Channel Surfing Michael J. Parsons, 2005-03-01 Despite the proliferation of computer indicators, the professional trader recognizes that success in trading still depends on a person's ability to read, anticipate and react to market movement. But how do you define something that can change more often than the weather? The answer is to use the geometry of the market itself. Channel Surfing presents one of the most definitive methods for establishing the geometry of any market, enabling a person to exploit the bias between buyers and sellers. Price rarely moves in a straight line and so channels provide the ultimate momentum indicator, outperforming many of the most popular indicators in use today. The beauty of it is that it doesn't require you to suffer through large draw downs in order to realize a profit. In fact, it is so effective that it is probably the very best approach for beginning traders and those with very little capital. So just imagine what an experienced and well-funded trader can do with it! As you read this book you can expect to discover and learn: The basic concepts of Channel Surfing, presented in a way that is easy to understand and easy to apply. Why channels are a natural phenomenon and how to take full advantage of this. How to take the basic concepts of Channel Surfing and catapult it into an even more powerful method of trading using advanced techniques. Additional methods of reading the geometry of the market that add to your success. For both novice and professional traders alike Channel Surfing provides a solid foundation for understanding the language of the markets. It is an exceptionally powerful technique that has the ability to adapt to the personal trading style of the individual trader and dramatically improve their success.

Position Trading Alpha Bull Traders , 2019-08-12 Finally, an investing book which isn't an infomercial! When you are learning to trade, there are 2 types of books that you don't need. There are the dry-as-dust academic books that require a PhD in math to read. And then there are the books about a trader who turned \$5,000 into \$100 million, but with no details about how he did it... but he'll let you pay thousands of dollars to learn how. Here's the deal. Position trading is how men like Warren Buffett and Ray Dalio amassed a net worth of tens of billions of dollars. By trading a few times per year, rather than a few times per day. Which is why people who have followed their advice to the letter... Have literally made millions of dollars just from doing exactly as the advice suggests... No more and no less! And many of these people started off as small part-time traders like you and I. Over the years, the team at Alpha Bull Traders has continually refined a position trading strategy which has resulted in untold amounts of profit. Using a combination of western technical and fundamental analysis and ancient Japanese candlestick charting techniques - we are able to note which days you should... and more importantly which days you shouldn't be trading. Because here's the big "secret" which people don't want you to know... You only need to trade between 5-15 times a year to make huge profits in the stock market! In fact, some years have seen huge gains in our portfolio with as little as 3 trades. Here's just a fraction of what you'll learn inside: How to easily profit from the bear market with one simple fund. 95% of beginner investors and trader don't know about it, and yet you can easily net 10-12% a year in a bear market. The #1 thing new traders miss about aftermarket trading. Get this right and you'll have a huge advantage How to set a proper stop loss so you don't get stopped out prematurely. One of the biggest mistakes new traders make is having a stop loss which is too tight. Do this instead and you'll profit when the market moves in your favor. The "zen trader" strategy which makes you immune to losses (which although rare, will occur with any trading plan) A useful, yet barely known website which breaks company news faster than relying on mainstream news services. How to use the "other 80/20 rule" to profit from short term price movements. 3 profit securing lessons to learn from the DOTCOM bubble How to beat the market without spending hours each day monitoring stocks. Why a new trader should never trade cryptocurrency, and what to trade instead How one trader made \$1.4 million in a single day with 1 options trade, and why you shouldn't try to replicate their strategy Money management for absolute beginners How to profit from legal marijuana (all the upside of cannabis growing companies but without the red tape and volatility) ...and much, much more. You may have experienced various obnoxious and even misleading advertisements of easy, get rich trading strategies. This is not one of those. You won't have to spend thousands on expensive trading software or "magic bullet systems" In fact, you can get started using an online trading account and use free websites for your information (you'll find the best two in Chapter 7) You will build up both your skills and confidence, with practical "how-to" approaches. All written in plain, easy to understand English. So if you want to make money in your spare time, and have fun while doing it... scroll up and click "add to cart"

Don Miller conveys the essence of trading in such a compelling and down-to-earth manner—the reader literally eats, sleeps, and breathes Don's moments of triumph and exhaustion. Don clearly nails the most pertinent points in this business: add to your position when you have a strong hand, fight to dig yourself out of the inevitable abyss, and don't trade when you are tired. My career as a broker with some of the largest futures brokerages in the world has put me in a unique position to evaluate traders. I've been able to observe many of the best futures traders in the industry over the past twenty years.
