Tom Wolsky

Archival Storytelling Sheila Curran Bernard, Kenn Rabin, 2020-04-28 Fully revised and updated,

Archival Storytelling second edition is a timely, pragmatic look at the use of audiovisual materials available to filmmakers and scholars, from the earliest photographs of the 19th century to the work of media makers today. Whether you're a top Hollywood filmmaker or a first-time documentarian, at some point you are going to want to find, use, and license third-party materials—images, audio, or music that you yourself did not create—to use them in your work. This book explains what's involved in researching and licensing visuals and music, and exactly what media makers need to know when filming in a world crowded with rights-protected images and sounds. Filled with insights from filmmakers, archivists, and intellectual property experts, this second edition defines key terms such as copyright, fair use, public domain, and orphan works. It guides readers through the complex archival process and challenges them to become not only archival users but also archival and copyright activists. This book is an essential resource for both students and professionals, from seasoned

filmmakers to those creating their first projects, offering practical advice for how to effectively and ethically draw on the wealth of cultural materials that surround us.

**Elastic Architecture** Stephen J. Phillips, 2017-04-07 Twentieth-century architect Frederick Kiesler's innovative multidisciplinary practice responded to the ever-changing needs of the body in motion, anticipating the research-oriented practices of contemporary art and architecture. In 1960, the renowned architect Philip Johnson championed Frederick Kiesler, calling him “the greatest non-building architect of our time.” Kiesler's ideas were difficult to construct, but as Johnson believed, “enormous” and “profound.” Kiesler (1890–1965) went against the grain of the accepted modern style, rejecting rectilinear glass and steel in favor of more organic forms and flexible structures that could respond to the ever-changing needs of the body in motion. In *Elastic Architecture*, Stephen Phillips offers the first in-depth exploration of Kiesler's innovative and multidisciplinary research and design practice. Phillips argues that Kiesler established a new career trajectory for architects not as master builders, but as research practitioners whose innovative means and methods could advance

alternative and speculative architecture. Indeed, Kiesler's own career was the ultimate uncompromising model of a research-based practice. Exploring Kiesler's formative relationships with the European avant-garde, Phillips shows how Kiesler found inspiration in the plastic arts, experimental theater, early animation, and automatons to develop and refine his spatial concept of the Endless. Moving from Europe to New York in the 1920s, Kiesler applied these radical Dadaist, constructivist, and surrealist practices to his urban display projects, which included shop windows for Saks Fifth Avenue. After launching his innovative Design Correlation Laboratory at Columbia and Yale, Kiesler went on to invent new houses, theaters, and galleries that were meant to move, shift, and adapt to evolutionary changes occurring within the natural and built environment. As Phillips demonstrates vividly, although many of Kiesler's designs remained unbuilt, his ideas proved influential to later generations of architects and speculative artists internationally, including Archigram, Greg Lynn, UNStudio, and Olafur Eliasson.

**Nonprofit Organizations and the Intellectual Commons** Jyh-An Lee, 2012-01-01 ÔThere is no issue

more fundamental to the growth of the open source society than a more mature and penetrating understanding of the nature of the nonprofit organization in a digital culture. Professor Lee's book is essential reading to this fundamental topic, beautifully written and brilliantly conceived.

— Lawrence Lessig, Harvard Law School, US

Jyh-An Lee provides the first comprehensive account of nonprofit organizations and their overlooked role in setting (and working around) intellectual property policy. The reader will find a wealth of information and a novel theory of NPOs as part of the IP ecosystem.

— Mark A. Lemley, Stanford Law School, US

Over the past twenty years, a number of nonprofit organizations (NPOs), such as Creative Commons, the Electronic Frontier Foundation, and the Free Software Foundation have laid essential building blocks for intellectual-commons as a social movement. Through a detailed description of these NPOs and a series of in-depth interviews with their officials, this book demonstrates that NPOs have provided the social structures that are necessary to support the production of intellectual commons. By illustrating NPOs' role in shaping the commons realm, this book provides a new lens through which to understand the intellectual-commons

environment. Protecting intellectual commons has been one of the most important goals of recent innovation and information policies. This book focuses on the NPOs that occupy an increasingly critical and visible position in the intellectual-commons environment in recent years. This detailed study will appeal to academics in intellectual property and internet law, nonprofit organizations, academics and professionals, and those involved in the Free Culture and Open Source Software Movement.

**The Story of Paul Bigsby** Andy Babiuk, 2009-01-01 (Book). Most musicians are familiar with the famous Bigsby Vibrato, but not as many know about the wonderful guitars that Paul Bigsby built in the 1940s. Bigsby, who was responsible for developing and refining the pedal steel guitar, also built the first modern solid body electric guitar for Merle Travis in 1948, predating Leo Fender and Gibson's Les Paul by a number of years. The Story of Paul A. Bigsby tells how Bigsby influenced Fender and Gibson, as well as a number of other guitar manufacturers, in building techniques and design. This deluxe illustrated coffee table book contains over 300 color and black & white photos. Many of these have not previously been published, and over 50 are actual Bigsby instrument photos taken by fine

arts photographer Greg Morgan. The book also comes with an audio CD of Paul Bigsby, recorded in the late 1950s, telling stories of his business.

