*Partnership for the Americas: Western Hemisphere Strategy and U.S. Southern Command* James G. Stavridis,Radm James G Stavridis,2014-02-23 Since its creation in 1963, United States Southern Command has been led by 30 senior officers representing all four of the armed forces. None has undertaken his leadership responsibilities with the cultural sensitivity and creativity demonstrated by Admiral Jim Stavridis during his tenure in command. Breaking with tradition, Admiral Stavridis discarded the customary military model as he organized the Southern Command Headquarters. In its place he created an organization designed not to subdue adversaries, but instead to build durable and enduring partnerships with friends. His observation that it is the business of Southern Command to launch ideas not missiles into the command's area of responsibility gained strategic resonance throughout the Caribbean and Central and South America, and at the highest levels in Washington, DC.

MASH Otto F. Apel,Pat Apel,1998-08-27 When North Korean forces invaded South Korea on June 25, 1950, Otto Apel was a surgical resident living in Cleveland, Ohio, with his wife and three young children. A year later he was chief surgeon of the 8076th Mobile Army Surgical Hospital constantly near the front lines in Korea. Immediately upon arriving in camp, Apel performed 80 hours of surgery. His feet swelled so badly that he had to cut his boots off, and he saw more surgical cases in those three and a half days than he would have in a year back in Cleveland. There were also the lighter moments. When a Korean came to stay at the 8076th, word of her beauty spread so rapidly that they needed MPs just to direct traffic. Apel also recalls a North Korean aviator, nicknamed Bedcheck Charlie, who would drop a phony grenade from an open-cockpit biplane, a story later filmed for the television series. He also tells of the day the tent surrounding the women's shower was accidentally blown off by a passing helicopter. In addition to his own story, Apel details the operating conditions, workload, and patient care at the MASH units while revealing the remarkable advances made in emergency medical care. MASH units were the first hospitals designed for operations close to the front lines, and from this particularly difficult vantage, their medical staffs were responsible for innovations in the use of antibiotics and blood plasma and in arterial repair. On film and television, MASH doctors and nurses have been portrayed as irreverent and having little patience with standard military procedures. In this powerful memoir, Apel reveals just how realistic these portrayals were.

**The Last 100 Yards** Paul Berg,Army University Press,2019-05 The Last 100 Yards: The Crucible of Close Combat in Large-Scale Combat Operations presents thirteen historical case studies of close combat operations from World War I through Operation Iraqi Freedom. This volume is a collection from the unique and deliberate perspective of the last 100 yards of ground combat. In today's Army, there are few leaders who have experienced multi-domain large-scale ground combat against a near-peer or peer enemy first hand. This volume serves to augment military professionals' understanding of the realities of large-scale ground combat operations through the experiences of those who lived it.

**The Sound of the Sea: Seashells and the Fate of the Oceans** Cynthia Barnett,2021-07-06 A Science Friday Best Science Book of the Year A Kirkus Reviews Best Nonfiction Book of the Year A Library Journal Best Science and Technology Book of the Year A Tampa Bay Times Best Book of the Year A stunning history of seashells and the animals that make them that will have you marveling at nature...Barnett's account remarkably spirals out, appropriately, to become a much larger story about the sea, about global history and about environmental crises and preservation (John Williams, New York Times Book Review). Seashells have been the most coveted and collected of nature's creations since the dawn of humanity. They were money before coins, jewelry before gems, art before canvas. In The Sound of the Sea, acclaimed environmental author Cynthia Barnett blends cultural history and science to trace our long love affair with seashells and the hidden lives of the mollusks that make them. Spiraling out from the great cities of shell that once rose in North America to the warming waters of the Maldives and the slave castles of Ghana, Barnett has created an unforgettable history of our world through an examination of the unassuming seashell. She begins with their childhood wonder, unwinds surprising histories like the origin of Shell Oil as a family

business importing exotic shells, and charts what shells and the soft animals that build them are telling scientists about our warming, acidifying seas. From the eerie calls of early shell trumpets to the evolutionary miracle of spines and spires and the modern science of carbon capture inspired by shell, Barnett circles to her central point of listening to nature’s wisdom—and acting on what seashells have to say about taking care of each other and our world.
