**Bravely** Maggie Stiefvater, Disney Book Group, 2022-05-03 What if you had one year to save everything you loved? ONE PRINCESS. Merida of DunBroch needs a change. She loves her family—jovial King Fergus, proper Queen Elinor, the mischievous triplets— and her peaceful kingdom. But she's frustrated by its sluggishness; each day, the same. Merida longs for adventure, purpose, challenge – maybe even, someday, love. TWO GODS. But the fiery Princess never expects her disquiet to manifest by way of Feradach, an uncanny supernatural being tasked with rooting out rot and stagnation, who appears in DunBroch on Christmas Eve with the intent to demolish the realm – and everyone within. Only the intervention of the Cailleach, an ancient entity of creation, gives Merida a shred of hope: convince her family to change within the year – or suffer the eternal consequences. THREE VOYAGES. Under the watchful eyes of the gods, Merida leads a series of epic journeys to kingdoms near and far in an attempt to inspire revolution within her family. But in her efforts to save those she loves from ruin, has Merida lost sight of the Clan member grown most stagnant of all – herself? FOUR SEASONS TO SAVE DUNBROCH – OR SEE IT DESTROYED, FOREVER.

**Sojourners and Settlers** Clarence E. Glick, 2017-04-30 Among the many groups of Chinese who migrated from their ancestral homeland in the nineteenth century, none found a more favorable situation than those who came to Hawaii. Coming from South China, largely as laborers for sugar plantations and Chinese rice plantations but also as independent merchants and craftsmen, they arrived at a time when the tiny Polynesian kingdom was being drawn into an international economic, political, and cultural world. Sojourners and Settlers traces the waves of Chinese immigration, the plantation experience, and movement into urban occupations. Important for the migrants were their close ties with indigenous Hawaiians, hundreds establishing families with Hawaiian wives. Other migrants brought Chinese wives to the islands. Though many early Chinese families lived in the section of Honolulu called Chinatown, this was never an exclusively Chinese place of residence, and under Hawaii's relatively open pattern of ethnic relations Chinese families rapidly became dispersed throughout Honolulu. Chinatown was, however, a nucleus for Chinese business, cultural, and organizational activities. More than two hundred organizations were formed by the migrants to provide mutual aid, to respond to discrimination under the monarchy and later under American laws, and to establish their status among other Chinese and Hawaii's multiethnic community. Professor Glick skillfully describes the organizational network in all its subtlety. He also examines the social apparatus of migrant existence: families, celebrations, newspapers, schools--in short, the way of life. Using a sociological framework, the author provides a fascinating account of the migrant settlers' transformation from villagers bound by

ancestral clan and tradition into participants in a mobile, largely Westernized social order.

Based on data collected from around the world, the Global Ocean Science Report 2020 offers a global record of how, where and by whom ocean science is conducted. It monitors our capacity to understand the ocean and seize new opportunities. More generally, the Report underlines the essential role of ocean research and international cooperation for all key issues of the 21st century.

*Facing the Heat Barrier* T. A. Heppenheimer,2006 Hypersonics is the study of flight at speeds where aerodynamic heating dominates the physics of the problem. Typically this is Mach 5 and higher. Hypersonics is an engineering science with close links to supersonics and engine design. Within this field, many of the most important results have been experimental. The principal facilities have been wind tunnels and related devices, which have produced flows with speeds up to orbital velocity. Why is it important? Hypersonics has had two major applications. The first has been to provide thermal protection during atmospheric entry. Success in this enterprise has supported ballistic-missile nose cones, has returned strategic reconnaissance photos from orbit and astronauts from the Moon, and has even dropped an instrument package into the atmosphere of Jupiter. The last of these approached Jupiter at four times the speed of a lunar mission returning to Earth. Work with re-entry has advanced rapidly because of its obvious importance. The second application has involved high-speed propulsion and has sought to develop the scramjet as an advanced airbreathing ramjet. Scramjets are built to run cool and thereby to achieve near-orbital speeds. They were important during the Strategic Defense Initiative, when a set of these engines was to power the experimental X-30 as a major new launch vehicle. This effort fell short, but the X-43A, carrying a scramjet, has recently flown at Mach 9.65 by using a rocket. Atmospheric entry today is fully mature as an engineering discipline. Still, the Jupiter experience shows that work with its applications continues to reach for new achievements. Studies of scramjets, by contrast, still seek full success, in which such engines can accelerate a vehicle without the use of rockets. Hence, there is much to do in this area as well. For instance, work with computers may soon show just how good scramjets can become. NASA SP-2007-4232

*Note-by-Note Cooking* Hervé This,2014-10-21 A renowned chemist and cooking pioneer breaks down the properties and

benefits of cooking with molecular gastronomy. 1-Octen-3-ol, which has a scent of wild mushrooms; limonene, a colorless liquid hydrocarbon that has the smell of citrus; sotolon, whose fragrance at high concentrations resembles curry and at low concentrations, maple syrup or sugar; tyrosine, an odorless but flavorful amino acid present in cheese—these and many other substances, some occurring in nature, some synthesized in the laboratory, make it possible to create novel tastes and flavors in the same way that elementary sound waves can be combined to create new sounds. Note-by-note cooking promises to add unadulterated nutritional value to dishes of all kinds, actually improving upon the health benefits of so-called natural foods. Cooking with molecular compounds will be far more energy efficient and environmentally sustainable than traditional techniques of cooking. This new way of thinking about food heralds a phase of culinary evolution on which the long-term survival of a growing human population depends. Hervé This clearly explains the properties of naturally occurring and synthesized compounds, dispels a host of misconceptions about the place of chemistry in cooking, and shows why note-by-note cooking is an obvious—and inevitable—extension of his earlier pioneering work in molecular gastronomy. Includes an appendix with representative selection of recipes, vividly illustrated in color. “Taking kitchen science to a whole new (molecular) level, Hervé This is changing the way France—and the world—cooks.”—Gourmet “[This] explores the science behind shape, consistency, odor, and color, giving readers the knowledge to create their own magnum opus in the kitchen.”—Discover

**Trolls** Brian Froud, Wendy Froud, 2012-10-01 The internationally acclaimed artists & authors are your personal guides to the enchanted world of Trolls in this book of troll tales and culture. Not since Brian Froud's conceptual design work with Jim Henson on the classic films *The Dark Crystal* and *Labyrinth* has he created a faerie world with such imagination, dimension, depth, and detail. *Trolls* opens a new realm in the celebrated faerie worlds of famed artists Brian and Wendy Froud, renowned for their vast and personal knowledge of faeries, goblins, and other folk. Through their art, sculptures, and stories, the Frouds take you on a wondrous adventure into the world of trolls. *Trolls* live through the telling of tales and the passing on of stories, weaving them together, then letting them flow separately again, as streams, rivers, tree roots, and branches do. Stories, as they are collected, are tied to a troll's tail: “A tale for the asking, the giving, the keeping.” *Trolls* includes stories of stone and bone, wood and feather, along with tale fragments, snippets of stories to be told in full down the road or ones that have been lost and are to be remembered again. Interspersed among the stories are troll customs, philosophies, and practices: How many kinds of trolls are there? Where do they live, and what do they like to eat? Why do some trolls father together while others seek solitude? Troll lore is interwoven with a vast treasure of artifacts and symbols of their world, from the wind knot to the Petrified Parsnip Poetry Pen, from the witch's cursing bundle to the elusive Earthling Gift. Your journey through *Trolls* will reveal many mysteries, wonder, and enchantments, and there are no better guides for your adventure than Brian and Wendy Froud.