**Retroactivism in the Lesbian Archives** Jean Bessette, 2017-12-11 Grassroots historiography has been essential in shaping American sexual identities in the twentieth century. Retroactivism in the Lesbian Archives examines how lesbian collectives have employed “retroactivist” rhetorics to propel change in present identification and politics. By appropriating and composing versions of the past, these collectives question, challenge, deconstruct, and reinvent historical discourse itself to negotiate and contest lesbian identity. Bessette considers a diverse array of primary sources, including grassroots newsletters, place-based archives, experimental documentary films, and digital video collections, to investigate how retroactivists have revised and replaced dominant accounts of lesbian deviance. Her analysis reveals inventive rhetorical strategies leveraged by these rhetors to belie the alienating, dispersing effects of discourses that painted women with same-sex desire as diseased and criminal. Focusing on the Daughters of Bilitis, the Lesbian Herstory Archives, and the June L. Mazer

Archives, and on historiographic filmmakers such as Barbara Hammer and Cheryl Dunye, Bessette argues that these retroactivists composed versions of a queer past that challenged then-present oppressions, joined together provisional communities, and disrupted static definitions and associations of lesbian identity. Retroactivism in the Lesbian Archives issues a challenge to feminist and queer scholars to acknowledge how historiographic rhetoric functions in defining and contesting identities and the historical forces that shape them.

**Hanan al-Cinema** Laura U. Marks, 2015-09-18 An examination of experimental cinema and media art from the Arabic-speaking world that explores filmmakers' creative and philosophical inventiveness in trying times. In this book, Laura Marks examines one of the world's most impressive, and affecting, bodies of independent and experimental cinema from the last twenty-five years: film and video works from the Arabic-speaking world. Some of these works' creative strategies are shared by filmmakers around the world; others arise from the particular economic, social, political, and historical circumstances of Arab countries, whose urgency, Marks argues, seems to demand experiment and

invention. Grounded in a study of infrastructures for independent and experimental media art in the Arab world and a broad knowledge of hundreds of films and videos, Hanan al-Cinema approaches these works thematically. Topics include the nomadism of the highway, nostalgia for '70s radicalism, a romance with the archive, algorithmic and glitch media, haptic and networked space, and cinema of the body. Marks develops an aesthetic of enfolding and unfolding to elucidate the different ways that cinema can make events perceptible, seek connections among them, and unfold in the bodies and thoughts of audiences. The phrase Hanan al-cinema expresses the way movies sympathize with the world and the way audiences feel affection for, and are affected by, them. Marks's clear and expressive writing conveys these affections in works by such internationally recognized artists and filmmakers as Akram Zaatari, Elia Suleiman, Hassan Khan, Mounir Fatmi, and Joana Hadjithomas and Khalil Joreige, and others who should be better known.

**Avid Editing** Sam Kauffmann, 2012-09-10 Geared toward novice Avid editors, this book provides step-by-step instructions for hundreds of editing tasks and concepts within the Avid software

applications. The chapters guide you through an editing project, while the accompanying DVD provides footage to edit allowing for a hands-on experience. More than just a software manual, the book weaves editing principles with the Avid workflow, delving into general editing techniques, principles, and pitfalls, and helping you master the Avid as well as improve your overall editing technique and skillset. The new edition covers working with HD and HDV, visual effects, Scriptsync (Avid's voice recognition software), the Marquee title tool, as well as many other areas that will have you up and cutting on Avid in no time. Coverage spans Avid Xpress Pro HD, Xpress Pro, Xpress DV, and MC Adrenaline. Due to the similarity of Avid's interface across product lines, readers will also find the book relevant for Media Composer, Symphony, Nitris, and other Avid systems.

*The Researcher's Guide* James Ballantyne, 2001 Guide sets out to document film and television material held in archives and collections throughout the UK.

*Experimental and Independent Italian Cinema* Cristiano Anthony Cristiano, 2020-07-06 Discussing a variety of independent and experimental Italian films, this book gives voice to a critically neglected

form of Italian cinema. By examining the work of directors such as Marinella Pirelli, Mirko Locatelli and Cesrae Zavattini, the book defines, inspects and studies the cinematic panorama of Italy through a new lens. It thereby explores the character of independent films and their related practices within the Italian historical, cultural and cinematic landscape.

