Drawing Ideas Mark Baskinger, William Bardel, 2013-11-19 A primer for design professionals across all disciplines that helps them create compelling and original concept designs by hand--as opposed to on the computer--in order to foster collaboration and win clients. In today's design world, technology for expressing ideas is pervasive; CAD models and renderings created with computer software provide an easy option for creating highly rendered pieces. However, the accessibility of this technology means that fewer designers know how to draw by hand, express their ideas spontaneously, and brainstorm effectively. In a unique board binding that mimics a sketchbook, Drawing Ideas provides a complete foundation in the techniques and methods for effectively communicating to an audience through clear and persuasive drawings.

Drawing Keith Micklewright, 2005 Contrary to assumptions that drawing is a gift that cannot be learned, this book demonstrates that it is a highly teachable skill. As well as instructing the student how to draw, the book also serves as a visual handbook for artists and designers who need to express ideas through drawing. Each chapter addresses a key topic in drawing method and theory in order to improve technique and understanding. Issues such as perspective and the manipulation of tones and marks to make 3-D forms are tackled in a simple and direct way, with a wealth of drawings by the great masters of the medium, in addition to diagrams and tables. Each section also offers ways for the student to put into practice the ideas and concepts discussed. These 'Ideas to Explore' range from practical exercises in drawing to the selection of drawing surfaces (such as paper) and subjects to discovering ways of thinking.

Sketchbook Timothy O'Donnell, 2011-09 This book explores influential designers' sketchbooks as a truer reflection of a designer's thought processes, preoccupations, and problem-solving strategies than can be had by simply viewing finished projects. Highly personal and idiosyncratic, sketchbooks offer an arena for unstructured exploration, a space free from all budgetary and client constraints. Visually arresting objects in their own right, this book aims to elevate sketches from mere ephemera to important documents where the reader can glean valuable insight into the creative process, and apply it to their own practices. Featured designers include Ralph Caplan, Nigel Holmes, Chris Bigg, Eva Jiricna, Jason Munn, Gary Baseman, Marian Bantjes, and many others.
