Parents of Invention Christopher Brown-Syed, 2011-06-07 This fascinating tale of the rise and fall of mini-computer-based integrated library systems (ILS) offers both an explanation of the technical workings—still being used daily—and a historical investigation. *Parents of Invention: The Development of Library Automation Systems in the Late 20th Century* traces the rise and fall of mini-computer-based ILS. In doing so, it offers an insider's view of the process of creation, the technical challenges, and the lasting contributions of librarians and programmers at a time when librarians and their automation needs forced computer companies to innovate. Organized around a series of interviews with computer programmers, librarians, and salespeople, the book discusses developments from the late 1970s to the mid-1990s, focusing on the 1980s when both ILS and the mini-computer were dominant. It documents the time when a small group of computing vendors joined with large libraries around the world to perfect systems that automated functions such as circulation, acquisitions, cataloging, and online public access catalogs. A concluding chapter, contributed by Louise O'Neill, brings the story up to date with a discussion of current developments in library automation, including the adoption of open-source systems, open-access principles, and the Semantic Web.

Mathematics in the Real World W.D. Wallis,2013-09-20 Mathematics in the Real World is a self-contained, accessible introduction to the world of mathematics for non-technical majors. With a focus on everyday applications and context, the topics in this textbook build in difficulty and are presented sequentially, starting with a brief review of sets and numbers followed by an introduction to elementary statistics, models, and graph theory. Data and identification numbers are then covered, providing the pathway to voting and finance. Each subject is covered in a concise and clear fashion through the use of real-world applications and the introduction of relevant terminology. Many sample problems – both writing exercises and multiple-choice questions – are included to help develop students’ level of understanding and to offer a variety of options to instructors. Covering six major units and outlining a one-semester course, Mathematics in the Real World is aimed at undergraduate liberal art students fulfilling the mathematics requirement in their degree program. This introductory text will be an excellent resource for such courses, and will show students where mathematics arises in their everyday lives.

Automation in blood transfusion C.Th. Smit Sibinga,P.C. Das,C.F.

Högman,2013-11-11 With this symposium the Red Cross Blood Bank Groningen-Drenthe affirms its well known reputation as an organizer of symposia of high standard and quality. Several important aspects of bloodbanking have been discussed in the past. The Blood Bank here is a specialist in its own field. Administrative processes in respect of the donor, information processes, the preparation of the blood and the laboratory process are automatized. New developments in these fields are underway that you will certainly identify and investigate. I do hope that you will come to conclusions from which we can learn and get better results. As general manager of the Development and Investments Company for the Northern Netherlands - NOM - for several reasons I am very much interested in the outcome of this symposium. In the first place I am proud that the Red Cross Blood Bank Groningen Drenthe is doing its utmost to be excellent in regard of research, education and bloodprocessing. In being so, the Blood Bank can produce spin-offs for healthservices and the related industry.

Dynix Jacqueline Gilmartin,2018-08-13 Published in 1992. Investing in, running and

managing an automated library system is an expensive, time-consuming activity. This guide, one of a series looking at library automation systems, will not only help prospective users in their systems choice, but will also give current users a better appreciation of the potential of their own system. Written by users of the system and reflecting their experience, the guide examines DYNIX's place in the automated libraries' market, the company' history, reliability and support services. All the hardware and software used in connection with DYNIX are described and the reader is taken through all the processes involved in setting up the system, and introduced to the specific packages and applications. This guide will also be of interest to students of information management, information science and librarianship.

For All Practical Purposes Study Guide COMAP,2002-12-30 The mathematicians and educators who comprise COMAP created for All Practical Purposes in response to the following question: If there were a course designed to help impart mathematical literacy to today's students what should it include? Like previous revisions, the new edition of FAPP carefully re-examines this question to better reflect our changing world. In keeping with the FAP tradition, the text continues to focus on mathematics relevant to consumers, business, history, and social sciences, incorporating a number of content and pedagogical

changes, and adding new interactive features on the Web. The result is the ideal liberal arts mathematics text for students who think that mathematics is irrelevant and dull, and for instructors who want their class time to focus on active participation and a real-world approach to problem-solving.
