Curveball Bob Drogin, 2007-10-30 "A crucial study in the political manipulation of intelligence, understanding how Curveball got us into Iraq will arm us for the next round of lies coming out of Washington."—Robert Baer, author of See No Evil: The True Story of a Ground Soldier in the CIA's War on Terrorism Curveball answers the crucial question of the Iraq war: How and why was America's intelligence so catastrophically wrong? In this dramatic and explosive book, award-winning Los Angeles Times reporter Bob Drogin delivers a narrative that takes us to Europe, the Middle East, and deep inside the CIA to find the truth—the truth about the lies and self-deception that led us into a military and political nightmare. Praise for Curveball "Just when you thought the WMD debacle couldn't get worse, here comes veteran Los Angeles Times national-security correspondent Drogin's look at just who got the stories going in the first place. . . . Simultaneously sobering and infuriating—essential reading for those who follow the headlines."—Kirkus Reviews "In this engrossing account, Los Angeles Times correspondent Drogin paints an intimate and revealing portrait of the workings and dysfunctions of the intelligence community."—Publishers Weekly "An insightful and compelling account of one crucial component of the war's origins . . . Had Drogin merely pieced together Curveball's story, it alone would have made for a thrilling book. But he provides something more: a frightening glimpse at how easily we could make the same mistakes again. . . . The real value of Drogin's book is its meticulous demonstration that bureaucratic imperative often leads to self-delusion."—Washington Monthly "Drogin delivers a startling account of this fateful intelligence snafu."—Booklist "By the time you finish this book you will be shaking your head with wonder, or perhaps you will be shaking with anger, about the misadventures that preceded the misadventures in Iraq. This book is so powerful, it almost refutes its subtitle: The man called Curveball did not cause a war; he became a pretext—one among many."—George F. Will

Potato Peelings P J Hoge, 2012-03 Teased by his siblings for being a potato head, Andy Schroeder had been a good natured, optimistic young person. He was in college and deciding where to attend law school, when he received his draft papers. Soon, he was known as Spud by the guys in his unit in Vietnam. Even though he was the grenadier, he was of slight build. He was often called upon to be a tunnel rat, sent down dark, sabotaged, enemy tunnels to retrieve intelligence. By the time he was injured, the war had already taken a massive toll on Spud. He was no longer optimistic and doubted most of his previously held beliefs of life and God. He still loved his bride and his family, innocently believing that he could get home and go right back to the life he had left. Artillery fire changed all that. He did not return home as he had planned. Spud was an angry, bitter and frustrated person in a wheelchair. He doubted his beliefs, hated his situation and felt like a failure to everyone. He faced not only his visible wounds, but the ravages of the invisible ones. He tried not to be hateful, but not very successfully. After Vietnam, Spud felt his life was no more than a pile of useless potato peelings.

He tried to put them together to get his life back, but found it a monumental task. With the help of his family, faith and friends, he began to put them back together-- one peeling at a time.

Walk in My Combat Boots James Patterson, Matt Eversmann, 2021-02-08 Discover “the stories America needs to hear” (Admiral William H. McRaven, US Navy (Ret.)) with these moving and powerful recollections of war, told by the men and women who lived them. Walk in my Combat Boots is a powerful collection crafted from hundreds of original interviews by James Patterson, the world’s #1 bestselling writer, and First Sergeant US Army (Ret.) Matt Eversmann, part of the Ranger unit portrayed in the movie *Black Hawk Down*. These are the brutally honest stories usually only shared amongst comrades in arms. Here, in the voices of the men and women who’ve fought overseas from Vietnam to Iraq and Afghanistan, is a rare eye-opening look into what wearing the uniform, fighting in combat, losing friends and coming home is really like. Readers who next thank a military member for their service will finally have a true understanding of what that thanks is for.

Extreme Weather and The Financial Markets Lawrence J. Oxley, 2011-11-30 The positive effects of climate change on the market Record-setting snowfall, cyclones in Australia, chronic drought in Russia, and other dramatic weather events are getting increased attention from scientists and the general public. The effects of climate change present challenges to many sectors, but also present major investing opportunities in the stock, bond, and futures markets. *Extreme Weather and The Financial Markets* looks at climate change from an investor's standpoint. The climate change debate is somewhat irrelevant to those in the financial industry, since we already live with more than enough extreme climate events to impact the financial markets. To the extent that environmental scientists are correct and global climate change is real and getting worse, the more investment opportunities we have The book presents investment ideas that will work under today's global climate condition and will become even more lucrative if global climate change continues Written by Larry Oxley, an acclaimed author who has personally outperformed the index in the Basic Materials sectors (i.e. chemicals, metals, mining, and forest products) for each of the last five years—in both good and bad markets and throughout the global recession—in a portfolio of nearly \$2 billion Focusing on the investment opportunities during dramatic weather events, *Extreme Weather and The Financial Markets* offers advice on how to capitalize on global climate change.

