Olympics as an opportunity to reinvent itself as the New China---a global leader in economics, technology, and environmental issues, with an improving human-rights record. But China's maneuverings have also been hotly contested by diverse global voices, including prominent human-rights advocates, all seeking to displace the official story of the Games. Bringing together a distinguished group of scholars from Chinese studies, human rights, media studies, law, and other fields, *Owning the Olympics* reveals how multiple entities---including the Chinese Communist Party itself---seek to influence and control the narratives through which the Beijing Games will be understood. digitalculturebooks is an imprint of the University of Michigan Press and the Scholarly Publishing Office of the University of Michigan Library dedicated to publishing innovative and accessible work exploring new media and their impact on society, culture, and scholarly communication. Getting it Right Robert J. Barro, 1996 Since 1991, Robert Barro has been a lively contributor to the Wall Street Journal and other popular financial media. *Getting It Right* brings together, updates, and expands upon these writings that showcase Barro's agility in applying economic understanding to a wide array of social issues. Barro, a conservative who takes no prisoners, and a self-described libertarian, believes that most governments have gone much too far in their spending, taxation, and regulation. The dominant theme in these wide-ranging essays is the importance of institutions that ensure property rights and free markets. The discussion deals especially with the appropriate range of government: which areas represent useful public policy and which are unnecessary interference. The first section of the book considers these questions in the context of the determinants of long-run economic growth. In addition to basic economics, Barro assesses related political topics, such as the role of public institutions, the optimal size of countries, and the consequences of default on foreign debt. The second section deals with the proper role and form of monetary policy. Barro argues that government should provide markets with a stable nominal framework and then stay out of the way to best allow for price stability. Writings in the third section cover fiscal and other macroeconomic policies. Topics include the distorting influences of taxation, especially taxes on capital income; infrastructure investment and other government spending; and the consequences of public debt and budget deficits. In a final section, Barro looks at more micro issues such as cartels, tax amnesties, school choice, privatization, cigarette-smoking regulation, endangered species regulation, the market for baseball players, and term limits for politicians.

Falun Gong in the United States Noah Porter, 2003 Falun Gong, also known as Falun Dafa, has been described in many ways. It has been called qigong, one of many schools of physical exercises

that aim at improving health and developing supernatural abilities. Scholars and mainstream media have referred to it as a spiritual movement or religion, although practitioners claim it is not a religion. It has been called a cult, in the pejorative sense rather than in a sociological context, by the Chinese government and by some Western critics. In the writings of Li Hongzhi, the founder of Falun Gong, it is referred to in different ways, though primarily as a cultivation practice. The question of how to define Falun Gong is not just an academic issue; the use of the cult label has been used to justify the persecution of practitioners in China. To a limited degree, the Chinese Government is able to extend the persecution overseas. How society defines Falun Gong has implications for action on the level of policy, as well as the shaping of social, cultural, and personal attitudes. This research project addresses what Falun Gong is through ethnography. Research methods included participant-observation, semi-structured ethnographic interviews (both in-person and on-line), and content analysis of text and visual data from Falun Gong books, pamphlets, and websites. Research sites included Tampa, Washington D.C., and cyberspace. In order to keep my research relevant to the issues and concerns of the Falun Gong community, I was in regular contact with the Tampa practitioners, keeping them abreast of my progress and asking for their input. My findings are contrary to the allegations made by the Chinese Government and Western anti-cultists in many ways. Practitioners are not encouraged to rely on Western medicine, but are not prohibited from using it. Child practitioners are not put at risk. Their organizational structure is very loose. Finally, the Internet has played a vital role in Falun Gong's growth and continuation after the crackdown.

Public Finance in China Jiwei Lou, Shuilin Wang, 2008-01-31 Since 1980, China's economy has been the envy of the world. Its annual growth rate of more than 9 percent during this period makes China today the world's fourth-largest economy. And this sustained growth has reduced the poverty rate from 60 percent of the population to less than 10 percent. However, such rapid growth has also increased inequalities in income and access to basic services and stressed natural resources. The government seeks to resolve these and other issues by creating a 'harmonious society' -- shifting priorities from the overriding pursuit of growth to more balanced economic and social development. This volume compiles analyses and insights from high-level Chinese policy makers and prominent international scholars that address the changes needed in public finance for success in the government's new endeavor. It examines such key policy issues as public finance and the changing role of the state; fiscal reform and revenue and expenditure assignments; intergovernmental relations and fiscal transfers; and financing and delivery of basic public goods such as compulsory education, innovation, public health, and social protection. And it offers concrete recommendations for immediate policy changes and for China's future reform agenda. *Public Finance in China* is a must-read for specialists in public finance and for those seeking an understanding of the complex and daunting challenges China is facing.

