Catching Up With Aristotle Niels Engelsted,2017-01-20
This Brief presents the argument for the need to re-establish the theoretical focus of general psychology in contemporary psychological research. It begins with a detailed account of the current “crisis” of psychology and our modern disconnect from general psychology. Chapters present the works of Aristotle and A.N. Leontiev, using their ideas to outline a long wanted general psychology. The general psychology delineates the four corner posts of the domain of psychology: Sentience, Intentionality, Mind, and Human Consciousness, and explains why they are all necessary but not the same. Besides a historical discussion, which aims to demonstrate how Marxism got it right, and then not, this Brief presents a new radical theory of human evolution, which credits the Adam-and-Eve story with a vital link hitherto missed by Marxism, Darwinism, and paleoanthropology. In addition, it argues why a new understanding is important in the Anthropocene Age. Catching Up with Aristotle will be of interest to psychologists, undergraduate and graduate students, and researchers.

Living Dinosaurs Dr. Gareth Dyke,Gary Kaiser,2011-02-15 *Living Dinosaurs* offers a snapshot of our current understanding of the origin and evolution of birds. After slumbering for more than a century, avian palaeontology has been awakened by startling new discoveries on almost every continent. Controversies about whether dinosaurs had real feathers or whether birds were related to dinosaurs have been swept away and replaced by new and more difficult questions: How old is the avian lineage? How did birds learn to fly? Which birds survived the great extinction that ended the Mesozoic Era and how did the avian genome evolve? Answers to these questions may help us understand how the different kinds of living birds are related to one another and how they evolved into their current niches. More importantly, they may help us understand what we need to do to help them survive the dramatic impacts of human activity on the planet.