Lawyers in Practice Leslie C. Levin, Lynn Mather, 2012-03-30 How do lawyers resolve ethical dilemmas in the everyday context of their practice? What are the issues that commonly arise, and how do lawyers determine the best ways to resolve them? Until recently, efforts to answer these questions have focused primarily on rules and legal doctrine rather than the real-life situations lawyers face in legal practice. The first book to present empirical research on ethical decision making in a variety of practice contexts, including corporate litigation, securities, immigration, and divorce law, *Lawyers in Practice* fills a substantial gap in the existing literature. Following an introduction emphasizing the increasing importance of understanding context in the legal profession, contributions focus on ethical dilemmas ranging from relatively narrow ethical issues to broader problems of professionalism, including the prosecutor's obligation to disclose evidence, the management of conflicts of interest, and loyalty to clients and the court. Each chapter details the resolution of a dilemma from the practitioner's point of view that is, in turn, set within a particular community of practice. Timely and practical, this book should be required reading for law students as well as students and scholars of law and society.

The Faber Report David Faber, Ken Kurson, 2002-05-22 These days, when CNBC's David Faber talks, Wall Street listens. Unlike the talking heads that populate the financial news channels, Faber is a down-and-dirty investigative reporter. For six years, on CNBC's popular Squawk Box and in his own segments, Faber has broken story after story. Each day over one million people tune in to hear his daily report. Those who know the score know that Faber is the one to listen to -- especially now that the market isn't doing as well as it used to. Now Faber has written the smartest, most innovative investment book to be published in years. Like Harvard Business School's famous case study method, each chapter is built around a story -- the story of how a stock was presented to the public. Then Faber extracts clear, easy-to-follow lessons and instructions on how readers can learn the stock's real story, just as he does everyday on CNBC. Readers learn not just how to pick the stocks they want to invest in, but how to avoid joining the penguins lining up for big losses. The *Faber Report* combines practical, down to earth investment advice with wild accounts of investor fraud, company misdeeds, and famous investors and banks that have led investors astray. A quantum leap beyond the usual investment books, *The Faber Report* is essential

reading for anyone who wants to profit-bulls or bears.

Women Behind the Wheel Nancy A. Nichols,2024-03-05 From the adolescent thrill of getting a driver's license to the dreaded commutes of adulthood, from vintage muscle cars to electric vehicles, this groundbreaking book reveals the outsized impact the car has had—and will continue to have—on the lives of women. Since their inception cars have defined American culture, but until quite recently car histories were largely written by and about men—with little attention given to the fascinating story of women and cars. In this engaging non-fiction narrative, Nancy A. Nichols, the daughter of a used car salesman, uses the cars her father sold and the ones her family drove to tell a larger story about how the car helped to define modern womanhood. From her sister's classic Mustang to her mother's Chevy Convertible to her own Honda minivan, Nichols tells a personal story in order to shed light on a universal one. Cars helped women secure the right to vote, changed the nature of romance, and influenced both fashion and child rearing customs. In the just over 100 years since their inception, cars have created possibilities for commerce and romance even as they exposed women to new kinds of danger. *Women Behind the Wheel* explores the uniquely gendered landscape of the automobile, detailing the many reasons why cars are both more expensive and more dangerous for women drivers. The automobile is on the cusp of momentous change. As we advance into the era of electric, connected, and autonomous vehicles, Nichols shows us why we should hit the brakes and look back in the rear-view mirror at this long and fascinating history. What is the role of the car in our lives? Should we be more skeptical of technology in our society? In *Women Behind the Wheel*, Nichols argues convincingly that only by understanding the many ways the car has changed us, can we hope to prepare ourselves for this brave new era.

Sabotage Kevin Moran,2011-05-06 When Stad meets Nikki he questions his role of professional saboteur and must decide what's right and wrong before more lives are put at risk, including his own.
