The Clone Race R. G. Alcorn,2012-11 Dr. Noyle laam, one of our most brilliant authorities in android logic systems, excels in his ability to look at a process and improve on its efficiency or effectiveness. With our home world dying from the overmining of its resources, he feels android mining could be dramatically improved to a higher yield. His successes to make androids learn as they go and increase their knowledge base to independent, sentient thinking is about to expand a workforce to a planetary level. Dr. Uriel Resiw, as his young assistant, brings with her a unique line of problem solving that may be just what he needs, but Dr. Sypher, also one of his colleagues, has his own ideas over those of Dr. laam and is determined to show them all. Noyle feels the androids should control their own will to think. Sypher wants to control their will to think. Greed can feed on the need for recognition of one's ability, especially if one feels they have been passed over. As the androids evolve and begin to create unexpected problems, so do the conflicts of Dr. Sypher. The fight to save their home world may become a fight for their very lives.

Kitten Clone Douglas Coupland,2015-05 Douglas Coupland, one of the world's biggest cultural brains, takes an inside look at the global company that keeps us connected, and wonders what all that connectivity is doing to our brains and our sense of ourselves as humans. The incomparable Douglas Coupland reports from inside the corporate offices and science labs of Alcatel-Lucent, a globally influential business whose work is largely unknown to consumers. Were it to vanish tomorrow, he writes, our modern world would grind to a halt. The Internet would implode--your Internet would implode. Although his examination of the company is playful and fascinating in its own right, Coupland's account is driven by his thoughtful reflections on the larger cultural and sociological significance of the transformative information technology Alcatel works on: fiber wire, microprocessors, the Internet and mobile technologies. And by a larger meditation about what the Internet is doing to us as it relentlessly colonizes the planet, and our brains. Like Coupland's best work, Kitten Clone is a wildly entertaining yet penetrating encounter with the technological and cultural forces that surround us. And also a surprising and unique exploration of a possible future.
