*LEGO Ninjago #11: Comet Crisis* Greg

Farshtey, Jolyon Yates, 2014-09-16 The Masters of Spinjitzu are stuck on a comet, having traveled through space to save the World of Ninjago from the Nindroids. As they race through the stars, it becomes apparent that they are not alone on the comet. Something has stowed away... Something not of their world...

Arthur and the Comet Crisis Marc Brown, Stephen Krensky, Peter K. Hirsch, 2002 Arthur series/Chapter Books.

*Haley Comet and the Calculon Crisis* William Potter, 2020-07-30 Captain Haley Comet is looking for a few good mathstronauts to help her maintain peace in the galaxy. They'll need a special set of skills to deal with the calculating aliens of the planet Calculus. Thrilled readers will want to immerse themselves in this diverting storyline and use their knowledge of fractions, symbols, operations, and more math concepts to avoid an interstellar war. Bright illustrations add excitement to the sci-fi story, while math problems are an integral part of the imaginative plot.

**The Night of the Comet** George Bishop (Jr.), 2013 Fourteen-year-old Alan Broussard is swept up in his science teacher father's community-wide comet-watching activities, which illuminate for the young teen his father's inadequacies, his mother's unhappiness, and his own loss of innocence.

VC10: Icon of the Skies Lance Cole, 2017-03-30 "An excellent account of the political battles and the commercial skulduggery . . . and its

outstanding service as a transport and tanker with the RAF.” –Firetrench The VC10 was the nation’s biggest jet airliner of its age and regarded as the world’s best-looking airliner. It was safe, fast, and designed to take off from short runways in Africa and Asia, at the request of its main operator BOAC–the airline that would later go on to become today’s British Airways. The VC10 and the larger Super VC10 were beloved by pilots and passengers alike and became icons of the 1960s. They were hugely popular all over the world. Yet the VC10 was eclipsed by Boeing’s 707 which sold by the hundreds, despite the fact that the 707 was less capable and could not initially operate from the runways of the Commonwealth and old British Empire routes, as the VC10 undoubtedly could. This book blends the story of VC10 development with a well-researched tale of corporate and political power play. It asks; just what lay behind the sales failure of the VC10? Politics played an important part of course, as did BOACs tactics, and a whodunnit cast of politico-corporate events and machinations at the highest level of society during the dying days of Empire in 1960s Britain. Key players in the story, from Tony Benn to famous test pilot Brian Trubshaw (Concorde), are cited and quoted. By exploring this historical period in depth and highlighting all the various impediments that stood in the way of success for the VC10, Lance Cole adds an important layer to our understanding of twentieth century history.

Only Nya, Jay, Cole, and Kai -- the Masters of Spinjitzu -- can save the day . . . or are they? Much to the brave warriors' astonishment, a new gray ninja is on the scene! Is the Phantom Ninja friend or foe, and will his reckless fighting style sabotage the rescue mission before it even starts?

*Hunting and Imaging Comets* Martin Mobberley, 2010-10-08 For many astronomers, the holy grail of observation is to discover a comet, not least because comets always bear the name of their discoverer! *Hunting and Imaging Comets* was written for comet hunters and digital imagers who want to discover, rediscover, monitor, and make pictures of comets using astronomical CCD cameras and DSLRs. The old days of the purely visual comet hunter are pretty much over, but this is not to say that amateurs have lost interest in finding comets. The book also covers the discovery of comet fragments in the SOHO image data, CCD monitoring of older comets prone to violent outbursts, the imaging of new NEOs (Near Earth Objects) that have quite often been revealed as comets - not asteroids - by amateur astronomers, and the finding of recent comets impacting Jupiter.

**Comets, Popular Culture, and the Birth of Modern Cosmology** Sara Schechner,2021-03-09 In a lively investigation into the boundaries between popular

culture and early-modern science, Sara Schechner presents a case study that challenges the view that rationalism was at odds with popular belief in the development of scientific theories. Schechner Genuth delineates the evolution of people's understanding of comets, showing that until the seventeenth century, all members of society dreaded comets as heaven-sent portents of plague, flood, civil disorder, and other calamities. Although these beliefs became spurned as vulgar superstitions by the elite before the end of the century, she shows that they were nonetheless absorbed into the science of Newton and Halley, contributing to their theories in subtle yet profound ways. Schechner weaves together many strands of thought: views of comets as signs and causes of social and physical changes; vigilance toward monsters and prodigies as indicators of God's will; Christian eschatology; scientific interpretations of Scripture; astrological prognostication and political propaganda; and celestial mechanics and astrophysics. This exploration of the interplay between high and low beliefs about nature leads to the conclusion that popular and long-held views of comets as divine signs were not overturned by astronomical discoveries. Indeed, they became part of the foundation on which modern cosmology was built.

