What Money Can't Buy Michael J. Sandel, 2012-04-24 Should we pay children to read books or to get good grades? Should we allow corporations to pay for the right to pollute the atmosphere? Is it ethical to pay people to test risky new drugs or to donate their organs? What about hiring mercenaries to fight our wars? Auctioning admission to elite universities? Selling citizenship to immigrants willing to pay? In *What Money Can't Buy*, Michael J. Sandel takes on one of the biggest ethical questions of our time: Is there something wrong with a world in which everything is for sale? If so, how can we prevent market values from reaching into spheres of life where they don't belong? What are the moral limits of markets? In recent decades, market values have crowded out nonmarket norms in almost every aspect of life—medicine, education, government, law, art, sports, even family life and personal relations. Without quite realizing it, Sandel argues, we have drifted from having a market economy to being a market society. Is this where we want to be? In his New York Times bestseller *Justice*, Sandel showed himself to be a master at illuminating, with clarity and verve, the hard moral questions we confront in our everyday lives. Now, in *What Money Can't Buy*, he provokes an essential discussion that we, in our market-driven age, need to have: What is the proper role of markets in a democratic society—and how can we protect the moral and civic goods that markets don't honor and that money can't buy?

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807–c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Brands and Branding Rita Clifton, 2009-04-01 With contributions from leading brand experts around the world, this valuable resource delineates the case for brands (financial value, social value, etc.) and looks at what makes certain brands great. It covers best practices in branding and also looks at the future of brands in the age of globalization. Although the balance sheet may not even put a value on it, a company's brand or its portfolio of brands is its most valuable asset. For well-known companies it has been calculated that the brand can account for as much as 80 percent of their market value. This book argues that because of this and because of the power of not-for-profit brands like the Red Cross or Oxfam, all organisations should make the brand their central organising principle, guiding every decision and every action. As well as making the case for brands and examining the argument of the anti-globalisation movement that brands are bullies which do harm, this second edition of *Brands and Branding* provides an expert review of best practice in branding, covering everything from brand positioning to brand protection, visual and verbal identity and brand communications. Lastly, the third part of the book looks at trends in branding, branding in Asia, especially in China and India, brands in a digital world and the future for brands. Written by 19 experts in the field, *Brands and Branding* sets out to provide a better understanding of the role and importance of brands, as well as a wealth of insights into how one builds and sustains a successful brand.

Brands and Branding Stephen Brown, 2016-08-17 Lecturers/Instructors - Request a free digital inspection copy here A fun and humorous introductory book, written in Stephen Brown's entertaining and highly distinctive style, that introduces curious readers to the key components of brands and helps them to begin to make sense of them - what they are, what they do, why and how - using plenty of examples and references drawn from a wide range of brands such as Amazon, Apple, Google, Gucci, Nike, Nintendo, Starbucks, Swatch and The Worst Hotel in the World. With 3,000 branding books published each year, why would you (or your students) want to read *Brands & Branding*? Here are seven reasons why: It's introductory, aimed at undergraduate students or postgrads without a bachelor degree in business and assumes nothing more than readers' awareness of high profile brands such as Coca-Cola, Microsoft and Chanel. It's indicative, focusing on the basics and thus being a more reliable revision aid than *Lucozade*. It's immersive, taking readers on a journey and, working on the assumption that they have smartphones or tablet computers to hand, the print text links to images, articles and academic publications to give emphasis and context where appropriate. It's inclusive, considering articles and reports but also blogs, novels, newspapers, reviews, social media and other sources. It's irreverent - branding is not always a deadly serious business! It's intimate, Stephen speaks to you directly and together you will pick your way through the sometimes weird and unfailingly wonderful world of brands and branding using examples rather than abstract ideas to illustrate points. It's inspirational, celebrating the curious and successful stories of brands from Cillit Bang to Cacharel. Suitable for first and second year marketing or advertising students, and for those new to or interested in branding and who are keen to know more.

The Economic Approach to Human Behavior Gary S. Becker, 2013-02-06 Since his pioneering application of economic analysis to racial discrimination, Gary S. Becker has shown that an economic approach can provide a unified framework for understanding all human behavior. In a highly readable selection of essays Becker applies this approach to various aspects of human activity, including social interactions; crime and punishment; marriage, fertility, and the family; and irrational behavior. Becker's highly regarded work in economics is most notable in the imaginative application of 'the economic approach' to a surprising breadth of human activity. Becker's essays over the years have inevitably inspired a surge of research activity in testimony to the richness of his insights

into human activities lying 'outside' the traditionally conceived economic markets. Perhaps no economist in our time has contributed more to expanding the area of interest to economists than Becker, and a number of these thought-provoking essays are collected in this book.—Choice Gary Becker was awarded the Nobel Prize in Economic Science in 1992.

