The Well-trained Mind Susan Wise Bauer, Jessie Wise, 2004 This book will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school. Two veteran home educators outline the classical pattern of education—the trivium—which organizes learning around the maturing capacity of the child's mind: the elementary school grammar stage, the middle school logic stage, and the high school rhetoric stage. Using the trivium as your model, you'll be able to instruct your child in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Newly revised and updated, *The Well-Trained Mind* includes detailed book lists with complete ordering information; up-to-date listings of resources, publications, and Internet links; and useful contacts.

School Culture Rewired Steve Gruenert, Todd Whitaker, 2013-10-23 Your school is a lot more than a center of student learning—it represents a self-contained culture with traditions and expectations that reflect its unique mission and demographics. In *School Culture Rewired*, education experts Steve Gruenert and Todd Whitaker offer strategies and advice for defining, assessing, and transforming your school's culture into one that is positive, productive, and actively working to enrich students' lives. Drawing from decades of research on organizational cultures and school leadership, the authors provide everything you need to optimize both the culture and climate of your school. In this revised and retooled second edition of their bestselling book, Gruenert and Whitaker * Explore the difference between school culture and school climate. * Show how to ensure developmentally appropriate culture change. * Contrast collaborative and toxic school cultures. * Address the symbiotic relationship between culture management and leadership. * Present a framework for pinpointing the type of culture you have, the type you want, and how to bridge the two. Though often invisible to the naked eye, a school's culture influences everything that takes place under its roof. Whether your school is urban or rural, proficient or struggling, *School Culture Rewired* helps you make sure its culture is guided by what's best for your students.

Making Summer Count Jennifer Sloan McCombs, Catherine H Augustine, Heather L Schwartz, 2011 Despite long-term and ongoing efforts to close the achievement gap between disadvantaged and advantaged students, low-income students continue to perform at considerably lower levels than their higher-income peers in reading and mathematics. Research has shown that students' skills and knowledge often deteriorate during the summer months, with low-income students facing the largest losses. Instruction during the summer has the potential to stop these losses and propel students toward higher achievement. A review of the literature on summer learning loss and summer learning programs, coupled with data from ongoing programs offered by districts and private providers across the United States, demonstrates the potential of summer programs to improve achievement as well as the challenges in creating and maintaining such programs. School districts and summer programming providers can benefit from the existing research and lessons learned by other programs in terms of developing strategies to maximize program effectiveness and quality, student participation, and strategic partnerships and funding. Recommendations for providers and policymakers address ways to mitigate barriers by capitalizing on a range of funding sources, engaging in long-term planning to ensure adequate attendance and hiring, and demonstrating positive student outcomes.

Diversities in Education David Mitchell, 2016-10-04 Diversities in Education is a challenging text that will help educators, teacher educators and trainee teachers to be more effective in teaching a range of diverse learners. It

covers five major categories of difference: sex and gender; social class and socio-economic status; race, ethnicity and culture; beliefs and religion; and different abilities and asks the urgent questions all policy-makers, educators and students should consider: Why should we value diversity and human rights? How can inclusive education accommodate diversity? How do society's aspirations for cohesion and harmony impact on people who are different? What meanings are given to differences, culturally and historically? Should educators seek to accentuate, eliminate, reduce or ignore differences? By drawing attention to the latest research into the most effective educational policies and practices, this insightful book suggests strategies for meeting the challenges being posed in an era of superdiversity. It's a crucial read for any training or practising educator who wants to address the issue of diversity, learn effective ways to reach all learners and create more inclusive and harmonious societies.

Noncognitive Skills in the Classroom Jeffrey A. Rosen, Elizabeth J. Glennie, Ben W. Dalton, Jean M. Lennon, Robert N. Bozick, 2010-09-27 This book provides an overview of recent research on the relationship between noncognitive attributes (motivation, self efficacy, resilience) and academic outcomes (such as grades or test scores). We focus primarily on how these sets of attributes are measured and how they relate to important academic outcomes. Noncognitive attributes are those academically and occupationally relevant skills and traits that are not “cognitive”—that is, not specifically intellectual or analytical in nature. We examine seven attributes in depth and critique the measurement approaches used by researchers and talk about how they can be improved.
