## Measurement of the $D_s$ Leptonic Decay Constant $F_{D_s}$ and Observation of New Resonances Decaying to $D^{(*)}\pi$

Jose Feliciano Benitez, 2011 The absolute branching fractions for the decays  $D^-\rightarrow \ell^-\bar{\nu}_\ell$  ( $\ell=e, \mu, \tau$ ) are measured using a data sample corresponding to an integrated luminosity of 521 fb<sup>-1</sup> collected at center of mass energies near 10.58 GeV with the BABAR detector at the PEP-II  $e^+e^-$  collider at SLAC. The number of  $D_s^-$  mesons is determined by reconstructing the recoiling system  $DKX\gamma$  in events of the type  $e^+e^-\rightarrow DKXD^{*-}_s$ , where  $D^{*-}_s\rightarrow D^-\gamma$  and  $X$  represents additional pions from fragmentation. The  $D^-\rightarrow \ell^-\bar{\nu}_\ell$  events are detected by full or partial reconstruction of the recoiling system  $DKX\gamma\ell$ . The following results are obtained:  $B(D^-\rightarrow \mu^-\bar{\nu}_\mu) = (6.02 \pm 0.38 \pm 0.34) \times 10^{-3}$ ,  $B(D^-\rightarrow \tau^-\bar{\nu}_\tau) = (5.00 \pm 0.35 \pm 0.49) \times 10^{-2}$ , and  $B(D^-\rightarrow e^-\bar{\nu}_e)$

Lunatic Asylums in Colonial Bombay Sarah Ann Pinto, 2018-08-28 This book traces the historical roots of the problems in India's mental health care system. It accounts for indigenous experiences of the lunatic asylum in the Bombay Presidency (1793-1921). The book argues that the colonial lunatic asylum failed to assimilate into Indian society and therefore remained a failed colonial-medical enterprise. It begins by assessing the implications of lunatic asylums on indigenous knowledge and healing traditions. It then examines the lunatic asylum as a 'middle-ground', and the European superintendents' 'common-sense' treatment of Indian insanity. Furthermore, it analyses the soundscapes of Bombay's asylums, and the extent to which public perceptions influenced their use. Lunatic asylums left a legacy of historical trauma for the indigenous community because of their coercive and custodial character. This book aims to disrupt that legacy of trauma and to enable new narratives in mental health treatment in India.

TBH: 51 True Story Collabs Hunter March, 2017-04-25 Hunter March and his creator friends get honest about what they got right-- and more often what they got wrong--in TBH: 51 True Story Collabs. Featuring stories from Alex Aiono, Jenn McAllister, Meg DeAngelis, Lauren Elizabeth, The Merrell Twins, Claudia Sulewski, Andrew Lowe, Aspyn Ovard, Cimorelli, Rebecca Black, Ryan Abe, Alexis G. Zall, Rickey Thompson, Meghan Tonjes, Maddy Whitby, Monica Sherer, Lex Lee, and Aija Mayrock. Hunter March has made a career out of interviewing creators about their lives all while putting his own life on the internet too. But what happens when the cameras turn off? Crushes turn to relationships and parents get divorced. Friendships are made and hearts are broken. Tests get flunked and dreams come true. Sometimes creators' real lives happen off-screen, and in TBH: 51 True Story Collabs, they happen on the page. With thousands of videos and millions of views, it might seem like they've got all the answers. But no one knows it all, so they've collabed to get a little closer to figuring it out. Because TBH, growing up is tough and sometimes you need a little help from your friends.

Astronomy in India, 1784-1876 Joydeep Sen, 2015-07-22 Indian scientific achievements in the early twentieth century are well known, with a number of heralded individuals making globally recognized strides in the field of astrophysics. Covering the period from the foundation of the Asiatic Society in 1784 to the establishment of the Indian Association for the Cultivation of Science in 1876, Sen explores the relationship between Indian astronomers and the colonial British. He shows that from the mid-nineteenth century, Indians were not passive receivers of European knowledge, but active participants in modern scientific observational astronomy.

