A Brief History of Time Stephen Hawking,2011-05-04 #1 NEW YORK TIMES BESTSELLER A landmark volume in science writing by one of the great minds of our time, Stephen Hawking's book explores such profound questions as: How did the universe begin—and what made its start possible? Does time always flow forward? Is the universe unending—or are there boundaries? Are there other dimensions in space? What will happen when it all ends? Told in language we all can understand, A Brief History of Time plunges into the exotic realms of black holes and quarks, of antimatter and “arrows of time,” of the big bang and a bigger God—where the possibilities are wondrous and unexpected. With exciting images and profound imagination, Stephen Hawking brings us closer to the ultimate secrets at the very heart of creation.

Alpha Status Nathan Ikon Crumpton,2021-12-26 If capitalism were a person, who would it be? Where would it live? Who, how, and what would it love? Dive into the salacious world of hedge funds, high finance, and penthouse sex dungeons. This raucous tale of a wildly successful New York fund manager and his globetrotting adventures reflects the stark new reality of contemporary uber-wealth, and the capitalist system which created it. Become enraptured with - or repulsed by - the heinously opulent world of the anonymous protagonist and his class of modern billionaires. But challenging the protagonist's high-flying escapades in finance and sexual conquest is his twin brother, a maudlin comparative literature professor and single father. With a life defined by tragedy, the brother becomes the countervailing voice of reason and social tranquility. Filled with equal parts fictitious plotline and broadly researched non-fiction sources, this book offers pointed analysis of the 21st century socio-economic landscape, and begs critical questions about how capitalism can try to reconcile its avaricious nature with a world demanding a more equitable division of resources. Enlightening yet critical. Serious yet absurd. Fictitious yet factual. This non-fiction novel provides graphic and unapologetic scrutiny from both extremes of the contemporary socio-economic spectrum.

The First Farmers of Central Europe Penny Bickle,Alasdair Whittle,2013-07-09 From about 5500 cal BC to soon after 5000 cal BC, the lifeways of the first farmers of central Europe, the LBK culture (Linearbandkeramik), are seen in distinctive practices of longhouse use, settlement forms, landscape choice, subsistence, material culture and mortuary rites. Within the five or more centuries of LBK existence a dynamic sequence of changes can be seen in, for instance, the expansion and increasing density of settlement, progressive regionalisation in pottery decoration, and at the end some signs of stress or even localised crisis. Although showing many features in common across its very broad distribution, however, the LBK phenomenon was not everywhere the same, and there is a complicated mixture of uniformity and diversity. This major study takes a strikingly large regional sample, from northern Hungary westwards along the Danube to Alsace in the upper Rhine valley, and addresses the question of the extent of diversity in the lifeways of developed and late LBK communities, through a wide-ranging study of diet, lifetime mobility, health and physical condition, the presentation of the bodies of the deceased in mortuary ritual. It uses an innovative combination of isotopic (principally carbon, nitrogen and strontium, with some oxygen), osteological and archaeological analysis to address difference and change across the LBK, and to reflect on cultural change in general.

Beautifully painted and full of very raw sexual energy!
