Peter Wells, Barry Hymer

Chess Tactics from Scratch Martin Weteschnik,2012
Introduces the game of chess, pieces and how they move, and classic strategies and tactics from each stage of the game.

Modern Ideas in Chess Richard Reti,2013-09 Modern Ideas in Chess is a series of 45 essays dealing with the evolution of game, its leading players, their ideas and contributions to their respective periods. The chronology starts in the Romantic era of Anders-sen and Morphy, continues through the Classical School of Steinitz, Tarrasch, Lasker, and runs to the dawn of the Hypermodern Revolution; the 70 year stretch from 1852 to 1922. Working in small chunks Rti had to be selective in what he extracted from each player and period. Plus the individual elements all had to tie in with the larger canvass Rti was painting for his readers. You dont have to get too far into the book to realize that Rti was a creative artist using the tension of chess ideas to reflect the larger intellectual struggle of mankind. How does Rti do it? A solid chess foundation obviously helps, also keen observation of the human experience coupled with a powerful command of language. Together these serve up indelible images that stick in the mind of the reader and lift this work far above the ordinary. Modern Ideas in Chess is one of the rare books that transcends the time frame in which it was written. It stands on its own, timeless, one of the true classics in the literature of the game.

Pawn Power in Chess Hans Kmoch,2013-04-09
Profoundly original book demonstrates how basic relationships of one or two pawns constitute winning strategy. Multitude of examples illustrate theory. 182 diagrams. Index of games.

Treasure Identifying Divine Eyes Guan

Shen,2020-06-21 Lin Xi, the pawnbroker who was about to lose his job, coincidentally obtained a pair of Heaven's Eyes from the jade pendant his master left behind. He wanted to see how Lin Xi would grow up, pick up treasures while growing up, and play the strings of fate. A pair of Heaven's Eyes could detect treasure, avoid disaster, and drive away evil. However, what secrets did it hide ...

Seeing with Different Eyes Patrick Curry,Angela Voss

,2009-05-05 Seeing with Different Eyes: Essays in Astrology and Divination represents the cutting-edge of contemporary thought and research on divination. The thirteen authors come from a variety of academic disciplines, ranging from anthropology and classics to English literature and religious studies, and all address the question of divination, astrology and oracles in a spirit of critical but sympathetic inquiry. The emphasis is on a participatory and reflexive approach which is firmly post-positivist, seeking to understand the divinatory act on its own terms within widely varying contexts - ancient Greek and Chaldean philosophy and theurgy, Theravadan Buddhism, Biblical studies, Elizabethan Hermeticism, Jacobean drama, Heideggerian philosophy, Medieval scholasticism, 19th century occultism, contemporary Guatemalan divination and Western medical practice. The authors are all teachers or researchers in the area of divination and symbolism, which is a new disciplinary focus

developing at the University of Kent, Canterbury under the aegis of the MA programme in the Cultural Study of Cosmology and Divination. The essays in this volume originally contributed to an international conference of the same name held there in April 2006.

WINNING CHESS Irving Chernev, Fred Reinfeld, 2015-02-14 In this instructional book for chess players looking to take their game to the next level, prolific and popular chess authors Irving Chernev and Fred Reinfeld share tips on how to perfect winning plays. Sharing their phenomenal knowledge of chess literature, Chernev and Reinfeld teach readers how the proper use of combination play is the secret to winning the game. *Winning Chess* not only tells you, but graphically and forcefully shows how to recognize the elements of winning tactical combinations and how to apply them to actual game positions. Each chapter of this guide constitutes a unique lesson in attacking play that can be applied directly to the game, putting readers well on the way to playing and winning chess.

The Psychology of Chess Skill Dennis H. Holding, 2021-10-07 Both chess play and psychological research offer rewards to their participants in the form of intellectual satisfaction. It seems to follow that combining these two forms of activity, by carrying out research into chess play, should be a particularly engaging enterprise. In the mid-1980s enough was now known for it to be feasible to tell a reasonably satisfying story by piecing together the accumulated results of experiments on chess. There were remaining gaps in knowledge, but the structure of chess skill had at least become sufficiently evident to exhibit where the gaps lay. Originally published in 1985, this book was an attempt to summarize the progress that had been made at the time, recounting some of the components of

the research process while describing how the chessplayer seems to think, imagine, and decide.

Back to Basics: Tactics Dan Heisman, 2011-02-02
Chess Tactics Can Be Fun! This book is an introduction to the various kinds of basic chess tactics. With instructional material, examples, and problems of all types, the subject of chess tactics is covered comprehensively. There are approximately 500 examples ranging from too easy to very difficult! Tactics are usually why most people find chess fun! This book will greatly enhance your enjoyment learning about - and benefiting from - the recurring patterns of tactics. It is well established that the study of basic tactics is probably the single most important thing any beginner can do to improve at chess. This book will help you do that!