America's National Game Albert Goodwill Spalding,1911 This book is Albert Spalding's work of historic facts concerning the beginning, evolution, development and popularity of base ball, with personal reminiscences of its vicissitudes, its victories and its votaries. It is one of the defining books in the early formative years of modern baseball.

The Lean Belly Prescription Travis Stork,Peter Moore,2010-12-07 A co-host of The Doctors and the award-winning editor of Men's Health outline a scientifically based program for reducing abdominal fat, in a reference that shares guidelines for diet, exercise and everyday lifestyle practices.

Galactic Pot-healer Philip K. Dick,1994 What could an omnipresent and seemingly omnipotent entity want with a humble pot-healer? Or with the dozens of other odd creatures it has lured to Plowman's Planet? And if the Glimmung is a god, are its ends positive or malign? Combining quixotic adventure, spine-chilling horror, and deliriously paranoid theology, Galactic Pot-Healer is a uniquely Dickian voyage to alternate worlds of the imagination.

Objectives, Obstacles, and Tactics in Practice Hillary Haft Bucs,Valerie Clayman Pye,2019-11-27 Objectives, Obstacles, and Tactics in Practice is the first book that compiles practical approaches of the best practices from a range of practitioners on the subject of working with Stanislavski's objectives, obstacles, and tactics. The book offers instructors and directors a variety of tools from leading acting teachers, who bring their own individual perspectives to the challenge of working with Stanislavski's principles for today's actors, in one volume. Each essay addresses its own theoretical and practical approach and offers concrete instructions for implementing new explorations both in the classroom and in the rehearsal studio. An excellent resource for acting and directing instructors at the university level, directing and theatre pedagogy students, high school/secondary theatre teachers, and community theatre leaders, Objectives, Obstacles, and Tactics in Practice serves as a resource for lesson planning and exploration, and provides an encyclopedia of the best practices in the field today.

Python for Probability, Statistics, and Machine Learning José Unpingco,2019-06-29 This book, fully updated for Python version 3.6+, covers the key ideas that link probability, statistics, and machine learning illustrated using Python modules in these areas. All the figures and numerical results are reproducible using the Python codes

provided. The author develops key intuitions in machine learning by working meaningful examples using multiple analytical methods and Python codes, thereby connecting theoretical concepts to concrete implementations. Detailed proofs for certain important results are also provided. Modern Python modules like Pandas, Sympy, Scikit-learn, Tensorflow, and Keras are applied to simulate and visualize important machine learning concepts like the bias/variance trade-off, cross-validation, and regularization. Many abstract mathematical ideas, such as convergence in probability theory, are developed and illustrated with numerical examples. This updated edition now includes the Fisher Exact Test and the Mann-Whitney-Wilcoxon Test. A new section on survival analysis has been included as well as substantial development of Generalized Linear Models. The new deep learning section for image processing includes an in-depth discussion of gradient descent methods that underpin all deep learning algorithms. As with the prior edition, there are new and updated *Programming Tips* that illustrate effective Python modules and methods for scientific programming and machine learning. There are 445 run-able code blocks with corresponding outputs that have been tested for accuracy. Over 158 graphical visualizations (almost all generated using Python) illustrate the concepts that are developed both in code and in mathematics. We also discuss and use key Python modules such as Numpy, Scikit-learn, Sympy, Scipy, Lifelines, CvxPy, Theano, Matplotlib, Pandas, Tensorflow, Statsmodels, and Keras. This book is suitable for anyone with an undergraduate-level exposure to probability, statistics, or machine learning and with rudimentary knowledge of Python programming.

The Outlaw Trail Robert Redford,1978 A journey through time.

Radio Free Albemuth Philip K. Dick,1999 As America gasps in a stranglehold of a skull-crushing totalitarian regime, a supernatural intelligence speaks from the stars. Will the agents of omniscient Valis succeed in their mission of liberation? Or will the tactics of President Freemont extend the grip?

Cad Rick Marin,2004-02-18 The Los Angeles Times bestseller, now in paperback -- tales of the notorious New York dating scene, told from the other side of the bed. Rick Marin offers himself up for an in-depth look at man's superficial nature. At 28, a brief, doomed first marriage thrusts Marin back into Bachelor Hell. A journalist as eager to make it in Manhattan as with its female population, our emotionally myopic hero can never seem to tell if the woman in front of him is too crazy or too sane, until she gets too close. Falling out of love as often as he falls in, he vows more than once to clean up his act, only to relapse into another bender of beauties, blow-offs, and bad behavior -- all in desperate pursuit of the woman who can redeem him. In this rollicking, frequently insensitive and ultimately poignant memoir, Marin proves a master of the light touch even in his darkest hours. It is one man's story, but many men will read it as their own. And for any woman who has ever wondered, What was he thinking This is what he was thinking.
