Apollo Mission Control Manfred "Dutch" von Ehrenfried,2018-06-21 This book describes the history of this now iconic room which represents America's space program during the Gemini, Apollo, Skylab, Apollo-Soyuz and early Space Shuttle eras. It is now a National Historic Landmark and is being restored to a level which represents the day the flight control teams walked out after the last lunar landing missions. The book is dedicated to the estimated 3,000 men and women who supported the flights and tells the story from their perspective. It describes the rooms of people supporting this control center; those rooms of engineers, analysts and scientists most people never knew about. Some called it a "shrine" and some called it a "cathedral." Now it will be restored to its former glory and soon thousands will be able to view the place where America flew to the moon.

UNDERDOG THINKING: A Bold Idea, a Business Adventure and 101 Lessons Learned Along the Way Atul Vir, Underdog Thinking is real-life business adventure story that follows the journey of an Indian Immigrant to the U.S. who was told he "didn't know a damn thing about American business." But as opportunity would have it, a short time later he found himself an accidental entrepreneur with a front row ticket to the ins and outs of launching and growing a business. He was flying high on his growing success—until a fateful moment when everything changed. As businesses rise and fall to the tune of supply and demand, sometimes the harshest betrayals come out of nowhere, when you least expect it—as do the surprising sparks of hope. When an unforeseen circumstance initiates a chain of events that leave him at a crossroads he must make the tough call: to give in and give up, or push through and win. CEO, business ethics thought leader, speaker and author Atul Vir has lived that story. And even in the darkest moments when failure seemed most imminent, he drew on the work ethic instilled from his earliest days, and his commitment to do right by his customers—to bring his dream up from the ashes and back to life. In his new book, Underdog Thinking, Vir inspires readers to face any challenge that comes their way—with practical business lessons for every step of the journey gleaned from his experience as both an immigrant building a business and as CEO of Equator Appliances for more than 25 years. The book dives into current themes dominating the business landscape, including: global business, overcoming failure, bootstrapping, securing financing, immigration and what innovation truly means. While many people offer sage advice on these topics, Vir's lessons are paired with a unique, captivating story and more than two decades of entrepreneurial expertise in an industry dominated by much bigger players—major multinational corporations.

Stalking the Riemann Hypothesis Dan Rockmore,2006-05-09 For 150 years the Riemann hypothesis has been the holy grail of mathematics. Now, at a moment when mathematicians are finally moving in on a proof, Dartmouth professor Dan Rockmore tells the riveting history of the hunt for a solution. In 1859 German professor Bernhard Riemann postulated a law capable of describing with an amazing degree of accuracy the occurrence of the prime numbers. Rockmore takes us all the way from Euclid to the mysteries of quantum chaos to show how the Riemann hypothesis lies at the very heart of some of the most cutting-edge research going on today in physics and mathematics.