*Traffic Secrets* Russell Brunson, 2020-03-26 Master the evergreen traffic strategies to fill your website and funnels with your dream customers in this timeless book from the \$100M entrepreneur and co-founder of the software company ClickFunnels. The biggest problem that most entrepreneurs have isn't creating an amazing product or service; it's getting their future customers to discover that they even exist. Every year, tens of thousands of businesses start and fail because the entrepreneurs don't understand this one essential skill: the art and science of getting traffic (or people) to find you. And that is a tragedy. Traffic Secrets was written to help you get your message out to the world about your products and services. I strongly believe that entrepreneurs are the only people on earth who can actually change the world. It won't happen in government, and I don't think it will happen in schools. It'll happen because of entrepreneurs like you, who are crazy enough to build products and services that will actually change the world. It'll happen because we are crazy enough to risk everything to try and make that dream become a reality. To all the entrepreneurs who fail in their first year of business, what a tragedy it is when the one thing they risked everything for never fully gets to see the light of day. Waiting for people to come to you is not a strategy. Understanding exactly WHO your dream customer is, discovering where they're congregating, and throwing out the hooks that will grab their attention to pull them into your funnels (where you can tell them a story and make them an offer) is the strategy. That's the big secret. Traffic is just people. This book will help you find YOUR people, so you can focus on changing their world with the products and services that you sell.

Future Of High Energy Physics, The - Some Aspects Flores Castillo Luis Roberto, Prokofiev Kirill, 2017-02-20 The monumental discovery of the Higgs boson at the LHC marked the beginning of a new era in the high energy physics. Although the particle spectrum of the Standard Model is now complete with the Higgs boson, the hierarchy problem and the lack of explanation of the origin of dark matter imply that a new Beyond the Standard Model physics should exist. There is however no clear indication (experimental or otherwise) of the energy scale at which this new physics should appear. Current results from the LHC experiments have shown no unpredicted effects up to pp collision energies of 13 TeV. If not observed directly at the LHC, the new physics may reveal itself through deviations of Higgs properties from their Standard Model expectations, or it may become directly accessible only at new, higher-energy accelerator facilities. It is then of primary importance to have a comprehensive review of the available and planned accelerators and their design, physics motivation and expected performance. This book comprises 26 carefully edited articles with well-referenced and up-to-date material written by many of the leading experts. These articles — originated from presentations and dialogues at the second HKUST Institute for Advanced Study Program on High Energy Physics — are organized into three aspects, Theory, Accelerator, and Experiment, focusing on in-depth analyses and technical aspects that are essential for the developments and expectations for the future high energy physics.

Sneakers x Culture: Collab Elizabeth Semmelhack, 2019-10-29 A celebration of the great sneaker collaborations that have reimaged the shoe, elevating this most practical of footwear into the realm of wearable art. The ubiquitous sneaker is the canvas upon which so many defiers of convention--artists, musicians, athletes, and celebrities--have sought to make their mark and through the sneaker contribute to a unique identity and attitude among sneakerheads everywhere. Collected here are the best sneaker

collaborations with the biggest makers--Adidas, Converse, Nike, Puma, Reebok--featuring nearly one hundred famous, infamous, and lesser-known partnerships. Museum-quality studio photographs of each sneaker are accompanied by visuals collected from the archives of sneaker makers, as well as ephemera such as design sketches and drawings illustrating the creative process. Author Elizabeth Semmelhack has conducted interviews with many collaborators, including an extensive Q&A with Chris Hill, design manager of Reebok, who has worked with Pyer Moss, Cam'ron, and many others. In her introduction, Semmelhack explores the history of collaborations, starting at the beginning with Jack Purcell, whose sneakers remain virtually unchanged today. More than eighty sneaker collaborations are featured, including Virgil Abloh (ten styles!), KAWS, Pharrell Williams, Bobbito Garcia, Damien Hirst, Jeremy Scott, Eminem, Supreme, Chanel, Missoni, Rihanna, Missy Elliott, Dr. Woo, and Fear of God.

Extreme Events in Geospace Natalia Buzulukova,2017-12-01 Extreme Events in Geospace: Origins, Predictability, and Consequences helps deepen the understanding, description, and forecasting of the complex and inter-related phenomena of extreme space weather events. Composed of chapters written by representatives from many different institutions and fields of space research, the book offers discussions ranging from definitions and historical knowledge to operational issues and methods of analysis. Given that extremes in ionizing radiation, ionospheric irregularities, and geomagnetically induced currents may have the potential to disrupt our technologies or pose danger to human health, it is increasingly important to synthesize the information available on not only those consequences but also the origins and predictability of such events. Extreme Events in Geospace: Origins, Predictability, and Consequences is a valuable source for providing the latest research for geophysicists and space weather scientists, as well as industries impacted by space weather events, including GNSS satellites and radio communication, power grids, aviation, and human spaceflight.
