Real-Time C++ Christopher Kormanyos, 2018-05-02

With this book, Christopher Kormanyos delivers a highly practical guide to programming real-time embedded microcontroller systems in C++. It is divided into three parts plus several appendices. Part I provides a foundation for real-time C++ by covering language technologies, including object-oriented methods, template programming and optimization. Next, part II presents detailed descriptions of a variety of C++ components that are widely used in microcontroller programming. It details some of C++'s most powerful language elements, such as class types, templates and the STL, to develop components for microcontroller register access, low-level drivers, custom memory management, embedded containers, multitasking, etc. Finally, part III describes mathematical methods and generic utilities that can be employed to solve recurring problems in real-time C++. The appendices include a brief C++ language tutorial, information on the real-time C++ development environment and instructions for building GNU GCC cross-compilers and a microcontroller circuit. For this third edition, the most recent specification of C++17 in ISO/IEC 14882:2017 is used throughout the text. Several sections on new C++17 functionality have been added, and various others reworked to reflect changes in the standard. Also several new sample projects are introduced and existing ones extended, and various user suggestions have been incorporated. To facilitate portability, no libraries other than those

specified in the language standard itself are used. Efficiency is always in focus and numerous examples are backed up with real-time performance measurements and size analyses that quantify the true costs of the code down to the very last byte and microsecond. The target audience of this book mainly consists of students and professionals interested in real-time C++. Readers should be familiar with C or another programming language and will benefit most if they have had some previous experience with microcontroller electronics and the performance and size issues prevalent in embedded systems programming.

Practical Algorithms for 3D Computer Graphics, Second Edition R. Stuart Ferguson, 2013-12-19
Practical Algorithms for 3D Computer Graphics, Second Edition covers the fundamental algorithms that are the core of all 3D computer graphics software packages. Using Core OpenGL and OpenGL ES, the book enables you to create a complete suite of programs for 3D computer animation, modeling, and image synthesis. Reflecting these considerable developments, this second edition presents up-to-date algorithms for each stage in the creative process. It takes you from the construction of polygonal models of real and imaginary objects to rigid body animation and hierarchical character animation to the rendering pipeline for the synthesis of realistic images. New to the Second Edition New chapter on the

modern approach to real-time 3D programming using OpenGL New chapter that introduces 3D graphics for mobile devices New chapter on OpenFX, a comprehensive open source 3D tools suite for modeling and animation Discussions of new topics, such as particle modeling, marching cubes, and techniques for rendering hair and fur More web-only content, including source code for the algorithms, video transformations, comprehensive examples, and documentation for OpenFX The book is suitable for newcomers to graphics research and 3D computer games as well as more experienced software developers who wish to write plug-in modules for any 3D application program or shader code for a commercial games engine.

China's Media Go Global Daya Kishan Thussu, Hugo de Burgh, Anbin Shi, 2017-11-27 As part of its 'going out' strategy, China is using the media to promote its views and vision to the wider world and to counter negative images in the US-dominated international media. China's Media Go Global, the first edited collection on this subject, evaluates how the unprecedented expansion of Chinese media and communications is changing the global media landscape and the role of China within it. Each chapter examines a different dimension of Chinese media's globalization, from newspapers, radio, film and television, to social media and journalism. Topics include the rise of Chinese news networks, China Daily as an instrument of China's public diplomacy and the discussion around the growth of China's state media in Africa. Other chapters discuss entertainment television, financial media and the advertising market in

China. Together, this collection of essays offers a comprehensive evaluation of complex debates concerning the impact of China on the international media landscape, and makes a distinctive addition to Chinese media studies, as well as to broader global media discourses. Beyond its primary readership among academics and students, *China's Media Go Global* is aimed at the growing constituency of general readers, for whom the role of the media in globalization is of wider interest.

East Anglian, Or, Notes and Queries on Subjects Connected with the Counties of Suffolk, Cambridge, Essex and Norfolk Samuel Tymms, Charles Harold Evelyn White, 1904

Chinese Public Diplomacy Falk Hartig, 2015-08-27
This book presents the first comprehensive analysis of Confucius Institutes (CIs), situating them as a tool of public diplomacy in the broader context of China's foreign affairs. The study establishes the concept of public diplomacy as the theoretical framework for analysing CIs. By applying this frame to in-depth case studies of CIs in Europe and Oceania, it provides in-depth knowledge of the structure and organisation of CIs, their activities and audiences, as well as problems, challenges and potentials. In addition to examining CIs as the most prominent and most controversial tool of China's charm offensive, this book also explains what the structural configuration of these institutes can tell us about China's understanding of and approaches towards public diplomacy. The study demonstrates that, in contrast to their international

counterparts, CIs are normally organised as joint ventures between international and Chinese partners in the field of education or cultural exchange. From this unique setting a more fundamental observation can be made, namely China's willingness to engage and cooperate with foreigners in the context of public diplomacy. Overall, the author argues that by utilizing the current global fascination with Chinese language and culture, the Chinese government has found interested and willing international partners to co-finance the CIs and thus partially fund China's international charm offensive. This book will be of much interest to students of public diplomacy, Chinese politics, foreign policy and international relations in general.

The Rich Relation Julia S. H. Pardoe, 1863

Tree Shaker Bill Keller, 2013-12-24 The story of Nelson Mandela who challenged apartheid in South Africa and who went on to become the president of the country.

