Handbook of Communication in Organisations and Professions Christopher N. Candlin, Srikant Sarangi, 2011-08-29 This volume presents major contributions of Applied Linguistics to the understanding of communications in the professions. The first two parts of this book deal with the theoretical and methodological orientations of professional communication studies, the history and development of professional communication studies, highlighting the discursive turn of Applied Linguistic research that goes far beyond the established paradigm of Language for Specific Purposes. The third part - the core of this book - presents research into professional practices from various domains (e.g. law, healthcare, business and management, organizations), sites of engagement (as e.g. lawyer-client-conference, doctor-patient interaction) and with respect to different themes that are generalizable across domains and sites (as e.g. communicative aspects of action and practice, of assessment and appraisal). In the final part, professionals from various domains evaluate the contribution to their work so far made by Applied Linguistics.

No-Drama Project Management Bart Gerardi, 2012-01-13 No-Drama Project Management: Avoiding Predictable Problems for Project Success is a book for project managers who want or need to be more effective. Having a project crash and burn is never a great situation, author Bart Gerardi explains, but it's not a career buster—unless the failure appears on the short list of recurring, avoidable problems that can and will pop up during any project. If your project fails due to a lack of planning, for example, expect a trip to the woodshed. Why? Your “unexpected problem” was actually both predictable and avoidable. This book is an exploration of the preventable problems that cause project failures and how to steer clear of them. It includes far more than simple rookie mistakes like trying to please the wrong stakeholder or misunderstanding your role on the team. Those who have been around the block a few times will also find tips and insights that can help them reignite a stalled or meandering career. The sections on managing change adroitly or handling truly unexpected challenges, for example, can get veteran project managers back on track. There are plenty of books about the science of project management that cover such things as creating a work-breakdown structure or a Gantt chart. No-Drama Project Management is about the art of project management. It contains methods and techniques—illustrated with stories from Gerardi's rich store of experiences—that'll help project managers shine and become promotable. This book: Describes the common obstacles that all projects face, and how to defuse or avoid them Explains how project managers can hold a mirror to their own performance and improve it Shows project managers how to become masters at expecting the unexpected and thereby ratcheting up their success rates

Branding with Brains Tjaco Walvis, 2012-10-12 What has neuroscience got to do with branding? The link may not be immediately obvious, but the fact is, our brains select brands in much the same way that Google selects websites. So, just as web marketers play on Google's algorithm to make sure their site appears as high up the search list as possible, brand marketers should play on the brain's algorithm to make sure their brand is at the top of their customers' minds at the moment they choose which brand to buy. This ground-breaking new book brings the proven effects of hard science to the creative practice of branding. It shows you how to harness this powerful combination to your own advantage by helping you understand how customers' brains work when they choose brands. A strong brand cannot be built effectively without taking into account the laws of the brain – which, as this book shows, really exist and can be scientifically proven to work. Once you know this, you can apply the familiar branding laws of relevance, coherence and participation more precisely, more confidently and to much greater effect. This means your brand will have a much greater chance of being chosen by customers than your competitors' brands. *Branding with Brains* shatters the conventional approach to branding, which is based on hunches and intuition, by uncovering the hard, scientific truth about why customers choose some brands over others. Insights into company stories, from Leica to Innocent Drinks, from Starbucks to Schiphol International Airport, give you the fascinating truth about how the processes that go on in our brain affect our decisions to buy a particular product or service. All in all, this breathtakingly radical new book from Tjaco Walvis presents a daringly different, state of the art approach to brand strategy that will help you build powerful brands more efficiently, more effectively and more reliably than ever before. Branding really is all in the mind – and this book proves it!
