The Future of the Internet Jonathan Zittrain,2009-05-28 In *The Future of the Internet: And How to Stop It* Jonathan Zittrain explores the dangers the internet faces if it fails to balance ever more tightly controlled technologies with the flow of innovation that has generated so much progress in the field of technology. Zittrain argues that today's technological market is dominated by two contrasting business models: the generative and the non-generative. The generative models - the PCs, Windows and Macs of this world - allow third parties to build upon and share through them. The non-generative model is more restricted; appliances such as the xbox, iPod and tomtom might work well, but the only entity that can change the way they operate is the vendor. If we want the internet to survive we need to change. People must wake up to the risk or we could lose everything.

Metastasis of Colorectal Cancer Nicole Beauchemin,Jacques Huot,2010-07-23 Colorectal cancer is the third most common cancer worldwide, and in many parts of the western world, it is the second leading cause of cancer-related deaths. This book covers colon cancer metastasis from the most fundamental aspects to clinical practice. Major topics include physiopathology, genetic and epigenetic controls, cancer initiating cells, epithelial-mesenchymal transition, growth factors and signalling, cell adhesion, natures of liver metastasis, angiogenesis and lymphangiogenesis, inflammatory response, prognostic markers, sentinel node and staging, and finally diagnosis and treatment. Each chapter has been contributed by leaders in the field. A key feature is that it connects with a large readership including students, fundamentalists and clinicians. Another specific feature of the book is that the chapters are written in a didactic and illustrative fashion. These characteristics coupled with the choice of the topics and authors, makes this book a reference in the field. It represents an essential acquisition for medical libraries, clinicians as well as medical and graduate students.

Law in a Digital World M. Ethan Katsh,1995 The world of law is a world of information. Rules, judgments, decisions, interpretations, and agreements all involve using and communicating information. Today, we are experiencing a significant transition, from letters fixed on paper to information stored electronically. The digital era, where information is created, stored, and communicated electronically, is quickly approaching, if not already here. The future of law will no longer be found in impressive buildings and leather-bound books, but in small pieces of silicon, in streams of light, and in millions of miles of wires and cable. It will be a world of new relationships and greater possibilities for individual and group communication, an environment where the value of information increases as it is shared. In *Law in a Digital world*, M. Ethan Katsh explores how these new technologies will alter one of our most central institutions. He considers the different ways in which people will not only electronically read and write, but also interact with our vast storehouses of legal knowledge and information. He envisions how sounds and pictures will play into the largely

imageless print world of law, and looks at the future importance of graphic and nontextual communication. He explores how the flexible, personalized organization of data will transform the way we gather information, and whether information can or cannot be contained, raising questions of copyright and privacy. What happens to the law when information is more plentiful and accessible? What happens to those people who suddenly have access to information never before available? Does the use of information in a new form change the institution, the user, and those who come in contact with the user? And, what role does the lawyer play in all of this? For citizens, for lawyers, for all those who will be part of the digital world rushing toward us, Katsh answers these questions while considering the implications of this new era.

Political Terrorism Grant Wardlaw,1989-11-23 This work outlines the important considerations of policy that confront a democratic state in trying to combat terrorism and at the same time remain democratic. Part I of this book, provides the reader with a comprehensive introduction to the definition, history, theory, operation and effects of terrorism as an essential background to policy analysis. Part II analyses counter-terrorist policies. It begins by outlining basic policy choices and then looks at specific policy areas such as the role of intelligence agencies, the use of the armed forces, the development of anti-terrorist legislation and international treaties, and the issue of regulation of media reporting of terrorist incidents. Developments in the strategic dimension of terrorism are discussed in chapters on the importance of hostage takings to international terrorism and issues surrounding state involvement in international terrorism. In the preparation of this second edition, Grant Wardlaw has considerably expanded the second part of the book, focusing firmly upon the international policy consequences of prevalent developments within international terrorism.

Rule of Darkness Patrick Brantlinger, 2013-01-15 A major contribution to the cultural and literary history of the Victorian age, *Rule of Darkness* maps the complex relationship between Victorian literary forms, genres, and theories and imperialist, racist ideology. Critics and cultural historians have usually regarded the Empire as being of marginal importance to early and mid-Victorian writers. Patrick Brantlinger asserts that the Empire was central to British culture as a source of ideological and artistic energy, both supported by and lending support to widespread belief in racial superiority, the need to transform savagery into civilization, and the urgency of promoting emigration. *Rule of Darkness* brings together material from public records, memoirs, popular culture, and canonical literature. Brantlinger explores the influence of the novels of Captain Frederick Marryat, pioneer of British adolescent adventure fiction, and shows the importance of William Makepeace Thackeray's experience of India to his novels. He treats a number of Victorian best sellers previously ignored by literary historians, including the Anglo-Indian writer Philip Meadows Taylor's *Confessions of a Thug and Seeta*. Brantlinger situates explorers' narratives and travelogues by such famous author-adventurers as David Livingstone and Sir Richard Burton in relation to other forms of Victorian and Edwardian prose. Through readings of works by Arthur Conan Doyle, Joseph Conrad, H. Rider Haggard, Rudyard Kipling, John Hobson, and many others, he considers representations of Africa, India, and other non-British parts of the world in both fiction and nonfiction. The most comprehensive study yet of literature and imperialism in the early and mid-Victorian years, *Rule of Darkness* offers, in addition, a revisionary interpretation of imperialism as a significant factor in later British cultural history, from the 1880s to World War I. It is essential reading for anyone concerned with Victorian culture and society and, more generally, with the relationship between Victorian writers and imperialism, 'and between racist ideology and patterns of domination in modern history.'
