**Studies on Greek and Coptic Majuscule Scripts and Books** Pasquale Orsini, 2018-11-19 The volume contains a critical review of data, results and open problems concerning the principal Greek and Coptic majuscule bookhands, based on previous research of the author, revised and updated to offer an overview of the different graphic phenomena. Although the various chapters address the history of different types of scripts (i.e. biblical majuscule, sloping pointed majuscule, liturgical majuscule, epigraphic and monumental scripts), their juxtaposition allows us to identify common issues of the comparative method of palaeography. From an overall critical assessment of these aspects the impossibility of applying a unique historical paradigm to interpret the formal expressions and the history of the different bookhands comes up, due to the fact that each script follows different paths. Particular attention is also devoted to the use of Greek majuscules in the writing of ancient Christian books. A modern and critical awareness of palaeographic method may help to place the individual witnesses in the context of the main graphic trends, in the social and cultural environments in which they developed, and in a more accurate chronological framework.

**Comparing Pathways of Desistance** Ruwani Fernando, 2024-03-12 This book presents a comparative study of desistance from crime by analysing and comparing the narratives of English and French desisters. In doing so, it uncovers how national and structural differences may lead to varying individual pathways out of crime. *Comparing Pathways of Desistance* draws on the themes of family, education, onset of offending, employment, offending, experiences and perspectives of the criminal justice system, stories of desistance, support networks, and projections into the future. In addition, this book also explores topics that are less commonly looked at in desistance studies such as ambitions of entrepreneurship and leisure activities. It examines the ways in which people make sense of their experiences of offending and desisting, identifies differences and similarities between English and French desisters, and reflects on how these differences and similarities inform us on the influences of national contexts on individual pathways of desistance. An accessible and compelling read this book will appeal to students and scholars of criminology, sociology, desistance, politics, social policy and all those interested in the differences between English and French desisters.

*The Screenwriter in British Cinema* Jill Nelmes, 2019-07-25 Though screenwriting is an essential part of the film production process, in Britain it is yet to be fully recognised as a form in itself. In this original study, Jill Nelmes brings the art of screenwriting into sharp focus, foregrounding the role of the screenwriter in British cinema from the 1930s to the present day. Drawing on otherwise unseen drafts of screenplays, correspondence and related material held in the Special Collections of the BFI National Archive, Nelmes's close textual analysis of the screenplay in its many forms illuminates both the writing and the production process. With case studies of a diverse range of key writers – from individuals such as Muriel Box, Robert Bolt and Paul Laverty, to teams such as the Carry On writers – Nelmes exposes the depth and breadth of this thriving field.

Regional Comparisons in Comparative Policy Analysis Studies Iris Geva-May, B. Guy Peters, Joselyn Muhleisen, 2020-06-29 Volume Three of the Classics of Comparative Policy Analysis, contains chapters concerned with Regional Comparisons and Policy Analysis – one of the most prevailing approaches in comparative public policy. Through the prism of inter-jurisdiction comparisons of similarities and variations, they address comparisons in specific policy sectors, governance or institutional constructs, and political regimes. The foci are, nevertheless, on those comparisons between countries or regions, which help to lesson-draw by identifying and

understanding the variation in policy analysis and policy making that exists within or across regions. One benefit of regional comparisons is that it often allows studies to hold constant many variables, ranging from colonial legacy to federal systems, or from language to specific traditions, and more effectively isolate dependent variables. Regional organizations like the Organization for Economic Co-operation and Development (OECD) or European Union are also considered as catalysts for regional policy approaches and harmonization, and occupy a major role in this volume. The chapters address a broad and diverse number of countries and geographical areas: Latin America, North America, East Asia, Southeast Asia, Southern Africa, the Baltic states, the Nordic states, Western Europe, Central Europe, Eastern Europe, and Europe as a whole. Regional Comparisons and Policy Analysis will be of great interest to scholars and learners of public policy and social sciences, as well as to practitioners considering what can be learned or facilitated through methodologically and theoretically sound approaches. The chapters were originally published as articles in the Journal of Comparative Policy Analysis which in the last two decades has pioneered the development of comparative public policy. The volume is part of a four-volume series, the Classics of Comparative Policy Analysis including Theories and Methods, Institutions and Governance, Regional Comparisons, and Policy Sectors. Each volume showcases a different new chapter comparing domains of study interrelated with comparative public policy: political science, public administration, governance and policy design, authored by the JCPA co-editors Giliberto Capano, Iris Geva-May, Michael Howlett, Leslie A. Pal and B. Guy Peters.

