A Guide for Color Deficient Pilots Damian Phillips,2017-01-11 A Guide for Color Deficient Pilots exposes how individuals with Color Vision Deficiency can pass Ishihara and other color tests to attain actual jobs in the aviation industry. The FAA upholds color vision screening as standard practice, believing that color recognition is essential for piloting an aircraft safely. As a result, thousands of individuals have been forced to abandon their dream and career choice after failing a color vision test. Written by a Private Pilot with experience in this subject, A Guide for Color Deficient Pilots explains the various testing methods utilized by the FAA; and shares how to increase your chances of passing and obtaining your green light, or clearance to fly. Other topics covered in this book are how to maintain an unrestricted medical certificate; the benefit of Third Class Medical Reform; and how to acquire an actual flying job, even when unable to pass one single color vision test!

A-7 Corsair Pilot's Flight Operating Manual United States Navy, 2008-09-01 The A-7 Corsair II served the U.S. Navy for over two decades, and flew with distinction during the Vietnam conflict. The subsonic A-7 was based on Chance Vought's supersonic F-8 Crusader. It boasted a heads-up display, an inertial navigation system, and other innovations. The plane entered service in 1966, and served in Vietnam in late 1967. Its performance was impressive. The USS Ranger's VA-147 flew over 1,400 sorties with the loss of only one aircraft. The Air Force purchased an advanced version, the A-7D, equipped with a more powerful engine. The plane later flew missions over Lebanon, Libya, Grenada, Panama, and Iraq. The last planes in U.S. inventory were retired in 1991. Originally printed by the U.S. Navy and Vought, this handbook for the A-7 provides a fascinating glimpse inside the cockpit of this famous aircraft. Originally classified "restricted", the manual was recently declassified and is here reprinted in book form.

Fighter Pilot's Heaven Donald S. Lopez, Sr.,2012-01-11 Fighter Pilot's Heaven presents the dramatic inside story of the American military's transition into the jet age, as told by a flyer whose life depended on its success. With colorful anecdotes about fellow pilots as well as precise technical information, Donald S. Lopez describes how it was to be "behind the stick" as a test pilot from 1945 to 1950, when the U.S. military was shifting from war to peacetime operations and from propeller to jet aircraft. An ace pilot who had served with Gen. Claire Chennault's Flying Tiger Fighter Group, Lopez was assigned at the close of World War II to the elite Proof Test Group of the Air Proving Ground Command. Located at Eglin Field (later Eglin Air Force Base) in Florida, the group determined the operational suitability of Air Force weapons systems and aircraft and tested the first operational jet, the P-80 Shooting Star. Jet fighters required new techniques, tactics, and weaponry. Lopez recounts historic test flights in the P-59, P-80, and P-84, among other planes, describing complex combat maneuvers, hair-raising landings in unusual positions, and disastrous crashes and near crashes. This memoir is peppered with lively accounts of many pilots and their colleagues, revealing how airmen coped with both exhilarating successes and sometimes tragic failures.
