Information Architecture for the World Wide Web Louis Rosenfeld,Peter Morville,2002 Today's web sites and intranets are larger, more valuable, and more complex than ever before, and their users are busier and less forgiving. Designers, information architects, and web site managers are required to juggle vast amounts of information, frequent changes, new technologies, and corporate politics, making some web sites look like a fast-growing but poorly planned city -roads everywhere, but impossible to navigate. A well-planned information architecture has never been as essential as it is now. Information Architecture for the World Wide Web, Second Edition, shows how to use both aesthetics and mechanics to create distinctive, cohesive web sites that work. Most books on web development concentrate either on the graphics or on the

technical issues of a site. This book focuses on the framework that holds the two together. By applying the principles outlined in this completely updated classic, you'll build scalable and maintainable web sites that are easier to navigate and more appealing to your users. Using examples and case studies, *Information Architecture for the World Wide Web* will help you: Develop a strong, cohesive vision for your site that makes it both distinctive and usable; Organize your site's hierarchy in ways that are meaningful to its users and that minimize the need to re-engineer the site; Create navigation systems that allow users to move through the site without getting lost or frustrated; Accurately label your site's content; Organize your site in a way that supports both searching for specific items and casual browsing; Configure search systems so that users' queries actually retrieve meaningful results; Manage the process of developing an information architecture, from selling the concept to research and conceptual design to planning and production. The world will be a better place when web designers read this book. It's smart, funny, and artfully distills years of the authors' hard-won experience. *Information Architecture for the World Wide Web* tackles political/organizational challenges as well as content, structure, and user interface. This is not design-lite, but a deep treatment of fundamental issues of information presentation that advances the state of the art. It's light years ahead of the competition. -Bonnie Nardi, Co-author of *Information Ecologies- Using Technology with Heart*

Dreaming Red Linda Pace, Jan Jarboe Russell, Eleanor Heartney, Kathryn Kanjo, 2014-11-17 Since its founding in 1993 by the late Pace Foods heiress Linda Pace, Artpace has become one of the premiere foundations for contemporary art. An artist residency program based in San Antonio, Texas, Artpace's goal is to give artists time and space in which to imagine new ways to work. Each year, nine artists (three from Texas, three from other areas of the United States and three from abroad) are invited to the foundation to create new work. Selected by guest curators the likes of Robert Storr and Okwui Enwezor, the list of artists who have undertaken residencies at ArtPace is impressive, prescient and diverse, including Felix Gonzalez-Torres, Annette Messager, Tracey Moffatt, Xu Bing, Nancy Rubins, Cornelia Parker, Inigo Manglano-Ovalle, Glenn Ligon, Kendell Geers, Carolee Schneemann, Mona Hatoum, Isaac Julien, Arturo Herrera, and Christian Jankowski. Dreaming Red includes illustrations of all the works created at ArtPace since its inception, an essay by art historian Eleanor Heartney, short essays on selected artists by the guest curators, including Cuauhtémoc Medina, Lynne Cooke, Chrissie Iles and Judith Russi Kirshner, and a lengthy essay on the personal history of the foundation and its founder.

Dracula's Vault - A Collection of Vampiric Tales from the Pen of Bram Stoker Bram Stoker,2019-02-15

A chilling collection of classic gothic short stories written by Bram Stoker, all connected through the theme of vampires. “Gothic fiction” is a subgenre of Gothic horror that is defined by a combination of fiction writing with horror, death, and sometimes romance. It arguably originated from the 1764 novel “The Castle of Otranto” by English author Horace Walpole, which was subtitled “A Gothic Story” after the second edition. Abraham Bram Stoker (1847 – 1912) was an Irish author. He is best remembered for his 1897 Gothic novel “Dracula”, which introduced the world-famous character of Count Dracula and is responsible for various conventions of vampire fantasy that persist to this day. The tales include: 'Dracula', 'The Judge's House', 'The Burial of the Rats' and 'The Squaw'. Other notable works by this author include: “The Primrose Path” (1875), “The Snake's Pass” (1890), and “Seven Golden Buttons” (1891). This volume will appeal to lovers of Gothic literature and classic vampire literature. Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable, modern, high-quality edition complete with a specially-commissioned new biography of the author.

Redshift, Blueshift Jordan Silversmith, 2021-10 Winner of the Gival Press Novel Award When a prisoner in an unnamed labor camp finds his journal of memories taken from his cell, he sets out to console himself and perhaps find in his past a way to reclaim his freedom by again writing down what he can remember. As the prisoner writes and passes through the vivid world of a distant life, he is eventually confronted by a strange memory that, if true, questions the reliability of his memories and whether what he remembers was really his own life or, somehow, someone else's.
