Colorworld Rachel E Kelly,2013-12-24 Wendy, a 19-year old college student, can sense emotions when she touches people. As the sole caregiver for her younger brother Ezra, she is strapped for cash and decides to participate in an allergy study. But something goes wrong, and when Wendy wakes up, she learns that someone is dead and it was her skin that did it. Unable to touch people for fear of hurting them, Wendy is on the hunt for answers. Did they mean to make her a weapon, or something else entirely? That's when she finds out she's not the only one; superhuman abilities are real. Gabe, who works with the company responsible, feels badly about what happened and offers his help. Together they learn that Wendy was targeted for a specific reason, and it has nothing to do with her death touch.

Ode to Color Lori Weitzner,2016-12-06 Internationally renowned textile designer Lori Weitzner presents a novel, layered perspective on the use and significance of color in design and culture in this spectacular treasury illustrated with 225 full-color images. Ode to Color, a stunning anthology by renowned and award-winning textile and wallcovering designer Lori Weitzner, principal of Lori Weitzner Design, Inc., offers an immersive, sensual, and engaging journey in the world of color as it applies to culture, design, mood, and memory. Each of the ten chapters in this richly illustrated volume presents a distinct color world through an intimate and often kaleidoscopic perspective, a compilation of the numerous—and often shifting—associations and emotions we assign to a color or group of colors. Each chapter combines diverse imagery—evocative fine art and photography, environmental interiors, details of Weitzner’s gorgeous designs as well as her sketches and watercolors—with excerpts from literature and her own essays on a wide array of topics relating to the palette. The result is a fully sensory conveyance of each palette’s particular power as well as a consideration of its tangible and intangible connections, from its place in religion, pop culture, and commerce to the impact it has upon our decision making, our moods, and our tastes. While each chapter is unique in its approach to the ten worlds, with its mix of essays, prose and range of art, from a Technicolor Disney cartoon in Out Loud to David Bowie as Ziggy Stardust in Silverlight, each chapter includes: An introductory essay on a subject that characterizes the palette A two-page photographer of an open drawer in Weitzner’s studio that she has arranged with various fabrics, skeins, and objects that, together, comprise the palette; An evocative two-page word collage that presents both color names and the words commonly associated with the palette; Design pointers that provide in-depth insight to working with color and to decorating with each palette throughout the home, from wall treatments to accessories. Spectacular and imaginative, this experiential volume will captivate, inspire, and inform a broad audience, including interior designers and decorators, architects, graphic and fine artists, and anyone interested in art, design, fashion, pop culture, and spiritual discovery. Sumptuous, beautifully designed, and filled with wondrous imagery and compelling stories and facts, it makes an inspiring and unusual gift for almost any occasion.

What Color Is My World? Kareem Abdul Jabbar,2012-03-13 Kareem Abdul-Jabbar, basketball legend and the NBA's alltime leading scorer, champions a lineup of little-known African-American inventors in this lively, kid-friendly book. Did you know that James West invented the microphone in your cell phone? That Fred Jones invented the refrigerated truck that makes supermarkets possible? Or that Dr. Percy Julian synthesized cortisone from soy, easing untold people’s pain? These are just some of the black inventors and innovators scoring big points in this dynamic look at several unsung heroes who shared a desire to improve people’s lives. Offering profiles with fast facts on flaps and framed by a funny contemporary story featuring two feisty twins, here is a nod to the minds behind the gamma electric cell and the ice-cream scoop, improvements to traffic lights, open-heart surgery, and more — inventors whose ingenuity and perseverance against great odds made our world safer, better, and brighter. Back matter includes an authors’ note and sources.

The World According to Color James Fox,2022-04-12 A kaleidoscopic exploration that traverses history, literature, art, and science to reveal humans' unique and vibrant relationship with color. We have an extraordinary connection to color—we give it meanings, associations, and properties that last millennia and span cultures, continents, and languages. In The World According to Color, James Fox takes seven elemental colors—black, red, yellow, blue, white, purple, and green—and uncovers behind each a root idea, based on visual resemblances and common symbolism throughout history. Through a series of stories and vignettes, the book then traces these meanings to show how they morphed and multiplied and, ultimately, how they reveal a great deal about the societies that produced them: reflecting and shaping their hopes, fears, prejudices, and preoccupations. Fox also examines the science of how our eyes and brains interpret light and color, and shows how this is inherently linked with the meanings we give to hue. And using his background as an art historian, he explores many of the milestones in the history of art—from Bronze Age gold-work to Turner, Titian to Yves Klein—in a fresh way. Fox also weaves in literature, philosophy, cinema, archaeology, and art—moving from Monet to Marco Polo, early Japanese ink artists to Shakespeare and Goethe to James Bond. By creating a new history of color, Fox reveals a new story about humans and our place in the universe: second only to language, color is the greatest carrier of cultural meaning in our world.