Asteroid Strike Alex Woolf, 2013-06-20 Can you imagine what our lives would be like after a devastating asteroid strike? What effect would the resulting tsunami, storms, and dust cloud have? What would happen to the climate, wildlife, and

our food supplies? This book traces the possible consequences of a global event on this scale, with ideas and evidence based on similar scenarios that are a part of fact and fiction.

**A World After an Asteroid Strike** Alex

Woolf, 2013-07 Imagines what the world would be like if an asteroid struck Earth, speculating on the types of immediate and long-term damage that would result and how people would adapt to their new environment.

*His Stubbornship: Prime Minister Wang Anshi (1021--1086), Reformer and Poet* Jonathan O.

Pease, 2021-10-05 China's most controversial prime minister, path-breaking reformer, and an iconic Song-dynasty poet, Wang Anshi (1021–1086) is fully chronicled in English for the first time in almost a century, with a new emphasis on his luminous late verse.

*Dynamics of Comets and Asteroids and Their Role in Earth History* Shin Yabushita, Jacques

Henrard, 1998-10-31 The last decade of this century has seen a renewed interest in the dynamics and physics of the small bodies of the Solar System, Asteroids, Comets and Meteors. New observational evidences such as the discovery of the Edgeworth-Kuiper belt, refined numerical tools such as the symplectic integrators, analytical tools such as semi-numerical perturbation algorithms and in general a better understanding of the dynamics of Hamiltonian systems, all these factors have converged to make possible and worthwhile the study, over very long time spans, of these minor objects. Also the public, the media and even some political assell}blies have become aware that

these minor objects of our planetary environnement could become deadly weapons. Apparently they did have a role in Earth history and a role more ominous than predicting defeat (or victory, why not?) to batches of credulous rulers. Remembering what may have happened to the dinosaurs but keeping all the discretion necessary to avoid creating irrational scares, it may not be unwise or irrelevant to improve our knowledge of the physics and dynamics of these objects and to study in particular their interactions with our planet.

#### Blazing a Ghostly Trail Peter Grego, 2013-10-19

Ice and Fire: Great Comets to Come was written because a special celestial event climaxes towards the end of 2013 – the arrival, fresh from the Oort Cloud, of Comet C/2012 S1 (ISON). By all predictions – even the most pessimistic ones – this comet is set to be one of, perhaps the most, dazzling comet seen in modern history and has the astronomical world buzzing with anticipation. Skywatchers have already been primed for C/2012 (ISON) earlier in 2013 with the apparition of another naked-eye comet, C/2011 L4 (PanSTARRS), and following C/2012 S1 (ISON) there is the

prospect of 2012 K1 (PanSTARRS) reaching naked eye visibility in August 2014. Future bright cometary prospects are also discussed, taking into account the latest predictions. Examining the origin and nature of comets using examples of great comets from the past, this book sets the scene for the arrival of Comet C/2012 S1 and those following it over the next few years in the inner Solar System. Skywatchers and amateur astronomers can learn how to follow, observe and record comets. There is also a guide on how to keep abreast of the latest cometary discoveries and how to use a variety of reputable sources, including publications, websites, programs and apps to visualize and plan observations. The role of the amateur in cometary discovery also is featured, as well as details on how professional astronomers plan to get the most 'science' out of cometary apparitions, how and why professionals go about discovering comets, and upcoming plans to visit comets with space probes (and later, perhaps, human visits). Illustrations provide historic images of comets, images from space probes and images of the latest bright comets. Orbital plots and easy-to-follow sky charts are also included. This book is a unique guide that sets the scene by giving a comprehensive history of comets and examples of great comets throughout history and informs the reader about the nature and origins of this spectacular occurrence. Expectations are fully covered by explaining not only what the regular person can expect to see, but how amateur astronomers can plan observations and what steps the professionals are taking to 'get the most

science' from this exciting event.