**Victor Herbert** Neil Gould,2009-08-25 Victor Herbert is one of the giants of American culture. As a musician, conductor, and, above all, composer, he touched every corner of American musical life at the turn of the century, writing scores of songs, marches, concerti, and other works. But his most enduring legacy is on a different kind of stage, as one of the grandfathers of the modern musical theater. Now, Victor Herbert has the biography he deserves. Neil Gould draws on his own experience

as a director, producer, and scholar to craft the first comprehensive portrait in fifty years of the Irish immigrant whose extraordinary talents defined the sounds of a generation and made contemporary American music possible. Mining a wealth of sources—many for the first time—Gould provides a fascinating portrait of Herbert and his world. Born in Dublin in 1859, Herbert arrived in the United States in 1886. From his first job in the orchestra pit of the Metropolitan Opera, Herbert went on to perform in countless festivals and concerts, and conduct the Pittsburgh Orchestra. In 1894, he composed his first operetta, *Prince Ananias*, and by the time of his death in 1924, he'd composed forty-two more—many of them, such as *Naughty Marietta*, spectacular Broadway hits. Along the way, he also wrote two operas, stage music for the *Ziegfeld Follies*, and the first full score for a motion picture, *The Fall of a Nation*. Gould brilliantly blends the musical and the theatrical, classical and popular, the public and the private, in this book. He not only gives a revealing portrait of Herbert the artist, entrepreneur, and visionary, but also recreates the vibrant world of the Herbert's Broadway. Gould takes us inside the music itself—with detailed guides to each major work and recreations of

great performances. He also makes strong connections between Herbert's breakthrough compositions, such as the operetta *Mlle. Modiste*, and the later contributions of Rudolf Friml, Sigmund Romberg, Jerome Kern and other giants of the musical theater. As exuberant as Herbert himself, this book is also a chronicle of American popular culture during one of its most creative periods. For anyone enraptured by the sound of the American musical, this book is delightfully required reading.

*Holocaust Representations in History* Daniel H. Magilow, Lisa Silverman, 2019-11-28 How the Holocaust is depicted and memorialized is key to our understanding of the atrocity and its impact. Through 18 case studies dating from the immediate aftermath of the genocide to the present day,

Holocaust Representations in History explores this in detail. Daniel H. Magilow and Lisa Silverman examine film, drama, literature, photography, visual art, television, graphic novels, memorials, and video games as they discuss the major themes and issues that underpin the chronicling of the Holocaust. Each chapter is focused on a critical debate or question in Holocaust history; the case studies range from well-known, commercially successful works about the Holocaust to controversial examples which have drawn accusations of profaning the memory of the genocide. This 2nd edition adds to the mosaic of representation, with new chapters analysing poetry in the wake of the Holocaust and video games from the here and now. This unique volume provides an unmatched survey of key and controversial Holocaust representations and is of vital importance to anyone wanting to understand the subject and its complexities.

**Evolution on British Television and Radio** Alexander Hall, 2021-09-30 This book charts the history of how biological evolution has been depicted on British television and radio, from the first radio broadcast on evolution in 1925 through to the 150th anniversary of Charles Darwin's Origin of the

Species in 2009. Going beyond science documentaries, the chapters deal with a broad range of broadcasting content to explore evolutionary themes in radio dramas, educational content, and science fiction shows like Doctor Who. The book makes the case that the dominant use in science broadcasting of the ‘evolutionary epic’, a narrative based on a progressive vision of scientific endeavour, is part of the wider development of a standardised way of speaking about science in society during the 20th century. In covering the diverse range of approaches to depicting evolution used in British productions, the book demonstrates how their success had a global influence on the genres and formats of science broadcasting used today.

**The Archives of Critical Theory** Isabelle Aubert, Marcos Nobre, 2023-09-30 On the occasion of the 100th anniversary of the foundation of the Institute for Social Research in Frankfurt am Main, in 1923, this book aims at shedding light on the archives of some of the key thinkers of Critical Theory of Society, also well known as "Frankfurt School". To pay homage to this current of thought, this contributed volume aims to make the archives speak for themselves, to show the public the quantity of unpublished material still existing by the authors of the Critical Theory which are now in funds in different parts of the world (in Germany, in Italy, or in the United States), and to show that Critical Theory remains alive 100 years after its inception. The volume starts by presenting the archives of Karl

Marx and Friedrich Engels, the thinkers who inspired Critical Theory, and the archives of the Institute for Social Research itself. Then it dedicates separate sections to the archives of Walter Benjamin, Max Horkheimer, Theodor W. Adorno, Friedrich Pollock, Herbert Marcuse, Leo Löwenthal and Jürgen Habermas. The book is composed of chapters written by researchers and editors who worked in the different fonds, as well as chapters written by or interviews with researchers who were or are in charge of some of the archives, or who are especially familiar with the material. The Archives of Critical Theory will be an invaluable tool for researchers in many disciplines working with Critical Theory of Society, such as Sociology, Anthropology, Political Science, Philosophy, History, Education, Law and Cultural Studies, among others. Readers will find information about the content of each archive and the history of its constitution. The various contributions present many ways in which the materials may be explored and explain how such explorations affected or may yet affect the state of the research.
