Chinese for Specific and Professional Purposes Hongyin Tao,Howard Hao-Jan Chen,2019-08-20 This book, likely the first of its kind in the English language, explores Chinese for specific and professional purposes (CSP) in terms of theorizing and developing practical applications for language teaching and learning. While research in language for specific purposes is thriving for languages such as English, there has been comparatively little such research conducted for Chinese. This volume attempts to fill the gap by bringing together practitioners from a broad international scholarly community, who share common interests yet diverse orientations. Seventeen papers are included, and address four broad thematic categories: (1) academic Chinese, (2) business Chinese, (3) Chinese for medicine and health care, and (4) Chinese for other broadly defined services and industries (diplomacy, tourism, wine-tasting, etc.). Representing the state of the art in CSP research, the book offers an indispensable guide for anyone interested in theoretical and practical issues in this area of applied Chinese language studies.

Purcell & Elmslie David Gebhard,2006 Purcell and Elmslie: Prairie Progressives explores the work of two important members of the organic architecture movement, and celebrates their tremendously important contributions to American architecture and the Prairie School. Wishing to return to simplicity and honesty, Purcell and Elmslie created homes and buildings that were consistent with a democratic society-simple forms, the natural use of textural materials and decoration, and buildings that accommodated the nature of a site. As did Louis Sullivan and Frank Lloyd Wright, Purcell and Elmslie held the conviction that a building does not end with its simple structure, but reaches its final and logical culmination in the clothing-color, situation and natural environment, together with its decoration of glass, terra-cotta, and other textural materials. The firm of Purcell and Elmslie was tremendously successful in the sense that their small open-planned free-flowing houses could be shared by a great number of Americans of moderate means. Projects discussed in this book can be found throughout the Midwest, including Minnesota, Michigan, Iowa, North Dakota, Illinois, Wisconsin, and more. The time has come to recognize the work of these progressive architects of the Midwest. Purcell and Elmslie: Prairie Progressives includes: Comprehensive biographies of George Grant Elmslie and William Gray Purcell The Work of the Firm The Domestic and Non-Domestic Work of Purcell, Feick and Elmslie Work after the Firm Broke Up The Late Work of Purcell and Elmslie A Catalog of Major Projects

Creating Sustainable Careers in Student Affairs Margaret Sallee,2023-07-03 This book argues that the current structure of student affairs work is not sustainable, as it depends on the notion that employees are available to work non-stop without any outside responsibilities, that is, the Ideal Worker Norm. The field places inordinate burdens on staff to respond to the needs of students, often at the expense of their own families and well-being. Student affairs professionals can meet the needs of their students without being overworked. The problem, however, is that ideal worker norms pervade higher education and student affairs work, thus providing little incentive for institutions to change. The authors in this book use ideal worker norms in conjunction with other theories to interrogate the impact on student affairs staff across functional areas, institutional types, career stage, and identity groups. The book is divided into three sections; chapters in the first section of the book examine various facets of the structure of work in student affairs, including the impact of institutional type and different functional areas on employees' work-lives. Chapters in the second section examine the personal toll that working in student affairs can take, including emotional labor's impact on well-being. The final section of the book narrows the focus to explore how different identity groups, including mothers, fathers, and people of color, navigate work/life issues. Challenging ideal worker norms, all chapters offer implications for practice for both individuals and institutions.

A Guide to In-sessional English for Academic Purposes Neil Adam Tibbetts,Timothy Chapman,2023-05-02 A hands-on guide for practitioners, this book prepares instructors to teach in-sessional English for Academic Purposes (ISEAP) higher education courses. As university cohorts become more diverse, there is demand for in-sessional EAP courses not only to support international students, but also increasingly as a provision for all students. This informative resource explores the varying formats of ISEAP courses and how they are embedded within and alongside students’ degree programmes in the United Kingdom and beyond. In accessible chapters, authors Neil Adam Tibbetts and Timothy Chapman present illuminating findings drawn from interviews conducted with experts in the field and highlight the challenges that students and practitioners face. Avoiding prescriptive recommendations, Tibbetts and Chapman address different models and contexts of ISEAP courses at the university level and offer guidance and tools for practice. Covering key topics such as pedagogies, logistical challenges, and the wider university context, this book not only provides a roadmap to the often ill-defined but essential domain of ISEAP but also provokes questions and ideas for further reflection, guiding the reader towards a deeper understanding of their role and development in context. Engaging and inviting, Tibbetts and Chapman’s helpful text is a necessary resource for teachers to design and lead successful ISEAP courses.
