Promoting the digitalization of small and medium-sized agri-food enterprises in Asia

and the Pacific Gálvez Nogales, E., Casari, G., 2023-12-11 Small and medium-sized enterprises (SMEs) constitute the large majority of businesses both globally and in Asia and the Pacific. Despite their undeniable importance, the literature on SMEs in general, and agrifood SMEs in particular, is relatively limited. One specific area that deserves deeper consideration is the extent of digital engagement of agrifood SMEs along the agrifood value chain, from farm to retail and food services, in countries in Asia and the Pacific. The goal of this publication is to understand the current status of digitalization of agri-SMEs in Asia and the Pacific, what this process looks like and how to improve it. A value-chain approach was adopted to evaluate the digital maturity of all types of agri-SMEs across previously siloed categories – from farm to fork, and in the core and the extended value chain. The report analyses the benefits of digital transformation for agri-SMEs and the challenges they face in this process. Next, the report outlines practical and actionable measures that governments and other stakeholders may undertake to help agrifood SMEs stay ahead in the digital age. Special attention is given to the creation of a digital environment that enables agri-SMEs to increase the efficiency of their operations and allow them to grow. This is particularly important given that many agri-SMEs are located in rural agricultural areas, (where more than half of the population in Asia and the Pacific still resides), but where the environment is less favourable to digital transformation.

Asia Small and Medium-Sized Enterprise Monitor 2021 Asian Development Bank, 2021-12-01 The Asia Small and Medium-Sized Enterprise Monitor provides data and analysis as a resource for evidence-based policy design. This year's edition focuses on South Asia. This first volume reviews micro, small, and medium-sized enterprises (MSMEs) at the country and regional levels. It covers Bangladesh, India, Nepal, Pakistan, and Sri Lanka, and examines MSME development, access to finance, and policies and regulations. It notes that revitalizing MSMEs by channeling more growth capital to them will be key to a resilient economic recovery from the pandemic. It highlights opportunities in formalizing MSMEs and connecting them to international markets, expanding digital skills, fostering technology-based start-ups, and supporting youth and women entrepreneurs.

Small and Medium-Sized Enterprises in International Economic Law Thilo Rensmann, 2017-06-09 International economic law, with its traditional focus on large multinational enterprises, is only slowly waking up to the new reality of small and medium-sized enterprises (SMEs), entering the global marketplace. In the wake of the digital revolution, smaller companies now play an important role in the global economic landscape. In 2015 the UN expressly called for SMEs to have greater access to

international trade and investment, and it is increasingly recognized that the integration of SMEs provides one of the keys to creating a more sustainable and inclusive global economy. As SMEs increasingly permeate transnational supply chains, so interactions between these companies and international economic law and policy proliferate. *Small and Medium-sized Enterprises in International Economic Law* offers the first comprehensive analysis of the interaction between SMEs and international economic law. This book presents a broad international perspective, gathering together contributions by leading experts from academia, legal practice, and international organizations. It opens up a field of enquiry into this so far unexplored dynamic and provide a touchstone for future debate. The analysis covers a broad spectrum of international trade and investment law focusing on issues of particular interest to SMEs, such as trade in services, government procurement, and trade facilitation. Diverse perspectives illuminate regional developments (in particular within the EU) and the implications of mega-regional free trade agreements. The essays also examine questions of legitimacy of global economic governance; in particular, concerns surrounding the threat posed to the interests of domestic SMEs by the growing liberalization of international trade and investment. These essays constitute essential reading for practitioners and academics seeking to navigate a previously neglected trend in international economic law.
