Maximum Wireless Security Cyrus Peikari, Seth Fogie, 2003 0672324881.1d A detailed guide to wireless vulnerabilities, written by authors who have first-hand experience with wireless crackers and their techniques. Wireless technology and Internet security are the two fastest growing technology sectors. Includes a bonus CD packed with powerful free and demo tools to audit wireless networks. Reviewed and endorsed by the author of WEPCrack, a well-known tool for breaking 802.11 WEP encryption keys. Maximum Wireless Security is a practical handbook that reveals the techniques and tools crackers use to break into wireless networks, and that details the steps network administrators need to take to secure their systems. The authors provide information to satisfy the experts' hunger for in-depth information with actual source code, real-world case studies, and step-by-step configuration recipes. The book includes detailed, hands-on information that is currently unavailable in any printed text -- information that has been gleaned from the authors' work with real wireless hackers (war drivers), wireless security developers, and leading security experts. Cyrus Peikari is the chief technical officer for VirusMD Corporation and has several patents pending in the anti-virus field. He has published several consumer security software programs, including an encrypted instant messenger, a personal firewall, a content filter and a suite of network connectivity tools. He is a repeat speaker at Defcon. Seth Fogie, MCSE, is a former United States Navy nuclear engineer. After retiring, he has worked as a technical support specialist for a major Internet service provider. He is currently the director of engineering at VirusMD Corporation, where he works on next-generation wireless security software. He has been invited to speak at Defcon in 2003.
