The World Health Report 2006 World Health Organization,2006-03-23 The 2006 World Health Report focuses on the chronic shortages of doctors, midwives, nurses and other health care support workers in the poorest countries of the world where they are most needed. This is particularly true in sub-Saharan Africa, which has only four in every hundred global health workers but has a quarter of the global burden of disease, and less than one per cent of the world's financial resources. Poor working conditions, high rates of attrition due to illness and migration, and education systems that are unable to pick up the slack reflect the depth of the challenges in these crisis countries. This report considers the challenges involved and sets out a 10-year action plan designed to tackle the crisis over the next ten years, by which countries can strengthen their health system by building their health workforces and institutional capacity with the support of global partners.

Children Who Resist Post-Separation Parental Contact Barbara Jo Fidler,Nicholas Bala,Michael A. Saini,2012-09-13 Interest in the problem of children who resist contact with or become alienated from a parent after separation or divorce is growing, due in part to parents' increasing frustrations with the apparent ineffectiveness of the legal system in handling these unique cases. There is a need for legal and mental health professionals to improve their understanding of, and response to, this polarizing social dynamic. Children Who Resist Post-Separation Parental Contact is a critical, empirically based review of parental alienation that integrates the best research evidence with clinical insight from interviews with leading scholars and practitioners. The authors - Fidler, Bala, and Saini - a psychologist, a lawyer and a social worker, are an multidisciplinary team who draw upon the growing body of mental health and legal literature to summarize the historical development and controversies surrounding the concept of alienation and explain the causes, dynamics, and differentiation of various types of parent-child relationship issues. The authors review research on prevalence, risk factors, indicators, assessment, and measurement to form a conceptual integration of multiple factors relevant to the etiology and maintenance of the problem of strained parent-child relationships. A differential approach to assessment and intervention is provided. Children's rights, the role of their wishes and preferences in legal proceedings, and the short- and long-term impact of parental alienation are also discussed. Considering legal, clinical, prevention, and intervention strategies, and concluding with recommendations for practice, research, and policy, this book is a much-needed resource for mental health professionals, judges, family lawyers, child protection workers, mediators, and others who work with families dealing with divorce,

separation, and child custody issues.

Language Choice in Postcolonial Law Richard Powell,2020-02-24 This book discusses multilingual postcolonial common law, focusing on Malaysia's efforts to shift the language of law from English to Malay, and weighing the pros and cons of planned language shift as a solution to language-based disadvantage before the law in jurisdictions where the majority of citizens lack proficiency in the traditional legal medium. Through

analysis of legislation and policy documents, interviews with lawyers, law students and law lecturers, and observations of court proceedings and law lectures, the book reflects on what is entailed in changing the language of the law. It reviews the implications of societal bilingualism for postcolonial justice systems, and raises an important question for language planners to consider: if the language of the law is changed, what else about the law changes?

Thomas Mann's War Tobias Boes,2019-11-15 In Thomas Mann's War, Tobias Boes traces how the acclaimed and bestselling author became one of America's most prominent anti-fascists and the spokesperson for a German cultural ideal that Nazism had perverted. Thomas Mann, winner of the 1929 Nobel Prize in literature and author of such world-renowned novels as Buddenbrooks and The Magic Mountain, began his self-imposed exile in the United States in 1938, having fled his native Germany in the wake of Nazi persecution and public burnings of his books. Mann embraced his role as a public intellectual, deftly using his literary reputation and his connections in an increasingly global publishing industry to refute Nazi propaganda. As Boes shows, Mann undertook successful lecture tours of the country and penned widely-read articles that alerted US audiences and readers to the dangers of complacency in the face of Nazism's existential threat. Spanning four decades, from the eve of World War I, when Mann was first translated into English, to 1952, the year in which he left an America increasingly disfigured by McCarthyism, Boes establishes Mann as a significant figure in the wartime global republic of letters.

Counseling Individuals With Life-Threatening Illness Kenneth J. Doka,2008-09-15 Life-threatening illness is not only a medical crisis; it is a psychological, social, and spiritual crisis as well. Also, serious illness affects not only the patient, but the patient's family. Therefore, the two major premises of this book are that care in life-threatening illness must be holistic, and it must be family centered. Doka presents an insightful, comprehensive guide for counselors, social workers, and health care professionals, as they assist clients experiencing a serious illness. The book builds on a model developed by the author, based upon earlier work by Avery Weisman and E. M. Patterson. Doka's model presents illness as a series of phases: Prediagnostic: individuals may decide how to handle troubling symptoms or to take certain diagnostic tests Diagnostic: centered on the existential crisis posed by the diagnosis Chronic: individuals must cope with the disease and treatment Recovery: acknowledges that even when individuals survive an encounter with life-threatening illness, there are still considerable issues that must be resolved Terminal phase: individuals deal with the inevitability of death /uil In his discussion of each phase, the author delineates specific tasks for patients to perform and the issues they must adapt to. He also presents strategies for counselors and health care professionals to use with individuals in each phase of illness.
