The Acid Watcher Diet Jonathan Aviv, MD, FACS,2017-01-24 Dr. Aviv guides readers through healthy dietary choices with targeted recipes, helping them balance their bodies and minds for optimal health and break acid-generating habits for good. Do you suffer from abdominal bloating; a chronic, nagging cough or sore throat; postnasal drip; a feeling of a lump in the back of your throat; allergies; or shortness of breath? If so, odds are that you are experiencing acid reflux without recognizing its silent symptoms, which can lead to serious long-term health problems, including esophageal cancer. In The Acid Watcher Diet, Dr. Jonathan Aviv, a leading authority on the diagnosis and treatment of acid reflux disease, helps readers identify those often misunderstood symptoms while providing a proven solution for reducing whole-body acid damage quickly and easily. His 28-day program is part of a two-phase eating plan, with a healthy balance of both macronutrients (proteins, carbs, and fats) and micronutrients (vitamins, minerals, antioxidants), that works to immediately neutralize acid and relieve the inflammation at the root of acid reflux.

Metaheuristics El-Ghazali Talbi,2009-05-27 A unified view of metaheuristics This book provides

a complete background on metaheuristics and shows readers how to design and implement efficient algorithms to solve complex optimization problems across a diverse range of applications, from networking and bioinformatics to engineering design, routing, and scheduling. It presents the main design questions for all families of metaheuristics and clearly illustrates how to implement the algorithms under a software framework to reuse both the design and code. Throughout the book, the key search components of metaheuristics are considered as a toolbox for: Designing efficient metaheuristics (e.g. local search, tabu search, simulated annealing, evolutionary algorithms, particle swarm optimization, scatter search, ant colonies, bee colonies, artificial immune systems) for optimization problems Designing efficient metaheuristics for multi-objective optimization problems Designing hybrid, parallel, and distributed metaheuristics Implementing metaheuristics on sequential and parallel machines Using many case studies and treating design and implementation independently, this book gives readers the skills necessary to solve large-scale optimization problems quickly and efficiently. It is a valuable reference for practicing engineers and researchers from diverse areas dealing with optimization or machine learning; and graduate students in computer science, operations research, control, engineering, business and management, and applied mathematics.

Disease Control Priorities, Third Edition (Volume 9) Dean T. Jamison, Hellen Gelband, Susan Horton, Prabhat Jha, Charles N. Mock, Rachel Nugent, 2017-12-06 As the culminating volume in the DCP3 series, volume 9 will provide an overview of DCP3 findings and methods, a summary of messages and substantive lessons to be taken from DCP3, and a further discussion of cross-cutting and synthesizing topics across the first eight volumes. The introductory chapters (1-3) in this volume take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and

intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a highest-priority essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC.

Crime, Shame and Reintegration John Braithwaite,1999 Crime, Shame and Reintegration is a contribution to general criminological theory. Its approach is as relevant to professional burglary as to

episodic delinquency or white collar crime. Braithwaite argues that some societies have higher crime rates than others because of their different processes of shaming wrongdoing. Shaming can be counterproductive, making crime problems worse. But when shaming is done within a cultural context of respect for the offender, it can be an extraordinarily powerful, efficient and just form of social control. Braithwaite identifies the social conditions for such successful shaming. If his theory is right, radically different criminal justice policies are needed - a shift away from punitive social control toward greater emphasis on moralizing social control. This book will be of interest not only to criminologists and sociologists, but to those in law, public administration and politics who are concerned with social policy and social issues.
