This book is divided into three sections: the first includes technology for improvement of fermentation strains and many supporting technologies and information; the second examines novel technology useful for analysis of cell activities, analyzing gene function, and designing genomes of producer strains; and finally, a discussion of the practical application of the techniques and success case studies in many fields of bio-production, such as microbiological production, pharmaceuticals, chemicals, foods and cosmetics.

Obesity and Cardiovascular Disease Malcolm K Robinson,Abraham Thomas,2006-03-07 Although cardiovascular disease remains the leading proximate cause of death in the United States, it is now estimated that obesity may be equivalent to smoking as the leading cause of preventable death in America. In light of these statistics, this reference presents our current understanding of the epidemiology, pathology, and genetics of the obesity epidemic and its relationship to cardiovascular disease. It provides an evidence-based approach to the topic, as well as emphasizes a combined treatment strategy for patients suffering from both obesity and cardiovascular disease.

Fatty Acids and Cardiometabolic Health Jason Wu,Matti Marklund,2019-05-09 The impact of fat intake on hypercholesterolemia and related atherosclerotic cardiovascular diseases has been studied for decades. However, the current evidence base suggests that fatty acids also influences cardiometabolic diseases through other mechanisms including effects on glucose metabolism, body fat distribution, blood pressure, inflammation, and heart rate. Furthermore, studies evaluating single fatty acids have challenged the simplistic view of shared health effects within fatty acid groups categorized by degree of saturation. In addition, investigations of endogenous fatty acid metabolism, including genetic studies of fatty acid metabolizing enzymes, and the identification of novel metabolically derived fatty acids have further increased the complexity of fatty acids' health impacts. This Special Issue aims to include original research and up-to-date reviews on genetic and dietary modulation of fatty acids, and the role and function of dietary and metabolically derived fatty acids in cardiometabolic health.

Crystallization of Lipids Kiyotaka Sato,2018-04-23 An authoritative reference that contains the most up-to-date information knowledge, approaches, and applications of lipid crystals Crystallization of Lipids is a comprehensive resource that offers the most current and emerging knowledge, techniques and applications of lipid crystals. A Catalogue of Manuscripts Known to Contain Old English Dry-Point Glosses Dieter Studer-Joho,2017-11-27 While quill and ink were the writing implements of choice in the Anglo-Saxon scriptorium, other colouring and non-colouring writing implements were in active use, too. The stylus, among them, was used on an everyday basis both for taking notes in wax tablets and for several vital steps in the creation of manuscripts. Occasionally, the stylus or perhaps even small knives were used for writing short notes that were scratched in the parchment surface without ink. One particular type of such notes encountered in manuscripts are dry-point glosses, i.e. short explanatory remarks that provide a translation or a clue for a lexical or syntactic difficulty of the Latin text. The present study provides a comprehensive overview of the known corpus of dry-point glosses in Old English by cataloguing the 34 manuscripts that are currently known to contain such glosses. A first general descriptive analysis of the corpus of Old English dry-point glosses is provided and their difficult visual appearance is discussed with respect to the theoretical and practical implications for their future study.
