**Carolina Herrera** Carolina Herrera,Wes Gordon,2023-09-05 Inspired by the strong and full-of-fire Carolina Herrera woman, Wes Gordon partners with Elizaveta Porodina on painterly images merging bold colors and timeless beauty in a cinematic style. The sophistication and modern femininity of the American fashion house Carolina Herrera is captured in this evocative and vividly hued volume photographed by Elizaveta Porodina. A

collaborative series of images, first created in 2020 and all taken over Zoom, feature Porodina's signature blurred, painterly style—an effect achieved through complex lighting techniques and equipment—to capture the brand's Resort and Spring 2022 collections in a dreamy, otherworldly light. Inspired by dance and the work of fashion illustrator Antonio Lopez, this mesmerizing tome is flooded with photography of models and dancers in motion to reflect the vibrant energy and optimism of the clothing. Ethereal beauties wear ball gown skirts in graphic rose prints from Resort, a striped black and white strapless dress from Spring, and bold, jewel-toned voluminous outfits in shades of pink and red, along with close-ups of jewelry, leather goods, and eyewear.

*Color Mania* Barbara Flückiger, Eva Hielscher, 2019-12-10 Since the earliest days of cinema, film has been a colorful medium and art form. More than 230 film color processes have been devised in the course of film history, often in close connection with photography. In this regard, both media institutionalized numerous techniques such as hand and stencil coloring as well as printing and halftone processes. Apart from these fundamental connections in terms of the technology of color processes, film and photography also share and exchange color attributions and aesthetics. This publication highlights material aspects of color in photography and film, while also investigating the relationship of historical film colors and present-day photography. Works of contemporary photographers and artists who reflect on technological and culture-theoretical aspects of the material of color underline these relations. Thematic clusters focus on aesthetic and technological parallels, including fashion and identity, abstraction and experiment, politics, exoticism, and travel. Color Mania contains a general introduction to color in film

and photography (technique, materiality, aesthetics) as well as a series of short essays that take a closer look at specific aspects. An extensive image section illustrates the texts and color systems and continues the aesthetic experience of the various processes and objects in book form.00Exhibition: Fotomuseum Winterthur, Switzerland (07.09. - 24.11.2019).

**Colour Mania** Victionary, 2009 Green with envy. Feeling blue. White lies. Grey areas. In every language spoken on earth human beings use colors to express themselves. World renowned author, Vladimir Nabokov\*, claimed he could hear color and actually assigned a color to each letter of the alphabet based on each letter's particular sound. The Eskimos of the polar regions have countless words that uniquely describe the color white. In the world of graphics some designers have devoted their entire body of work to one color, sometimes showing it off in all of its full-bodied glory, sometimes stripping it back to its barest essentials. *Colour Mania* brings together an eclectic group of talented designers who have one thing in common: they are artists who simply can't get enough of one particular color be that red, orange, yellow, green, blue, purple, black or white. This book offers a depth of understanding of individual colors that is unprecedented.

*Color Mania* Caitlin Langford, 2023-01-17 Autochromes—plates made from a pioneering color photography process—are too light sensitive to exhibit, and as such one of the world's greatest collections has been hidden from view until now. Offering unprecedented access to the V&A's collection of autochromes—one of the greatest collections of early color photography in the world—*Color Mania* presents the pioneering photographic process in its full, vibrant, and painterly beauty. Fragile and light sensitive,

autochromes cannot be displayed in public, and so this volume provides a rare and breathtaking opportunity to view them true to size. Invented by the Lumiere brothers, who were also pioneers of cinema, the autochrome was the first widely available color photography process and remained popular for two decades. Upon its commercial release in 1907, it was eagerly embraced by Pictorialist photographers and advocated by its leading member Alfred Stieglitz, who predicted “soon the world will be color-mad.” Newly photographed specially for this book, the V&A’s abundant collection of autochromes is brought to the public for the very first time. Organized thematically and with sections focusing on the photographers who engaged with the process, *Color Mania* is built upon the latest scholarship and research by curator Catlin Langford and includes insights into how these extraordinary photographs are being preserved for future generations. An opportunity to travel in time and understand a tour de force in photographic technology, *Color Mania* will delight anyone who desires to experience the past in color.

*Color and Mastering for Digital Cinema* Glenn Kennel, 2012-07-26 *Color and Mastering for Digital Cinema* explores the implications for motion picture post production processes and changes required to the supporting equipment and software. While a new concept to

the motion picture community, the selection of the wide gamut, output-referred XYZ color space for digital cinema distribution is based on decades of color science and experience in other industries. The rationale for choosing XYZ and the other color encoding parameters is explained and the book also provides a full case study of the development of DLP Cinema® projectors by Texas Instruments. Finally, this book explores how the XYZ color encoding concept can be extended to support enhanced display technologies in the future. This book contains:

- \* Brilliant 4-color illustrations that compliment the color science explanations
- \* Never before published industry information from author Glenn Kennel, a world leader in digital cinema color technology
- \* Descriptions of key issues and background on decisions that were made in the standardization process

By Glenn Kennel, Glenn Kennel is VP/GM of Feature Film Services at Laser Pacific Media Corporation, a leading provider of a full range of post production services for television and feature film. Recently, he worked for the DLP Cinema group of Texas Instruments in a role that included technology and business development. Previously, in a twenty year career with Kodak, he led the development of the Cineon digital film scanners and laser recorders and the prototype HDTV telecine that became the Spirit Datacine. As a consultant, he helped DCI draft the technical specifications for digital cinema. Kennel also chairs the SMPTE DC28 Color ad hoc group and the DC28.20 Distribution working group. He is a SMPTE Fellow and has received the SMPTE Journal Award. He is also a member of the Academy of Motion Picture Arts and Sciences.

**Nitrate Won\_Ñét Wait** Anthony Slide,2013-05-03 This study looks at the preservation process: newsreel, television, and color preservation; the often controversial issue of colorization; and commercial film archives. It provides detailed histories of the major players in the preservation battle including the International Museum of Photography at George Eastman House, the American Film Institute, the Museum of Modern Art, the UCLA Film and Television Archive, and the Library of Congress. This first historical overview of film preservation in the United States is also highly controversial in its exposure and criticism of the politicization of film preservation in recent years, and the rising bureaucracy which has often lost sight of preservation and restoration as the ultimate purpose of film archives.