Market Response Models Dominique M. Hanssens, Leonard J. Parsons, Randall L. Schultz, 2006-04-11 From 1976 to the beginning of the millennium—covering the quarter-century life span of this book and its predecessor—something remarkable has happened to market response research: it has become practice. Academics who teach in professional fields, like we do, dream of such things. Imagine the satisfaction of knowing that your work has been incorporated into the decision-making routine of brand managers, that category management relies on techniques you developed, that marketing management believes in something you struggled to establish in their minds. It's not just us that we are talking about. This pride must be shared by all of the researchers who pioneered the simple concept that the determinants of sales could be found if someone just looked for them. Of course, economists had always studied demand. But the project of extending demand analysis would fall to marketing researchers, now called marketing scientists for good reason, who saw that in reality the marketing mix was more than price; it was advertising, sales force effort, distribution, promotion, and every other decision variable that potentially affected sales. The bibliography of this book supports the notion that the academic research in marketing led the way. The journey was difficult, sometimes halting, but ultimately market response research advanced and then insinuated itself into the fabric of modern management.

Immigration, Diversity and Student Journeys to Higher Education Peter J. Guarnaccia, 2019 Immigration, Diversity and Student Journeys to Higher Education presents an in-depth understanding of how immigrant students at a major public research university balanced keeping their family cultures alive and learning U.S. culture to get to college. A revitalized anthropological understanding of acculturation provides the theoretical framework for the book. The text builds its analysis using extensive quotes from the 160 immigrant students who participated in the 21 focus groups that form the core of this study. The students' families come from Africa, Asia, the Caribbean, Europe and Latin America, and reflect a wide diversity of experiences and insights into how these students successfully pursued higher education. A key theme of the book is the immigrant bargain, where students repay their parents' hard work and migration sacrifices by excelling in school. A large majority of the parents made clear that a major motivation for immigrating was so their children could have better educational opportunities; these parents had the original dreams for their children. Immigration, Diversity and Student Journeys to Higher Education examines the similarities and differences across this diverse group of students, ending with a series of recommendations about how to improve acculturation research and how to facilitate immigrant students' journeys to educational success.

The Pursuit of Parenthood Margaret Marsh,Wanda Ronner,2019-08-06 A wide-ranging history of assisted reproductive technologies and their ethical implications. Finalist of the PROSE Award for Best Book in History of Science, Medicine and Technology by the Association of American Publishers Since the 1978 birth of the first IVF baby, Louise Brown, in England, more than eight million children have been born with the help of assisted reproductive technologies. From the start, they have stirred controversy and raised profound questions: Should there be limits to the lengths to which people can go to make their idea of family a reality? Who should pay for treatment? How can we ensure the ethical use of these technologies? And what can be done to address the racial and economic disparities in access to care that enable some to have children while others go without? In *The Pursuit of Parenthood*, historian Margaret Marsh and gynecologist Wanda Ronner seek to answer these challenging questions. Bringing their unique expertise in gender history and women's health to the subject, Marsh and Ronner examine the unprecedented means—liberating for some and deeply unsettling for others—by which families can now be created. Beginning with the early efforts to create embryos outside a woman's body and ending with such new developments as mitochondrial replacement techniques and uterus transplants, the authors assess the impact of contemporary reproductive technology in the United States. In this volume, we meet the scientists and physicians who have developed these technologies and the women and men who have used them. Along the way, the book dispels a number of fertility myths, offers policy recommendations that are intended to bring clarity and judgment to this complicated medical history, and reveals why the United States is still known as the Wild West of reproductive medicine.

The themes examined range from architectural and intellectual history to historic preservation and restoration. Taken together, they offer an overview of historical processes spanning two centuries of institutional practices, wherein the concept of cultural heritage was appropriated both by political regimes and for UNESCO World Heritage agendas.
