Integrated Marketing Communications in Risk and Crisis Contexts Robert S. Littlefield, Deanna D. Sellnow, Timothy L. Sellnow, 2021-03-09 Integrated Marketing Communications in Risk and Crisis Contexts is part of the Lexington Books Integrated Marketing Communication (IMC) series. The authors present a culture centered model for examining risk and crisis communication within the context of IMC to provide a more robust understanding of myriad cultural variables affecting the

perception of risk and crisis messages and the means by which these messages are processed by different publics, particularly multicultural and international groups. While the conceptualization of what constitutes IMC has been broad, from the perspective of risk and crisis communication, the focus is quite specific: All communication and messages created and disseminated in a risk or crisis situation must be carefully created and strategically presented if the intended outcomes associated with the publics' responses are to be realized by the sender of the messages.

Digital Communication Management Beatriz Peña-Acuña, 2018-09-19 The director of communication is an impassioned profession that discovers which strategies are the best and the most intelligent. There are few manuals, and there are some that offer general and sparsely updated information about the change that new technologies imply. We find the literature isolated that can be directly useful. However, we will say that there is no single recipe for DirCom or communication consultants. Each one will offer different models according to the variables or factors that seem to them to be able to rectify the direction of a company according to his or her personal mood.

Manager's Guide to Excellence in Public Relations and Communication Management David M. Dozier, Larissa A. Grunig, James E. Grunig, 2013-10-18 This book reports findings of a three-nation study of public relations and communication management sponsored by the International Association of Business Communicators (IABC) Research Foundation. The Excellence Study provides communication managers and public relations practitioners with information critical to their own professional growth, and supplies organizations with tools that help them communicate more effectively and build beneficial relations with key publics. Communication excellence is a powerful idea of

sweeping scope that applies to all organizations -- large or small -- that need to communicate effectively with publics on whom the organization's survival and growth depend. The essential elements of excellent communication are the same for corporations, not-for-profit organizations, government agencies, and professional/trade associations. And they are applicable on a global basis. The study identifies three spheres of communication excellence. These spheres consider the overall function and role of communication in organizations, and define the organization of this book. They are: * the core or inner sphere of communication excellence -- the knowledge base of the communication department, * the shared expectations of top communicators and senior managers about the function and role of communication, and * the organization's culture -- the larger context that either nurtures or impedes communication excellence. This text also examines communication excellence as demonstrated in specific programs developed for specific publics.

Digital Communications. Differences between Many-To-Many, One-To-Many and One-To-One
Thorunn Egilsdottir, 2019-11-15 Essay from the year 2019 in the subject Business economics - Corporate communication, grade: 80%, University of Salford (The Digital Marketing Institute Ireland), language: English, abstract: This document looks at the evolution of one-to-one, one-to-many and many-to-many communications and reveals the main differences between these communication approaches. A separate section will take a closer look at social media which have influenced how audiences want to be marketed to today. The world can be divided into physical and virtual parts. Prensky distinguishes between digital natives and digital immigrants. Because digital technologies evolve very fast, companies must adapt quickly in order to interact with customers in a sustainable way. Lastly, this paper displays the techniques that are required of today's marketers. Before the Industrial Revolution enabled mass production, local store owners relied on one-to-one communication.

While storekeepers knew their customers and their individual purchase histories, it was not possible to expand to a high level of personalisation. With the arrival of print and later broadcast advertising, marketing evolved to one-to-many communications. In 1994, the World Wide Web enabled an even broader reach than television, radio and newspapers. Hackley and Kitchen wrote in 1998 that consumers are social. Early websites erased the boundaries of space and time, although they did not yet enable two-way communication. Marketers were still targeting their customers with mass media messages.