**The Cambridge Handbook of Bilingual Processing** John W. Schwieter, 2015-08-06 How does a human acquire, comprehend, produce and control multiple languages with just the power of one mind? What are the cognitive consequences of being a bilingual? These are just a few of the intriguing questions at the core of studying bilingualism from psycholinguistic and neurocognitive perspectives. Bringing together some of the world's leading experts in bilingualism, cognitive psychology and language acquisition, The Cambridge Handbook of Bilingual Processing explores these questions by presenting a clear overview of current theories and findings in bilingual processing. This comprehensive handbook is organized around overarching thematic areas including theories and methodologies, acquisition and development, comprehension and representation, production, control, and the cognitive consequences of bilingualism. The handbook serves as an informative overview for researchers interested in cognitive bilingualism and the logic of theoretical and experimental approaches to language science. It also functions as an instrumental source of readings for anyone interested in bilingual processing.

**Subsonic versus Supersonic Business Jets - Full Concept Comparison considering Technical, Environmental and Economic Aspects** Michael Hans-Reichel, 2012-01-18 Inhaltsangabe: Introduction: On the 26th of August 2010 the new ultra-large-cabin ultra-long-range Gulfstream G650 business jet reached Mach 0.995 during its flight test campaign (1). This is almost the speed of sound (Mach 1) and inspires one to say, why not fly faster than the speed of sound! Reduce travelling time in the commercial business aviation segment. This is, however not a completely new vision. Many companies and research facilities have already spent a lot of time and investment in studies to investigate the feasibility of supersonic flight. Entry Into Service (EIS) for the new Gulfstream G650 is scheduled for 2012. In the following the main performance parameter of the G650 aircraft will be summarised. The parameters range, cruise speed, MTOW, etc. have been selected and serve as a basis to allow an appropriate comparison between the G650 as the latest high end Subsonic Business Jet and potential in future Supersonic Business Jets (SSBJ) within this subject Master Thesis. With the impressive maximum range of nearly 13,000 km the G650 can connect Dubai with New York or London with Buenos Aires within almost 14 hours. Maximum Range @ Normal Cruise Speed: 7,000 nm/12,964 km. Normal Cruise Speed Mach: 0.85/904 km/h. Mmo (Maximum Operating Mach Number): Mach 0.925. Maximum Cruise Altitude: 51,000 ft/15,545 m. Maximum Takeoff Weight (MTOW): 99,600 lb/45,178 kg. Maximum Fuel Weight: 44,200 lb/20,049 kg. Passengers: 11-18. Price: appr. 60-70 million USD. Gulfstream business rival Bombardier Aerospace also announced in October 2010 two new high end models, the Global 7000 and 8000 with a maximum range of 7,300 nm (13,520 km) and 7,900 nm (14,631 km) at cruise speed Mach 0.85. Entry Into Service is scheduled for 2016 (Global 7000) and 2017 (Global 8000). A comprehensive overview of business jets in service and in development is given in attachment 13.1. A Supersonic Business Jet flying at Mach 2 cruise speed could virtually halve the travelling time, which would enormously enhance the mobility and flexibility. In order to achieve this ambition a paradigm shift is required. New technologies must be established, the impact on the environment must be understood and minimised, existing regulations must be changed to permit overland flight restrictions and the product still needs to be economically viable. All of the above aspects must be considered and will be subject for discussion within this Master Thesis (See also figure [...])

**Exploratory Model Comparison** Ralf Seger, 2011 Model inference is often based on a single best model, despite modern computers easily can process many models concurrently. One reason is the manual labour involved. Managing model ensembles can become tedious when performed manually. This work presents the software design and a prototype that is concerned to facilitate that task. Requirements are discussed and examples given. Practitioners who do not shy away from interactive ensemble model management will certainly benefit from these ideas. Other readers are welcome to re-check with model ensembles and see the myth of tedious labour dissolving.
