⬜ *From Usenet to CoWebs* Christopher Lueg,Danyel Fisher,2012-12-06 Beginning with a brief outline of Usenet's general structure and development over the past few years, the book addresses the problems of exploring virtual communities and distributed information systems in general, and of finding information in electronic information environments. It covers traditional approaches such as information filtering, collaborative filtering and information retrieval, outlining their successes and failures, and discusses the prospects of novel approaches such as visualisations of social processes and social navigation.

⬜ **Information and Communication Technologies in Action** Larry D. Browning,Alf Steinar Saetre,Keri Stephens,Jan-Oddvar Sornes,2010-09-28 This book combines 20 stories from a variety of organizations with a selection of nine theories, both mainstream and emerging. The stories introduce readers to individuals talking about how they communicate today via information and communication technologies (ICTs) in business or organizational contexts. The theories, presented in accessible language, illuminate the implicit patterns in these stories. This book demonstrates how and why these technologies are used under myriad circumstances.

⬜ *Java Network Programming and Distributed Computing* David Reilly,Michael Reilly,2002 Java's rich, comprehensive networking interfaces make it an ideal platform for building today's networked, Internet-centered applications, components, and Web services. Now, two Java networking experts demystify Java's complex networking API, giving developers practical insight into the key techniques of network development, and providing extensive code examples that show exactly how it's done. David and Michael Reilly begin by reviewing fundamental Internet architecture and TCP/IP protocol concepts all network programmers need to understand, as well as general Java features and techniques that are especially important in network programming, such as exception handling and input/output. Using practical examples, they show how to write clients and servers using UDP and TCP; how to build multithreaded network applications; and how to utilize HTTP and access the Web using Java. The book includes detailed coverage of server-side application development; distributed computing development with RMI and CORBA; and email-enabling applications with the powerful JavaMail API. For all beginning to intermediate Java programmers, network programmers who need to learn to work with Java.

⬜ **The Internet Companion** Tracy L. LaQuey,Jeanne C. Ryer,1993 Introduces the worldwide computer networks on the Internet, including how to tap into university research databases, online archives, and vast social networks.

⬜ **FCC Record** United States. Federal Communications Commission,2018

⬜ *Crisis Communication* Alan Jay Zaremba,2014-12-18 Crises happen. When they do, organizations must learn to effectively communicate with their internal and external stakeholders, as well as the public, in order to salvage their reputation and achieve long-term positive effects. Ineffective communication during times of crisis can indelibly stain an organization's reputation in the eyes of both the public and the members of the organization. The subject of crisis communication has evolved from a public relations paradigm of reactive image control to an examination of both internal and external communication, which requires proactive as well as reactive planning. There are many challenges in this text, for crisis communication involves more than case analysis; students must examine theories and then apply these principles. This text prepares students by: Providing a theoretical framework for understanding crisis communication Examining the recommendations of academics and practitioners Reviewing cases that required efficient communication during crises Describing the steps and stages for crisis communication planning Crisis Communication is a highly readable blend of theory and practice that provides students with a solid foundation for effective crisis communication.

⬜ *The USENET Book* Bryan Pfaffenberger,1995 Newsgroups cover a wide range of subjects and attract people throughout the world to exchanger opinions and engage in electronic debates. This book focuses on every aspect of USENET discussion groups - finding, subscribing and contributing - and explains how to avoid making netiquette blunders. It also explains how to navigate the newsgroups to find useful information. An encylopaedic section fully describes the focus, mission and character of nearly 800 useful newsgroups.

⬜ **Securing E-Business Applications and Communications** Jonathan S. Held,John Bowers,2001-06-22 This book walks readers through the process of setting up a secure E-commerce Web site. It includes implementation examples for Unix (Solaris and Linux), Windows NT 4.0, and Windows 2000. The authors pay particular attention to the security issues involved. They also highlight the plethora of encryption algorithms that are instrumental in securing data. Together, the authors and the reader develop a site from concept to implementation. The material makes use of numerous coding examples to illustrate how to use the most current technologies - from Microsoft, Sun, and others - to support secure transactions.

⬜ **Business Data Communications** Raymond R. Panko,1997 Teach networking your way. Modular design lets you tailor material to your personal teaching approach. The printed text has 11 core chapters plus 10 advanced modules. Additional readings as the book's website give you more basic material plus hot-off-the-press information. Can serve as one-quarter course, but enough material for a two-semester course.

⬜ **The Internet for Radiology Practice** Amit Mehta,2007-11-23 The Internet has proven to be a great resource for the medical community. It has specifically had a great impact on the practice of Radiology. It has enabled the proliferation, installation, and acceptance of adjunct technologies such as Picture Archiving (PACS), electronic medical record (EMR) and Voice Recognition (VR). The number of radiology-specific web sites just 5 years ago was about 30. A recent compilation now numbers in the thousands. Computer technology and the Internet have revolutionized the way radiologists work on a daily basis. All aspects of the Internet and related technologies are explained in this book.

⬜ *Community Networks* Andrew Michael Cohill,Andrea L. Kavanaugh,1997 Here is a revealing look at the five-year evolution of the Blacksburg Electronic Village (BEV)--the groundbreaking venture that has linked the citizens of Blacksburg, Virginia, to each other and to the rest of the world, based on 100% Internet technology. The book addresses the social, economic, technical, and educational impact of living in a connected town, describes current services, and