Live Online Chess: Social Features & Downsides Jose Fadul, 2012-10-26 The book features social network analysis of the author's live rated online chess games with various players (including high and middle-strength computer software) from different time zones and cultures around the world. For most of them the social features and downsides of real-time online chess were investigated and documented, including social magnetism, gambling, anonymity and use of pseudonyms, nationalism, Lesbian-Gay-Bisexual-Transgender (LGBT) issues, Islamophobia, and social stratification and mobility. The accompanying game annotations and post-game discussions mainly dwell on responsible participation and civil discourse using live online chess games as medium. Online chess has become a test case for us as an international/trans-national group to think about how we can live in a socially-differentiated society, where its members subscribe to a plurality of forms of knowledge arising from considerably different environments, experiences and genetic makeup.

Advances in Usability, User Experience, Wearable and Assistive Technology Tareq Z. Ahram, Christianne S. Falcão, 2021-07-07

This book addresses emerging issues in usability, interface design, human-computer interaction, user experience and assistive technology. It highlights research aimed at understanding human interactions with products, services and systems and focuses on finding effective approaches for improving the user experience. It also discusses key issues in designing and providing assistive devices and services for individuals with disabilities or impairment, offering them support with mobility, communication, positioning, environmental control and daily living. The book covers modeling as well as innovative design concepts, with a special emphasis on user-centered design, and design for specific populations, particularly the elderly. Further topics include virtual reality, digital environments, gaming, heuristic evaluation and forms of device interface feedback (e.g. visual and haptic). Based on the AHFE 2021 Conferences on Usability and User Experience, Human Factors and Wearable Technologies, Human Factors in Virtual Environments and Game Design, and Human Factors and Assistive Technology, held virtually on 25-29 July, 2021, from USA, this book provides academics and professionals with an extensive source of information and a timely guide to tools, applications and future challenges in these fields.

Chess Improvement Peter Wells, Barry

Hymer, 2020-10-16 Written by Barry Hymer and Peter Wells, Chess Improvement: It's all in the mindset is an engaging and instructive guide that sets out how the application of growth mindset principles can accelerate chess improvement. With Tim Kett and insights from Michael Adams, David Howell, Harriet Hunt, Gawain Jones, Luke McShane, Matthew Sadler and Nigel Short. Foreword

by Henrik Carlsen, father of world champion Magnus Carlsen. Twenty-first-century knowledge about skills development and expertise requires us to keep such mystical notions as fixed 'talent' in perspective, and to emphasise instead the dynamic and malleable nature of these concepts. Nowhere is this more apparent than in chess, where many gifted players fall prey to plausible but self-defeating beliefs and practices - and thereby fail to achieve the levels their 'natural' abilities predicted. Happily, however, the reverse can be true too; through learned dispositions such as grit, risk-taking, strategic thinking and a capacity for sheer hard work, players of apparently modest abilities can achieve impressive results. Blending theory, practice and the distinct but complementary skills of two authors - one an academic (and amateur chess player) and the other a highly regarded England Chess Olympiad coach (and grandmaster) - Chess Improvement is an invaluable resource for any aspirational chess player or coach/parent of a chess player. Barry and Peter draw on interviews conducted with members of England's medal-winning elite squad of players and provide a template for chess improvement rooted in the practical wisdom of experienced chess players and coaches. They also include practical illustrative descriptions from the games and chess careers of both developing and leading players, and pull together themes and suggestions in a way which encourages readers to create their own trajectories for chess improvement.

Perception and Memory in Chess Adrianus

Dingeman de Groot, Fernand Gobet, R. W. Jongman, 1996

Bobby Fischer Teaches Chess Bobby Fischer, Stuart

Margulies, Don Mosenfelder, 1982-07-01 A one-of-a-kind masterclass in chess from the greatest player of all time.

Learn how to play chess the Bobby Fischer way with the fastest, most efficient, most enjoyable method ever devised. Whether you're just learning the game or looking for more complex strategies, these practice problems and exercises will help you master the art of the checkmate. This book teaches through a programmed learning method: It asks you a question. If you give the right answer, it goes on to the next question. If you give the wrong answer, it explains why the answer is wrong and asks you to go back and try again. Thanks to the book's unique formatting, you will work through the exercises on the right-hand side, with the correct answer hidden on the next page. The left-hand pages are intentionally printed upside-down; after reaching the last page, simply turn the book upside-down and work your way back. When you finish, not only will you be a much better chess player, you may even be able to beat Bobby Fischer at his own game!

Eye Tracking for STEM Education Research: New Perspectives Pascal Klein, Martin Rusek, Maike Schindler, 2024-04-04 A modern approach to improving education uses the components of experimental scientific research practices based on objective data, dissemination of results, and the use of modern technologies. STEM education research is maturing and new tools and analysis techniques become available. As one example, eye tracking, the recording of persons' eye movements, has been growing in popularity as it enables researchers to study learning materials' effectiveness, problem solving, and even students' approaches during experimentation. Eye movements, as captured using eye tracking, can reveal information about a student's attention and cognition on a process level, going well beyond classical product-based assessment techniques such as questionnaires or tests.

