**US Combat Engineer 1941–45** Gordon L. Rottman, 2012-06-20 At its peak in World War II, the United States Army contained over 700 engineer battalions, along with numerous independent brigades and regiments. The specialized soldiers of the Engineers were tasked with a wide variety of crucially important tasks including river bridging, camouflage, airfield construction, and water and petroleum supply. However, despite their important support roles, the engineers were often employed on the front lines fighting beside the general infantry in the desperate battles of the European theatre. This book covers the role of these soldiers, from their recruitment and training, through their various support missions and combat experiences, forming an account of what it was truly like to be a combat engineer in World War II.

**Engineer Operations** U S Army, 2014-10-17 FM 3-34 is the Army doctrine publication that presents the overarching doctrinal guidance and direction for conducting engineer activities and shows how it contributes to decisive action. It provides a common framework and language for engineer support to operations and constitutes the doctrinal foundation for developing other fundamentals and tactics, techniques, and procedures detailed in subordinate doctrine manuals. This manual is a key integrating publication that links the doctrine for the Engineer Regiment with Army capstone doctrine and joint doctrine. It focuses on synchronizing and coordinating the diverse range of capabilities in the Engineer Regiment to support the Army and its mission successfully. FM 3-34 provides operational guidance for engineer commanders and trainers at all echelons and forms the foundation for United States (U.S.) Army Engineer School curricula.

**A Combat Engineer with Patton's Army** Lois Lembo, Leon Reed, 2020-06-09 "An engaging and often frightening story" of a member of the 305th Engineering Battalion of the 80th Infantry Division (Andrew Z. Adkins III, coauthor of *You Can't Get Much Closer Than This*). A Combat Engineer with Patton's Army is the untold story of Frank Lembo, one of George Patton's men who helped move the American command in the battle of Argentan in the Normandy Campaign, in the high-speed pursuit of the German Wehrmacht eastward across France, and in the brutal battles waged during the Battle of the Bulge and during the final combats along the borders of the collapsing Reich. Throughout his time in Europe, Lembo maintained a running commentary of his experiences with Betty Craig, his fiancée and future wife. This extensive correspondence provides a unique eyewitness view of the life and work of a combat engineer under wartime conditions. As a squad (and later platoon) leader, Frank and his comrades cleared mines, conducted reconnaissance behind enemy lines, built bridges, and performed other tasks necessary to support the movement of the 317th, 318th, and 319th Infantry Regiments of the Blue Ridge Division—Patton's workhorses, if not his glamour boys. Frank's letters go beyond his direct combat experiences to include the camaraderie among the GIs, living conditions, weather, and the hijinks that helped keep the constant threat of death at bay. His letters also worked to reassure Betty with hopeful dreams for their future together. Including dozens of previously unpublished photographs, *A Combat Engineer with Patton's Army* offers the rare perspective of what day-to-day warfare at the ground-level looked like in the European Theater through the eyes of one of the men spearheading the advance.
