HSK 9 Classified Chinese Vocabulary Book DAVID YAO, This is the vocabulary list for New HSK 9! Is there any HSK 9? Yes, the initial Classification from 1992 to 2009. There are total 8000 vocabularies. New HSK (after 2009) which cut the vocabulary to 5000, just want to set a lower passing bar for students who take Chinese as second language or foreign language. There are around 100,000 vocabularies in comprehensive Chinese dictionary. The new HSK 5000 vocabularies only account for 5%, which is far from enough for students to continue their college in China taught in Chinese. For advance level oversea Chinese examinations like IB Chinese_A_Language_and_literature_HL, IB Chinese_A_Literature_HL, IB Chinese_B_HL, SAT Chinese, AP Chinese, Edexcel A LEVEL Chinese 9CN0-01,02,03 (OLD 6CN0), Edexcel AS Chinese 8CN0-01,02,03 (OLD 6CN0), CIE IGCSE First Language (0509), CIE IGCSE Second Language (0523), the vocabulary involved are far more than HSK 5000 vocabularies. Due to this, we continue to update our HSK 9 Vocabularies with the possible Best English Translation for your better understanding with our many years' experience in HSK and GCSE teaching since 2009! By referring oversea Chinese examinations and China Education Ministry official vocabulary list up to high school, similar to K12 in USA, we choose the highest level words (四级 (3569)) as an addition to our HSK 6 Vocabularies. We also add more sentences to illustrate how to apply certain vocabularies in context. All sentences are chosen from authority resources such as Oxford dictionary, Cambridge dictionary etc. Many students call it LIFE SAVING for their exam. The book give a quick revision for your coming exam! Grab it! Thanks for your support for us creating better contents for you! It takes our years' painful effort to edit and please respect our copy rights.

Chinese-English Mini Dictionary Taebum Kim, 2017-03-05 This book lists approximately 4,800 core Chinese words with English equivalents including standard American pronunciation. Main entries are in Pinyin (Romanized standard Chinese pronunciation) alphabetically with Chinese characters (both simplified and traditional if applicable). In the next line, parts of speech label ([n.] for nouns and [v.] for verbs) and the entry's English equivalents followed by standard American pronunciation with focus on stressed syllable* in bold print. A syllable is part of a word that contains one vowel sound. In every word of two or more syllables, one syllable is stressed. It's called 'stressed syllable'. The vowel sound in that syllable is louder, higher in pitch, and longer than the other vowel sounds in the same word. The contrast between stressed and unstressed syllables is very important because it helps to create the rhythm of English. The native English speakers rely more on stressed syllable to understand what you say than on the individual sounds of the word. This book is ideal for learners of English as a second language who want to communicate more effectively and also for learners of Chinese who know English. [Sample] chī [n.] red [red] chū cùn [n.] size [saiz] chī dào [n.] equator [ikweitər] chū lún (lún) [n.] gear [giər]* Please refer to website for more information. (www.corevoca.com)
