Howard Arkley

**Claustrophobia** Andrea Perry,2007-11 In this sensitive and insightful book, therapist and consultant Andrea Perry speaks honestly of her own experiences, as well as drawing on the views of others whose claustrophobic feelings have affected their lives. She paints a powerful picture of the challenge of dealing with claustrophobia on a daily basis, looking at how people manage, whether it is possible to overcome the anxiety, and what others can do to help friends, family and colleagues to cope. She even manages to find the humour in what can be a truly frightening experience, and controversially, presents claustrophobia not simply as an irrational response, but as a deeply human rejection of being electronically controlled in the confined spaces of an increasingly technological world. She also claims that many businesses are losing customers through not understanding people's fear of confined spaces ...

**How I Overcame My Claustrophobia - a True Story of Experience** Gabriel Raya,2023-05-10 As an engineer and scientist, I experienced a massive worsening of my latent claustrophobia disorder at just over 34 years of age. I had - as far as I can remember - never had a friendly relationship with confined spaces and elevators since I was about 14 years old, but bus and train rides as well as tight disco rooms (from 18 on, of course) or confinement in stadiums, cinemas and theaters did not bother me. My claustrophobia was not particularly on my radar. If possible, I avoided sometimes an elevator when it was not very trustworthy. I became a father for the first time when I was just over 31 and by 34 I had started 2 companies and was employed by my second company. Starting around 34, I experienced a steady worsening of my panic attacks and the rate at which they worsened quickly made the situation unbearable. I began to worry with every potential trip not about the destination, or what I would be doing there, or anything like that, but what mode of transportation would I be taking. Will I be stuck in traffic, does it have a tunnel, will the train be full, does it have a gondola, etc.? The climax was so bad that standing in a car line outside a tunnel was unbearable and scary, and I left a crowded streetcar immediately when more passengers got on. The exciting thing was, I actually didn't know what exactly I was afraid of. It wasn't a fear that I would be left without oxygen and suffocate, or that I would be compressed. Rather, it was a diffuse fear of being crammed so tightly with other people and having no way to escape from that

situation. Actually, I was afraid of not being in control of the situation myself. I am writing this book 15 years after I first went to the anxiety disorder practice at my hometown university hospital. Of course, after the treatment I was not immediately cured as if nothing had happened and did not and never thought about claustrophobia again, but I learned to deal with the symptoms and to calm down and avoid the overreaction. My quality of life was already much higher after the treatment ended and a few months later it was almost at its peak. The only unpleasant situation was still flying. Today I can ride a crowded streetcar, ride an elevator, ride a train, stand in line at tunnels, ride through tunnels in traffic jams, and fly in an airplane without any problems. I even drove in Antwerp traffic jam through a tunnel below the Scheldt without any problems. My quality of life is different. I am free again. As a former severe sufferer of claustrophobia and panic attacks, I am eager to write a book about it to share my experiences and the way I learned to live without claustrophobia. I think it is an interesting and informative read for people who struggle with this phobia or want to learn more about it. This book includes both thorough research with books and articles from experts and almost the state of the science together. It also shows my personal experience with claustrophobia and the road to recovery. This book is meant to be a support for people in a similar situation as mine. I can now live a normal life again, fly, take train rides, ride buses and elevators. Something I was unable to do before my therapy and which had massively restricted my quality of life. This book serves as a companion with excerpts from the life of a sufferer. It is meant to serve as a prop to simply help people in the same situation. It might replace professional therapy in some cases, but certainly acts supportively or as a catalyst so that people in a similar situation have easy access and know what might be coming their way. In mild cases, however, it can also serve to help people get a handle on claustrophobia themselves.

**Claustrophobia** Tracy Ryan, 2014 *Claustrophobia* is the taut, compelling story of a young Perth wife who sets about to protect her husband by stalking his ex-lover, but unexpectedly falls into a passionate affair and a world of lies. In a novel that possesses the dark wit, psychological insight and narrative momentum of a Patricia Highsmith, Tracy Ryan captures the disturbing elements that sometimes lurk beneath the surface of a marriage. The realities of obsessive attachment and social isolation are explored through a deft and thought-provoking look at a complex personality and a plot that twists its page-turning way into our psyche.

**Panic Free** Tom Bunn, 2019-04-30 **HURRY, BUY THE BOOK AND TRANSFORM YOUR LIFE.** — Marla Friedman, PsyD, PC, board chairman, Badge of Life What if you could stop panic by tapping into a different part of your brain? After years of working to help sufferers of panic and anxiety, licensed therapist (and pilot) Tom Bunn discovered a highly effective solution that utilizes a part of the brain not affected by the stress hormones that bombard a person experiencing panic. This unconscious procedural memory can be programmed to control panic by preventing the release of stress hormones and activating the parasympathetic nervous system. This process, outlined in *Panic Free*, sounds complicated but is not, requiring just ten days and no drugs or doctors. Bunn includes specific instructions for dealing with common panic triggers, such as airplane travel, bridges, MRIs, and tunnels. Because panic is profoundly life-limiting, the program Bunn offers can be a real life-changer.

**Secrets to Beat Mri Claustrophobia** Jessie Lopez, 2020-06-04 In this book I describe in detail the procedures before, during and after your MRI exam. I placed pictures of every position in every angle for an open and closed MRI scanner. These pics are beautifully taken to show the comfort level of pursuing an MRI exam mostly in a open scanner. You will not be disappointed by this material because I put all my heart into it from the years of experience in helping patients with the claustrophobia blues.

**The Claustro-Agoraphobic Dilemma in Psychoanalysis** Susan Finkelstein,Heinz Weiss,2022-11-08 This collection addresses the theory of claustro-agoraphobic anxieties and schizoid phenomena. It provides psychoanalytic case studies of the transference and counter-transference dynamic inherent in these agonizing disorders. In *The Claustro-Agoraphobic Dilemma in Psychoanalysis: Fear of Madness*, Susan Finkelstein and Heinz Weiss gather both classic papers and new essays, presenting a timely assessment of claustro-agoraphobia as first developed by Henri Rey. This volume includes papers by Helene Deutsch, Bertram Lewin, Edoardo Weiss, Esther Bick, Donald Meltzer, Albert Mason, John Steiner, and Claudia Frank, as well as a chapter by Kristin White on working remotely with psychoanalytic patients during the Covid-19 pandemic. Applying a Freudian,

Kleinian, and Bionian methodology, this collection argues for a long-term approach to psychoanalytic treatment in order to help claustro-agoraphobic patients work through the unconscious conflicts that interfere with their capacity to engage in a committed relationship. This book is essential reading for psychoanalysts in practice and training and will appeal to academics and historians interested in the universality of spiritual and mythic motifs.
