**Trade in the Ancient Sahara and Beyond** D. J.

Mattingly,V. Leitch,C. N. Duckworth,A. Cuénod,M. Sterry,F. Cole,2017-11-30 Saharan trade has been much debated in modern times, but the main focus of interest remains the medieval and early modern periods, for which more abundant written sources survive. The pre-Islamic origins of Trans-Saharan trade have been hotly contested over the years, mainly due to a lack of evidence. Many of the key commodities of trade are largely invisible archaeologically, being either of high value like gold and ivory, or organic like slaves and textiles or consumable commodities like salt. However, new research on the Libyan people known as the Garamantes and on their trading partners in the Sudan and Mediterranean Africa requires us to revise our views substantially. In this volume experts re-assess the evidence for a range of goods, including beads, textiles, metalwork and glass, and use it to paint a much more dynamic picture, demonstrating that the pre-Islamic Sahara was a more connected region than previously thought.

**Biology of Rhodococcus** Héctor M.

Alvarez,2010-09-07 Rhodococcus, a metabolically versatile actinobacteria which is frequently found in the environment, has gained increasing interest due to its potential biotechnological applications. This Microbiology Monographs volume provides a thorough review of the

various aspects of the biochemistry, physiology and genetics of the Genus *Rhodococcus*. Following an overview of its taxonomy, chapters cover the structural aspects of rhodococcal cellular envelope, genomes and plasmids, metabolic and catabolic pathways, such as those of aromatic compounds, steroids and nitriles, and desulfurization pathways, as well as the adaption to organic solvents. Further reviews discuss applications of *Rhodococcus* in the bioremediation of contaminated environments, in triacylglycerol accumulation, and in phytopathogenic strategies, as well as the potential of biosurfactants. A final chapter describes the sole pathogenic *Rhodococcus* member, *R. equi*.

**Materials Handbook** John A. Vaccari,2002-07-09 The Materials Handbook is an encyclopedic, A-to-Z organization of all types of materials, featuring their key performance properties, principal characteristics and applications in product design. Materials include ferrous and nonferrous metals, plastics, elastomers, ceramics, woods, composites, chemicals, minerals, textiles, fuels, foodstuffs and natural plant and animal substances --more than 13,000 in all. Properties are expressed in both U.S. customary and metric units and a thorough index eases finding details on each and every material. Introduced in 1929 and often known simply as Brady's, this comprehensive, one-volume, 1244 page encyclopedia of materials is intended for executives, managers, supervisors, engineers, and technicians, in engineering, manufacturing, marketing, purchasing and sales as well as educators and students. Of the dozens of families of materials updated in the 15th Edition, the most extensive additions pertain to adhesives, activated carbon, aluminides, aluminum alloys, catalysts, ceramics,

composites, fullerenes, heat-transfer fluids, nanophase materials, nickel alloys, olefins, silicon nitride, stainless steels, thermoplastic elastomers, titanium alloys, tungsten alloys, valve alloys and welding and hard-facing alloys. Also widely updated are acrylics, brazing alloys, chelants, biodegradable plastics, molybdenum alloys, plastic alloys, recycle plastics, superalloys, supercritical fluids and tool steels. New classes of materials added include aliphatic polyketones, carburizing secondary-hardening steels and polyarylene ether benzimidazoles. Carcinogens and materials likely to be cancer-causing in humans are listed for the first time.

*Mom and Pop Grocery Stores* Nebraska Jewish Historical Society,2011-08 Jews have a proud history as entrepreneurs and merchants. When Jewish immigrants began coming to America in greater and greater numbers during the late 19th century and early 20th century, many gravitated to the food industry, some as peddlers and fresh produce market stall hawkers, others as wholesalers, and still others as grocers. Most Jews who settled in Nebraska came from Russia and Poland, with smaller segments from Hungary, Germany, and other central and Eastern European nations. They were variously escaping pogroms, revolution, war, and poverty. The prospect of freedom and opportunity motivated Jews, just as it did other peoples, to flock here. At a time when Jews were restricted from entering certain fields, the food business was relatively wide open and affordable to enter. There was a time when for a few hundred dollars, one could put a down payment on a small store. That was still a considerable amount of money before 1960, but it was not out of reach of most working men who scrimped and put away a little every week. And that was a good thing too because obtaining capital to launch a store was difficult. Most banks would not lend credit to Jews and other minorities until after World War II. The most likely route that Jews took to becoming grocers was first working as a peddler, selling feed, selling produce by horse and

wagon or truck, or apprenticing in someone else's store. Some came to the grocery business from other endeavors or industries. The goal was the same -- to save enough to buy or open a store of their own. By whatever means Jews found to enter the grocery business, enough did that during the height of this self-made era. From roughly the 1920s through the 1950s, there may have been a hundred or more Jewish-owned and operated grocery stores in the metro area at any given time. Jewish grocers almost always started out modestly, owning and operating small Mom and Pop neighborhood stores that catered to residents in the immediate area. By custom and convenience, most Jewish grocer families lived above or behind the store, although the more prosperous were able to buy or build their own free-standing home. Since most customers in Nebraska and Iowa were non-Jewish, store inventories reflected that fact, thus featuring mostly mainstream food and nonfood items, with only limited Jewish items and even fewer kosher goods. The exception to that rule was during Passover and other Jewish high holidays, when traditional Jewish fare was highlighted. Business could never be taken for granted. In lean times it could be a real struggle. Because the margin between making it and not making was often quite slim many Jewish grocers stayed open from early morning to early evening, seven days a week, even during the Sabbath, although some stores were closed a half-day on the weekend. Jewish stores that did close for the Sabbath were open on Sunday.

**Death by Food Pyramid** Denise Minger,2014-01-01

Warning: Shock and outrage will grip you as you dive into this one-of-a-kind exposé. Shoddy science, sketchy politics, and shady special interests have shaped American Dietary recommendations--and destroyed our nation's health--over recent decades. The phrase death by food pyramid isn't shock-value sensationalism, but the tragic consequence of following federal advice and corporate manipulation in pursuit of health. In *Death by Food Pyramid*, Denise Minger exposes the forces that overrode common sense and solid science to launch a pyramid phenomenon that bled far beyond US borders to taint the eating habits of the entire developed world. Minger explores how generations of flawed pyramids and plates endure as part of the national consciousness, and how the one size fits all diet mentality these icons convey pushes us deeper into the throes of obesity and disease. Regardless of whether you're an omnivore or vegan, research junkie or science-phobe, health novice or seasoned dieter, *Death by Food Pyramid* will reframe your understanding of nutrition science--and inspire you to take your health, and your future, into your own hands.
