A Low-cost Graphic Display for a Computer Time-sharing Console Robert H. Stotz,Thomas B. Cheek,1967 The advent of time-shared computer systems has created a need for a flexible and relatively low-cost communication terminal for remote computer access. Most time-shared systems now use mechanical teletypewriters which are slow and unable to present graphic displays--a serious limitation in many sophisticated computer applications. The best candidate for a teletypewriter replacement appears to be a CRT console with an alphanumeric keyboard input which can connect as a 'stand alone' unit to a standard telephone line. The unit uses a direct-view storage tube (DVST) for a display screen and contains a vector generator and a symbol generator for the full ASCII symbol set. It can connect to a central computer via a 1200-2400 baud dataphone line. A manually- controlled electronic cursor for graphical input to the computer can also be added.

Icons of Invention [2 volumes] John W. Klooster,2009-07-14 These two volumes provide in-depth coverage of 24 of history's most important inventors and their inventions. Who invented the sewing machine, the telephone, the internal combustion engine? Who pioneered vaccination? Who gave the world television, nylon, the nuclear reactor? The answers to some of these questions are straightforward, the answers to others much less so. All of them are explored in the fascinating *Icons of Invention: The Makers of the Modern World* from Gutenberg to Gates. This in-depth resource tells the stories of 24 of the most influential and well-known inventions of the modern age--and of the individuals most responsible for their development. Presented in chronological order, the entries provide background on the lives and work of inventors such as Thomas Edison, Alexander Fleming, and Tim Berners-Lee. At the same time, the set profiles their competitors and details the sometimes-controversial, often-mistake-plagued routes almost all of them took to their most famous creations.

The Wired Homestead Joseph Turow, Andrea L. Kavanaugh, 2003-06-06 Multidisciplinary essays on the effects of the internet on family life, in particular parental oversight of children's use of the World Wide Web. The use of the internet in homes rivals the advent of the telephone, radio, or television in social significance. Daily use of the World Wide Web and e-mail is taken for granted in many families, and the computer-linked internet is becoming an integral part of the physical and audiovisual environment. The internet's features of personalization, interactivity, and information abundance raise profound new issues for parents and children. Most researchers studying the impact of the internet on families begin with the assumption that the family is the central influence in preparing a child to live in society and that home is where that influence takes place. In *The Wired Homestead*, communication theorists and social scientists offer recent findings on the effects of the internet on the lives of the family unit and its members. The book examines historical precedents of parental concern over new media such as television. It then looks at specific issues surrounding parental oversight of internet use, such as rules about revealing personal information, time limits, and web site restrictions. It looks at the effects of the web on both domestic life and entire neighborhoods. The wealth of information offered and the formulation of emerging issues regarding parents and children lay the foundation for further research in this developing field.

Keywords: Chemistry; Nobel Prize; History of Chemistry; Famous Chemists Reviews: "This book makes interesting light reading, especially for chemists who have watched the field develop over the past 30 to 60 years ... it makes a worthwhile contribution to the oral history of science, and I recommend it for both libraries and individuals." Nature "István Hargittai's interviews with eminent scientists are a lively and important way of entering the minds of prominent chemists ... this makes a wonderful bedside book that attractively opens up a gallery of people, and a window onto the development of science." Chemistry & Industry "I have come back to these interviews time after time after my first read through. It's always inspiring to read about people who are good at what they do. To paraphrase Jack Dunitz, if you want value for your money in a predictable way, I think Hargittai's book is a good value. I strongly recommend it." Southwest Retort "Hargittai has done a superb job in selecting both chemical topics and appropriate interview subjects who know the topics first-hand ... Candid Science III is an interesting source of information on both current and recent chemistry and its practitioners, from a first-hand perspective of those practitioners. It also promises to be a valuable sourcebook for historians of the chemistry of this time." The Alchemist, The ChemWeb Magazine "I recommend this useful volume, suitable for complete reading or browsing, not only to historians of chemistry and science but also to practicing chemists and students, who will benefit from these inspiring stories by some of chemistry's most eminent contributors." Chemical Heritage "I recommend this handy volume, admirably suited for complete reading or browsing, not only to historians of chemistry and of science but also to practicing scientists, especially beginning ones, as well as to students, who will surely benefit from these inspiring stories by some of chemistry's leading luminaries." The Parent-Child Dance Ronald A. Kotkin, Aubrey H. Fine, 2015-06-16 A unique manual to raising a child—for parents everywhere—using the metaphor of dance to provide expert, comforting advice. Having children and raising a family should be the greatest joy in one's life, but it is a role that requires tremendous responsibility and patience. As parents, our job is to provide a strong foundation for our children, so that they can eventually grow up to become self-sufficient adults. However, just like everything in life, all children are different, some requiring more support than others and to varying degrees over time. Parenting is like a dance between parent and child. The more seamless the movements, the more graceful the interaction. When a parent takes the lead or decides to share, over time with practice, the dance can be smooth and effortless. Nevertheless, when the child is unintentionally allowed to take the lead, the parent-child dance may appear more rocky and unstable. This often occurs when the parent is unclear and at odds with their role. The ensuing battle for the lead may cause disharmony in the relationship and the dance. Parenting is a lifelong commitment that takes patience, thoughtfulness, and skill. The Parent-Child Dance is designed to explain the concept of the dance and act as a catalyst for encouraging parents to begin their journey in making positive changes in their child's life. Parents will recognize the scenarios and gain insight through humorous examples and step-by-step strategies to avoid disharmony.
