Beginning Chinese Reader John DeFrancis, 1977 This second edition, like the earlier first edition, introduces some of the main varieties of Chinese as found before and after the establishment of the People's Republic of China in 1949. While continuing to stress the basic importance of the traditional usages, such as the regular characters to be found in all materials published before the adoption of the simplified forms in 1956 and still in use in some areas, the present revision goes further in contrasting variant usages and in providing additional material relevant to the PRC. Closely related with the author's Beginning Chinese and its companion volume, Character Text for Beginning Chinese, this text is based on a new approach which not only takes into account the advantages of the oral-aural method but gets the student more quickly into material that he is likely to encounter in actual written Chinese. Unique features are the emphasis on compounds and their extensive use in various types of exercises. The 1,200 combinations are based on 400 characters; in all, the book contains 120,000 characters of running text. All compounds appear in illustrative sentences accompnied by English translations, in dialogues as a means of audio-lingual reinforcement, and in narrative or expository form. Additional exercises include maps, booksellers' book lists, correspondence, poems, table of contents, and brief passages from the works of outstanding writers such as Sun Yatsen, Hu Shih, Mao Tse-tung, and Lu Hsun. Supplementary lessons present reading material using the simplified characters adopted in mainland China.

Representing Children in Chinese and U.S. Children's Literature Claudia Nelson, Rebecca Morris, 2016-04-08 Bringing together children's literature scholars from China and the United States, this collection provides an introduction to the scope and goals of a field characterized by active but also distinctive scholarship in two countries with very different rhetorical traditions. The volume's five sections highlight the differences between and overlapping concerns of Chinese and American scholars, as they examine children's literature with respect to cultural metaphors and motifs, historical movements, authorship, didacticism, important themes, and the current status of and future directions for literature and criticism. Wide-ranging and admirably ambitious in its encouragement of communication between scholars from two major nations, Representing Children in Chinese and U.S. Children's Literature serves as a model for examining how and why children's literature, more than many literary forms, circulates internationally.