The Signal and the Noise Nate Silver, 2015-02-03 One

of the more momentous books of the decade. —The New York Times Book Review Nate Silver built an innovative system for predicting baseball performance, predicted the 2008 election within a hair's breadth, and became a national sensation as a blogger—all by the time he was thirty. He solidified his standing as the nation's foremost political forecaster with his near perfect prediction of the 2012 election. Silver is the founder and editor in chief of the website FiveThirtyEight. Drawing on his own groundbreaking work, Silver examines the world of prediction, investigating how we can distinguish a true signal from a universe of noisy data. Most predictions fail, often at great cost to society, because most of us have a poor understanding of probability and uncertainty. Both experts and laypeople mistake more confident predictions for more accurate ones. But overconfidence is often the reason for failure. If our appreciation of uncertainty improves, our predictions can get better too. This is the “prediction paradox”: The more humility we have about our ability to make predictions, the more successful we can be in planning for the future. In keeping with his own aim to seek truth from data, Silver visits the most successful forecasters in a range of areas, from hurricanes to baseball to global pandemics, from the poker table to the stock market, from Capitol Hill to the NBA. He explains and evaluates how these forecasters think and what bonds they share. What lies behind their success? Are they good—or just lucky? What patterns have they unraveled? And are their forecasts really right? He explores unanticipated commonalities and exposes unexpected juxtapositions. And sometimes, it is not so much how good a prediction is in an absolute sense that matters but how good it is relative to the competition. In other cases, prediction is still a very rudimentary—and dangerous—science. Silver observes that

the most accurate forecasters tend to have a superior command of probability, and they tend to be both humble and hardworking. They distinguish the predictable from the unpredictable, and they notice a thousand little details that lead them closer to the truth. Because of their appreciation of probability, they can distinguish the signal from the noise. With everything from the health of the global economy to our ability to fight terrorism dependent on the quality of our predictions, Nate Silver's insights are an essential read.

HCI in Games: Experience Design and Game Mechanics Xiaowen Fang, 2021-07-03 This two-volume set LNCS 12789 and 12790 constitutes the refereed proceedings of the Third International Conference on HCI in Games, HCI-Games 2021, held as part of the 23rd International Conference, HCI International 2021, which took place in July 2021. Due to COVID-19 pandemic the conference was held virtually. The total of 1276 papers and 241 posters included in the 39 HCII 2021 proceedings volumes was carefully reviewed and selected from 5222 submissions. The papers of HCI-Games 2021, Part I, are organized in topical sections named: Experience Design in Games; User Engagement and Game Impact; Game Mechanics.

With My Dog Eyes Hilda Hilst, 2014-04-29 Hilda Hilst (1930–2004) was one of the greatest Brazilian writers of the twentieth century, but her books have languished untranslated, in part because of their formally radical nature. This translation of *With My Dog-Eyes* brings a crucial work from her oeuvre into English for the first time. *With My Dog-Eyes* is an account of an unraveling—of sanity, of language . . . After experiencing a vision of what he calls “a clear-cut un hoped-for,” college professor Amós Keres struggles to reconcile himself with his life as a

father, a husband, and a member of the university with its "meetings, asskissers, pointless rivalries, gratuitous resentments, jealous talk, megalomanias." A stunning book by a master of the avant-garde.

Applications of AI, Machine Vision and Robotics K

L Boyer, L Stark, H Bunke, 1995-02-28 This text features a broad array of research efforts in computer vision including low level processing, perceptual organization, object recognition and active vision. The volume's nine papers specifically report on topics such as sensor confidence, low level feature extraction schemes, non-parametric multi-scale curve smoothing, integration of geometric and non-geometric attributes for object recognition, design criteria for a four degree-of-freedom robot head, a real-time vision system based on control of visual attention and a behavior-based active eye vision system. The scope of the book provides an excellent sample of current concepts, examples and applications from multiple areas of computer vision. Contents: Range Estimation from Camera Blur by Regularized Adaptive Identification (L F Holeva) Modeling Sensor Confidence for Sensor Integration Tasks (K Hughes & N Ranganathan) From 3-D Scattered Data to Geometric Signal Description: Invariant Stable Recovery of Straight Line Segments (P Hébert et al.) Feature Extraction and Matching as Signal Detection (X-P Hu & N Ahuja) Non-Parametric Multiscale Curve Smoothing (P L Rosin) Integration of Geometric and Non-Geometric Attributes for Fast Object Recognition (L Grewe & A Kak) A Four Degree-of-Freedom Robot Head for Active Vision (F-L Du & M Brady) Control of Eye and Arm Movements Using Active, Attentional Vision (P A Sandon) Behavior-Based Active Vision (C S Pinhanez) Readership: Computer scientists and engineers. keywords:
