Combatants to Civilians D.B. Subedi,2018-05-07 Much has been written about reintegration of ex-combatants in a traditional or conventional disarmament, demobilisation and reintegration (DDR) programme. This volume examines reintegration of ex-combatants in a un-conventional DDR in which a cash-based scheme replaced a reintegration programme. It uncovers the dilemmas surrounding the un-conventional DDR programme in Nepal, situating the phenomena in the divisive politics of war to peace transition. Drawing on the narratives and perceptions of ex-combatants and their families, the volume provides a compelling analysis of why some ex-combatants reintegrate socially and economically better than others at the end of a war. Analysing the consequences and effects of reintegration of Maoist ex-combatants in the post-conflict peace and security, the volume argues that cash-based schemes in DDR programme can pacify ex-combatants and de-politicise a DDR programme but cash alone can not reintegrate ex-combatants.

Female Combatants in Conflict and Peace Seema Shekhawat,2015-07-21 This edited volume illuminates the role of women in violence to demonstrate that gender is a key component of discourse on conflict and peace. Through an examination of theory and practice of women's participation in violent conflicts, the book makes the argument that both conflict and post-conflict situations are gender insensitive.

Civilian Or Combatant? Anicée Van Engeland,2011-03-23 This title describes how the practice and evolution of warfare have turned international humanitarian law into an enigmatic law that is complex to understand, interpret, and enforce. It identifies the challenges that advocates of international humanitarian law face, which range from genocide, asymmetrical warfare, and terrorism to rape as a weapon. The author demonstrates that this branch of international law is in constant evolution.

Reintegration of Ex-Combatants After Conflict W. Kilroy,2015-04-28 Reintegration programmes for ex-combatants are supposed to support the wider peace process. This study, based on detailed fieldwork, looks at the way they were carried out in Sierra Leone and Liberia and assesses the degree to which they were conducted in a participatory way.

Female Ex-Combatants, Empowerment, and Reintegration Michanne Steenbergen,2022-02-24 *Female Ex-Combatants, Empowerment, and Reintegration* investigates the role of United Nations-led Disarmament, Demobilization, and Reintegration (DDR) programs in undermining female ex-combatants' empowerment. The participation of female combatants in conflict has increasingly been recognized in feminist literatures and in policies and programs concerned with reintegrating ex-combatants and building peace. This has illustrated that female ex-combatants often experience empowerment through their role as combatant; however, this empowerment is often lost upon reintegration. UN-led DDR plays an important role in the broader peacebuilding process, as it is one of the largest interventions and directly aims to reintegrate ex-combatants into civilian life. This book draws on extensive field research and interviews with female ex-combatants and DDR officials in Liberia and Nepal to develop a nuanced and comprehensive picture of female ex-combatants' empowerment and how this is undermined by DDR. Through reconceptualized frameworks of empowerment and an emancipatory peace, the book explores the pivotal role that DDR programs play in undermining female ex-combatants' empowerment. The author argues that this is detrimental to peacebuilding, because DDR officials and documentation narrate female ex-combatants in limited and gendered ways, which reproduces gendered inequalities and define how female ex-combatants should behave. This book will be of great interest to scholars and practitioners working on gender, conflict, peace, security, and development.

Ex-Combatants and the Post-Conflict State J. McMullin,2013-08-22 This book provides a critical analysis of the reintegration challenges facing ex-combatants. Based on extensive field research, it includes detailed case studies of ex-combatant reintegration in Namibia, Mozambique, Sierra Leone, and Liberia.

Disarmament, Demobilisation and Reintegration of Ex-Combatants in Africa Ibrahim Bangura,2023-07-17 This book critically examines the approaches to Disarmament, Demobilisation and Reintegration (DDR) of ex-combatants programming in Africa. Drawing on empirical evidence from across the continent, the book investigates the different theories, contextual realities and approaches that have informed the establishment and implementation of such programmes, the opportunities they have provided for stability, peace and security, and the challenges with which they have contended. The book combines broader theoretical analysis with country-specific case studies, including Nigeria, the Central African Republic, South Sudan, Somalia, Liberia, Sierra Leone, Burundi, Zimbabwe, South Africa, and the Democratic Republic of Congo. Overall, the book asks how DDR programming has evolved in Africa, what factors have contributed to the success or failure of DDR processes, and what we can expect for DDR in Africa in the future. This book will be a useful guide for students and researchers across the fields of Peace and Conflict Studies, Security Studies, History, Political Science, Sociology, and African Studies.

Combat Air Forces of World War II, Army of the United States United States. Army Air Forces. Personnel Narratives Division,1945

Other Combatants, Other Fronts James Kitchen,Alisa Miller,Laura Rowe,2011-01-18 The First World War is a subject that has fascinated the public as well as the

academic community since the close of hostilities in 1918. Over the past thirty years in particular, the historiography associated with the conflict has expanded considerably to include studies whose emphases range between the economic, social, cultural, literary, and imperial aspects of the war, all coinciding with revisions to perceptions of its military context. Nevertheless, much of the discussion of the First World War remains confined to the experiences of a narrow collection of European armies on the battlefields of Northern France and Belgium. This volume seeks to push the focus away from the Western Front and to draw out the multi-spectral nature of the conflict, examining forgotten theatres and neglected experiences. The chapters explore the question of what ‘total war’ meant for the lives of people around the world implicated in this momentous event, broadening current debates on the First World War as well as developing, reinforcing, and refining the existing categories of analysis. The chapters are grouped into sections that reflect neglected elements of the transnational interpretation of the conflict and aspects of the total war debate. These encompass alternative forms of mobilisation, issues of neutrality, ideas of racial identity, and the scope of violence. The volume thus not only expands First World War studies but also contributes to the wider discourse on the shifting nature of warfare in the nineteenth and twentieth centuries. With chapters by leading scholars and early career researchers, this volume draws on a diverse range of original archival research undertaken across disciplinary and national boundaries. The contributions to the volume provide an analysis of the conflict that draws out its full breadth and complexity. The First World War demonstrated the critically important relationship between national mobilisation and total war, and saw multiple mobilisations and re-mobilisations of European populations. This theme is explored at the national, regional, and local levels through examinations of the Sicilian province of Catania, the role of science in France and Britain, and the utilisation of the narrative of maritime heroism surrounding the British sailor Jack Cornwell. For Europe’s neutrals the First World War was often as total in its effects as for those states engaged in military operations. Chapters analyse the diverse range of these experiences of neutrality, from the economy and people of the Netherlands to the attitudes of Switzerland’s intellectuals. Racial interpretations of modern conflict have defined much of the historiography of total war. The complexities of racial analysis with respect to total war are highlighted in chapters dealing with white colonial internees in German East Africa, the treatment of prisoners of war in Europe, and the recruitment of India’s ‘primitive’ peoples for service in labour units. The final section of the volume considers the scale and broad scope of the violence unleashed during the First World War. Chapters on the continuation of German naval war culture after the conflict, the shaping of personal narratives of the war in the Ottoman Empire, and anti-alien violence among veterans in Canada serve to reinforce the extent to which the conflict affected wider aspects of twentieth-century history around the globe. Other Combatants, Other Fronts sheds light on the diverse experiences of neutral and belligerent states, and their combatants and civilians, during the tumultuous events of 1914-18. This brings to the fore the extent to which the mechanisms of conflict developed during the struggle had a truly global reach, and the impact this has had ever since in defining modern conflict. The collection reinforces the notion that although the First World War was a vast and often bewildering industrial conflict, it was ultimately a very human phenomenon.
