**Tattoo** Makiko Kuwahara, 2020-08-20 In the 1830s, missionaries in French Polynesia sought to suppress the traditional art of tattooing, because they believed it to be a barbaric practice. More than 150 years later, tattooing is once again thriving in French Polynesia. This engrossing book documents the meaning of tattooing in contemporary French Polynesian society. As a permanent inscription, a tattoo makes a powerful statement about identity and culture. In this case, its resurgence is part of a vibrant cultural revival movement. Kuwahara examines the complex significance of the art, including its relationship to gender, youth culture, ethnicity and prison life. She also provides unique photographic evidence of the sophisticated techniques and varied forms that characterize French Polynesian tattooing today. Winner of The Japanese Society for Oceanic Studies Award 2005.

**Ink Art** Maxwell K. Hearn,2013 Featuring 70 works in various media--paintings, calligraphy, photographs, woodblock prints, video, and sculpture--that were created during the past three decades, **Ink Art: Past as Present in Contemporary China** will demonstrate how China's ancient pattern of seeking cultural renewal through the reinterpretation of past models remains a viable creative path. Although all of the artists have transformed their sources through new modes of expression, visitors will recognize thematic, aesthetic, or technical attributes in their creations that have meaningful links to China's artistic past. The exhibition will be organized thematically into four parts and will include such highlights as Xu Bing's dramatic *Book from the Sky* (ca. 1988), an installation that will fill an entire

gallery; Family Tree (2000), a set of vivid photographs documenting a performance by Zhang Huan in which his facial features--and his identity--are obscured gradually by physiognomic texts that are inscribed directly onto his face; and Map of China (2006) by Ai Weiwei, which is constructed entirely of wood salvaged from demolished Qing dynasty temples. --

**Visions of Dystopia in China's New Historical Novels** Jeffrey C. Kinkley, 2014-11-04 The depiction of personal and collective suffering in modern Chinese novels differs significantly from standard Communist accounts and most Eastern and Western historical narratives. Writers such as Yu Hua, Su Tong, Wang Anyi, Mo Yan, Han Shaogong, Ge Fei, Li Rui, and Zhang Wei scramble common conceptions of China's modern development, deploying avant-garde narrative techniques from Latin American and Euro-American modernism to project a surprisingly Un-Chinese dystopian vision and critical view of human culture and ethics. The epic narratives of modern Chinese fiction make rich use of magical realism, surrealism, and unusual treatments of historical time. Also featuring graphic

depictions of sex and violence and dark, raunchy comedy, these novels deeply reflect China's turbulent recent history, re-presenting the overthrow of the monarchy in the early twentieth century and the resulting chaos of revolution and war; the recurring miseries perpetrated by class warfare during the dictatorship of Mao Zedong; and the social dislocations caused by China's industrialization and rise as a global power. This book casts China's highbrow historical novels from the 1990s to the mid-2000s as a distinctively Chinese contribution to the form of the global dystopian novel and, consequently, to global thinking about the interrelations of utopia and dystopia.

**Harper's Textbook of Pediatric Dermatology** Peter H. Hoeger, Veronica Kinsler, Albert C.

Yan, Christine Bodemer, Margarita Larralde, David Luk, Vibhu Mendiratta, Diana Purvis, 2019-12-04 A consummate classic with a fresh approach to pediatric dermatology Children's skin is different. Maturation affects the epidermal barrier, the cutaneous microbiome, adnexal structures, vasculature, and transcutaneous absorption of drugs. The immature skin is more susceptible to pathogens and environmental disruption. Many genetic disorders are either present at birth or manifest early in childhood. Skin diseases thus present differently in children than in adults. Pediatric dermatology has seen significant advances over the last decade, particularly in the field of molecular genetics research, which has furthered our understanding of the pathogenesis of many skin diseases and the development of new approaches to treatment. This fourth edition of the Harper classic provides state-

of-the-art information on all aspects of skin disease in children. It covers the diagnosis and treatment of all conditions - both common and rare - with a consistently evidence-based approach. Existing content has been refreshed and fully updated to reflect emerging thinking and to incorporate the latest in research and clinical data - especially at the genetic level. This new fourth edition includes: Greater focus on the genetics behind skin disease, including new genes/genodermatoses, progress in genetic analysis, and stem cell transplants Increased coverage of lasers and other technologies used to treat skin disease More summary tables, learning points, tables of differential diagnosis, and clinical algorithms for diagnosis and management Additional online features, including patient information links and multiple choice questions Harper's Textbook of Pediatric Dermatology delivers crucial clinical insights and up-to-date research information that spans the breadth of the field. As the most comprehensive reference book on this subject available, this revised fourth edition will support and guide the daily practice of both dermatologists and pediatricians across the world.

**Downstage Upfront** John Smythe, 2004 In its first 40 years, from conception to maturity, through stages of growth both painful and pleasurable, Downstage - New Zealand's first and longest running regional professional theatre company - has lived an extraordinary life. This large and lavishly illustrated 'biography' is published to celebrate Downstage's birthday. It covers all the drama and larger-than-life personalities that have characterised Downstage's life, and the many great productions such as Colin McColl's internationally acclaimed relocation of Ibsen's Hedda Gabler to Karori. A major contribution to New Zealand's cultural history.