CEO, China Kerry Brown, 2016-04-30 China has become the powerhouse of the world economy, its incredible boom overseen by the elite members of the secretive and all-powerful communist party. But since the election of Xi Jinping as General Secretary, life at the top in China has changed. Under the guise of a corruption crackdown, which has seen his rivals imprisoned, Xi Jinping has been quietly building one of the most powerful leaderships modern China has ever seen. In **CEO China**, the noted China expert Kerry Brown reveals the hidden story of the rise of the man dubbed the 'Chinese Godfather'. Brown investigates his

relationship with his revolutionary father, who was expelled by Mao during the Cultural Revolution, his business dealings and allegiances in China's regional power struggles and his role in the internal battle raging between the old men of the Deng era and the new super-rich 'princelings'. Xi Jinping's China is powerful, aggressive and single-minded and this book will become a must-read for the Western world.

War, Media, and Propaganda Yahya R.

Kamalipour, Nancy Snow, 2004-09-14 This timely book presents a multifaceted look at war, media, and propaganda from international perspectives. Focusing on the media's role in global conflicts, prominent authors, journalists, scholars, and researchers provide an insightful overview of the impact of globalization on media practices. They examine the processes behind media coverage of war, sophisticated propaganda techniques, the dynamics of public opinion, and the effects on human affairs and communication. As the book moves through theoretical discussions to regional and national views, it explores cultural-political implications for the United States and other countries around the world, concluding with recommendations and solutions to key problems of media globalization.

Historic Waters and Historic Rights in the Law of the Sea Clive R. Symmons, 2019-03-27 This new edition discusses the important clarifications on historic maritime claims—particularly 'historic rights' (falling short of sovereignty); and the interaction of such rights with the Law of the Sea Convention resulting from the arbitral Award on

the Merits of 2016 in Philippines v. China, and examines what is now left of the former customary law doctrine.

Relational, Networked and Collaborative Approaches to Public Diplomacy R.S. Zaharna, Amelia Arsenault, Ali Fisher, 2014-02-05 Over the past decade, scholars, practitioners, and leading diplomats have forcefully argued for the need to move beyond one-way, mass-media-driven campaigns and develop more relational strategies. In the coming years, as the range of public diplomacy actors grows, the issues become more complexly intertwined, and the use of social media proliferates, the focus on relations will intensify along with the demands for more sophisticated strategies. These changes in the international arena call for a connective mindshift: a shift from information control and dominance to skilled relationship management. Leading international scholars and practitioners embark on a forward-looking exploration of creative conceptual frameworks, training methods, and case studies that advance relational, networking, and collaborative strategies in public diplomacy. Light on academic jargon and rich in analysis, this volume argues that while relationships have always been pivotal to the practice of public diplomacy, the relational dynamics are changing. Rather than focus on specific definitions, the contributors focus on the dynamic interplay of influence in the public diplomacy environment. That environment includes state and non-state actors, public and private partners, competitors and collaborators, new and

old media, and is conditioned by power, ethics, and cultures. This book is an essential resource to students and practitioners interested on how to build relationships and transform them into more elaborate network structures through public communication. It will challenge you to push the boundaries of what you think are the mechanisms, benefits, and potential issues raised by a relational approach to public diplomacy

Contest for the South China Sea Marwyn Samuels, 2013-11-05 First published in 1982. Wide-ranging and fully documented, this book is the first detailed study of the origins, contexts and consequences of the long-standing dispute between China, Taiwan, Vietnam and the Philippines over the Paracel and Spratly Archipelagos in the South China Sea - one of the world's most strategically important inter-ocean basins and China's southern maritime frontier. Samuels' analysis: * Highlights the impact of the shifting balance of power in Asia and the growing competition for oceanic resources * Examines the implications of the dispute in terms of the historical and modern role of china as a maritime power in Asia.

Security Flashpoints John Norton Moore, Myron H. Nordquist, 2023-09-20 *Security Flashpoints: Oil, Islands, Sea Access and Military Confrontation* covers a range of controversial issues rife with potential for provoking military confrontation in the world's salt water areas. Understanding the factual setting for flashpoints in the oceans requires an appreciation of the geographic circumstances of the disputants. This work starts with a global overview of island disputes provided by two leading geographers. They examine the pivotal relationship between sovereignty claims to

islands and delimitation of ocean boundaries throughout the world. The most serious and complicated series of island disputes exists in the South China Sea where multiple national claims are asserted to sovereignty over the Spratly and Paracel Islands. This work gives not only an update on the status of the informal negotiations over the past several years but also the most complete insider's account so far made available in print of the unresolved issues. A suggestion is made for a constructive step toward a peaceful solution by outlining a Spratly Resource Development Agency. Another area that is brought to the attention is Southeastern Europe: the Danube River, the Adriatic Sea, the Caspian and Black Seas with particular emphasis on navigation through the Dardanelles; a definitive analysis is given of the critical freedom of navigation issues in the Strait of Hormuz as well as a comprehensive commentary on the outstanding boundary delimitation controversies in the Persian Gulf. The island and delimitation disputes in East Asian seas are also extensively discussed. The book finishes with a concept of adding political power to the legal doctrine of 'critical date' in settling maritime boundary disputes. This work is of particular importance to lawyers involved in the seminal role that the Rule of Law plays for the peaceful resolution of ocean disputes. The work is based on a conference jointly sponsored by the Council on Foreign Relations, the Center for Oceans Law and Policy and the Center for National Security Law, University of Virginia School of Law.
