CUCKOO'S EGG Clifford Stoll, 2012-05-23 Before the Internet became widely known as a global tool for terrorists, one perceptive U.S. citizen recognized its ominous potential. Armed with clear evidence of computer espionage, he began a highly personal quest to expose a hidden network of spies that threatened national security. But would the authorities back him up? Cliff Stoll's dramatic firsthand account is a computer-age detective story, instantly fascinating [and] astonishingly gripping (Smithsonian). Cliff Stoll was an astronomer turned systems manager at Lawrence Berkeley Lab when a 75-cent accounting error alerted him to the presence of an unauthorized user on his system. The hacker's code name was Hunter—a mysterious invader who managed to break into U.S. computer systems and steal sensitive military and security information. Stoll began a one-man hunt of his own: spying on the spy. It was a dangerous game of deception, broken codes, satellites, and missile bases—a one-man sting operation that finally gained the attention of the CIA . . . and ultimately trapped an international spy ring fueled by cash, cocaine, and the KGB.

The Modem World Kevin Driscoll,2022 The untold story about how the internet became social, and
why this matters for its future Whether you're reading this for a nostalgic romp or to understand the dawn
of the internet, The Modem World will delight you with tales of BBS culture and shed light on how the
decisions of the past shape our current networked world.--danah boyd, author of It's Complicated: The
Social Lives of Networked Teens Fifteen years before the commercialization of the internet, millions of
amateurs across North America created more than 100,000 small-scale computer networks. The people who

built and maintained these dial-up bulletin board systems (BBSs) in the 1980s laid the groundwork for millions of others who would bring their lives online in the 1990s and beyond. From ham radio operators to HIV/AIDS activists, these modem enthusiasts developed novel forms of community moderation, governance, and commercialization. The *Modem World* tells an alternative origin story for social media, centered not in the office parks of Silicon Valley or the meeting rooms of military contractors, but rather on the online communities of hobbyists, activists, and entrepreneurs. Over time, countless social media platforms have appropriated the social and technical innovations of the BBS community. How can these untold stories from the internet's past inspire more inclusive visions of its future?

The Secret Files of Henry F. Sherwood Zack Carden,2005-08 Henry F. Sherwood is an important person! He was born Heinz Weizenbaum, barely escaped Hitler's Holocaust, and came to America. He joined the Army in WWII and fought in some of the most horrific battles in the Pacific Theatre. It was during this time he changed his name. After the war he enrolled in the University of Detroit and graduated at the top of his class. In 1955 he entered the field of computers and never looked back. Henry received the Price Waterhouse Award for his work in optical character recognition. John Diebold offered him the directorship of Diebold Research Program-Europe. While there Henry began the clandestine facet of his life, an undercover agent for the CIA. The East German Secret Police (STASI) figured him for a spy for all the wrong reasons, and a host of agents compiled a six volume dossier on Henry.the secret files! Henry eventually left Diebold and began his own computer consulting company, gradually withdrawing from

business because of diabetes. You'll be surprised at the world leaders he met, and how he impacted the computer industry. We owe him a lot!
