systems abound especially in the tropics. Despite the pervasiveness of such multipurpose “trees-outside-forest” resources, they have not attracted adequate attention in the development paradigms of many nation states. These multispecies production systems impact the ecosystem processes favourably. Yet, our understanding of the diversity attributes and carbon dynamics under agroforestry is not adequate. This book focuses on the role of multispecies production systems involving tree and crop species as a means for carbon sequestration and thereby reduce atmospheric carbon dioxide levels. Sixteen chapters organized into three broad sections titled: Measurement and Estimation, Agrobiodiversity and Tree Management, and Policy and Socioeconomic Aspects represent a cross section of the opportunities and challenges in current research and emerging issues in harnessing carbon sequestration potential of agroforestry systems.

**Patched** Jarrod Gilbert,2013-11-01 For more than five decades, gangs have played a pivotal role in New Zealand crime life, beginning with the bodgies and widgeys of the 1950s. Based on 10 years of gang research, this book chronicles the rise of the Hell's Angels and other bike gangs in the 1960s, the growth of the Mongrel Mob and Black Power in the 1970s, and organized crime during the last decade. With descriptions of such events as the Devil's Henchmen throwing Molotov cocktails at the Epitaph Riders in Christchurch's first gang war and Black Power members surrounding Prime Minister Rob Muldoon at Wellington's Royal Tiger Tavern, it also discusses the significance of colors and class. With accounts from gang members, police, and politicians, this violent and sometimes horrifying book transports its readers to a tough yet revealing part of New Zealand life.
