The Chemistry of Food Jan Velisek, Richard Koplik, Karel Cejpek, 2020-07-29 Wiley's landmark food chemistry textbook that provides an all-in-one reference book, revised and updated The revised second edition of The Chemistry of Food provides a comprehensive overview of important compounds constituting of food and raw materials for food production. The authors highlight food's structural features, chemical reactions, organoleptic properties, nutritional, and toxicological importance. The updated second edition reflects the thousands of new scientific papers concerning food chemistry and related disciplines that have been published since 2012. Recent discoveries deal with existing as well as new food constituents, their origin, reactivity, degradation, reactions with other compounds, organoleptic, biological, and other important properties. The second edition extends and supplements the current knowledge and presents new facts about chemistry, legislation, nutrition, and food safety. The main chapters of the book explore the chemical structure of substances and subchapters examine the properties or uses. This important resource:

- Offers in a single volume an updated text dealing with food chemistry
- Contains complete and fully up-to-date information on food chemistry, from structural features to applications
- Features several visual aids including reaction schemes, diagrams and tables, and nearly 2,000 chemical structures
- Written by internationally recognized authors on food chemistry

Written for upper-level students, lecturers, researchers and the food industry, the revised second edition of The Chemistry of Food is a quick reference for almost anything food-related as pertains to its chemical properties and applications.

Global Legislation for Food Packaging Materials Rinus Rijk, Rob Veraart, 2010-03-19 Providing a truly global overview of legislation in all major countries, this practical volume contains the information vital for manufactures of food contact materials and food producers, facilitating a comparison of the requirements and making mutual requirements easier to identify. It covers not only plastics but also other food contact materials, such as paper, board, coatings, ceramics, cork, rubber, and textiles.

Fruit and Vegetable Phytochemicals Elhadi M. Yahia, 2017-11-06 Now in two volumes and containing more than seventy chapters, the second edition of Fruit and Vegetable Phytochemicals: Chemistry, Nutritional Value and Stability has been greatly revised and expanded. Written by hundreds of experts from across the world, the chapters cover diverse aspects of chemistry and biological functions, the influence of postharvest technologies, analysis methods and important phytochemicals in more than thirty fruits and vegetables. Providing readers with a comprehensive and cutting-edge description of the metabolism and molecular mechanisms associated with the beneficial effects of phytochemicals for human health, this is the perfect resource not only for students and teachers but also researchers, physicians and the public in general.

Consumer Driven Electronic Transformation Georgios I. Doukidis,Adam P. Vrechopoulos,2005-12-14 The book focuses on the emerging techniques and technologies for supply chain management and collaboration as well as on the emerging relationships and the electronic transformations governing multichannel retailing. It aims at supporting retailers, consumer goods manufacturers and third parties applying the latest technological inventions to transform the value chain. It also attempts to guide practitioners to effectively proceed in employing new technologies to ignite consumer enthusiasm. Similarly, the objective of this book is to help companies target more accurately consumer and shopper wishes with focused investments, in shorter time, and with more success.

Coffee, Tea, Mate, Methylxanthines and Methylglyoxal IARC Working Group on the Evaluation of Carcinogenic Risks to Humans,1991 Reports the deliberations of a working group convened to evaluate the strength of evidence linking the drinking of coffee, tea, and mate to the development of human cancer. Separate evaluations are also provided for caffeine, theophylline theobromine and methylglyoxal, which are chemical constituents of coffee, tea, and several other popular beverages. The first and most extensive monograph evaluates the large number of studies designed to assess the carcinogenic potential of coffee. On the basis of available data, the working group concluded that coffee is possibly carcinogenic to the human urinary bladder. Evidence further suggests that coffee may actually protect humans against cancer of the colon and rectum. The risk for breast cancer was shown, with remarkable consistency, to have no association with coffee drinking. The second monograph evaluates the carcinogenicity of black and green teas. Although available data were judged inadequate to classify tea according to its carcinogenic risk, the analysis uncovered evidence suggesting that the temperature at which tea is drunk may be a more important determinant of risk than the chemical composition of the beverage. This observation is further supported in the monograph on mate, a South American beverage, which is usually drunk very hot following repeated addition of almost boiling water to the infusion. While mate could not be classified on the basis of available data, hot mate drinking was judged to have a probable association with the development of oesophageal and oral cancers. Evidence was inadequate to assess the carcinogenicity of caffeine, theophylline, theobromine, and methylglyoxal.
