Piers Steel

The Procrastination Equation Piers Steel,2010-12-28 DON'T WAIT TO READ THIS BOOK: The world's leading expert on procrastination uses his groundbreaking research to offer understanding on a matter that bedevils us all. Writing with humour, humanity and solid scientific information reminiscent of *Stumbling on Happiness* and *Freakonomics*, Piers Steel explains why we knowingly and willingly put off a course of action despite recognizing we'll be worse off for it. For those who surf the Web instead of finishing overdue assignments, who always say diets start tomorrow, who stay up late watching TV to put off going to sleep, *The Procrastination Equation* explains why we do what we do—or in this case don't—and why in Western societies we're in the midst of an escalating procrastination epidemic. Dr. Piers Steel takes on the myths and misunderstandings behind procrastination and motivation. With accessible prose and the benefits of new scientific research, he provides insight into why we procrastinate even though the result is that we are less happy, healthy, and even wealthy. Who procrastinates and why? How many ways, big and small, do we procrastinate? How can we stop doing it? The reasons are part cultural, part psychological, part biological. And, with a million new ways to distract ourselves in the digitized world, more of us are potentially damaging ourselves by putting things off. But Steel not only analyzes the factors that weigh us down but the things that motivate us—including understanding the value of procrastination.

The Weakness of the Will Justin Gosling,2002-11 Why do people sometimes deliberately take the worst course of action? This book examines the theories of weak will put forward by Plato, Aristotle and the Stoics. It also argues for a new approach to the problem of irrationality.

E-Business Essentials Nick Bontis,2004-09-01 This special issue of QJEC marks the final instalment of the journal. The QJEC has had a long-standing history of international scholarship focused on the emerging field of electronic commerce with a broad, interdisciplinary approach.
